The technical report on the 2011 National Census of Population and Housing is a detailed collection of the technical methods employed in all the census’s stages ranging from planning to the publication of the results. The primary objective of the technical report is to satisfy the needs of a diverse range of data users, including planners, policy makers, researchers, students, and interested individuals as well as those who will be involved in designing and conducting future censuses. The technical report introduces the techniques used in the 2011 Census including those applied in the pilot censuses together with the concepts and procedures tested in these exercises.
