Annex: Types of changes in CPC structure

GSIM Type	GSIM Note
RC - REAL CHANGE	Real change stands for changes in meaning of a classification item, whether or not accompanied by changes in naming and/or coding.
RC1 - DELETION	An item expires, while its denotation reduces to zero; it does not proceed as (part of the) denotation of one or more other (existing) items.
RC2 - CREATION	The mirror image of deletion: an item emerges, while its denotation is not (part of) the denotation of one or more existing items.
RC3 - COMBINATION	
RC3.1 - <i>Merger</i>	Two or more items expire, while their denotations proceed in one emerging item.
RC3.2 - <i>Take-over</i>	An item expires, while its denotation proceeds as part of the denotation of another item, which continues its existence.
RC4 - DECOMPOSITION	
RC4.1 - <i>Breakdown</i>	The mirror image of merger: an item expires, while its denotation is distributed over and proceeds in two or more emerging items.
RC4.2 - <i>Split off</i>	The mirror image of take-over: an item continues to exist, while part of its denotation moves to another (emerging) item.
RC5 - TRANSFER	Part of the denotation of an item moves to another (existing) item: <ol style="list-style-type: none"> 1. The situation pictured is the most simple of a number of situations, in which more items may be involved in the relationship between the old and new structure. 2. "Transfer" can also be applied at higher levels of a classification. In such cases the part of the denotation that moves (to another (existing) item) corresponds to an item at the lower level.
VC - VIRTUAL CHANGE	Where real change stands for changes in meaning or scope, whether or not accompanied by changes in naming (title and definition) and/or coding, virtual change stands for changes in coding and/or naming, while the meaning of the classification item remains the same. Code change and name change do not result in border/scope changes of the classification item.
VC1 - CODE CHANGE	A classification item expires, while its denotation proceeds as the denotation of an emerging classification item. In fact, for a code change to be part of virtual change, the code of a Classification Item changes, while its denotation (including its borders and scope) remains the same.
VC2 - NAME CHANGE	The name (title or definition) of a classification item changes, while its denotation (including its borders and scope) remains the same.

	<p>Note that not all changes in (the wording of) definitions imply changes in meaning. Indeed, changes which "merely" intend to enhance the clarity of a title and/or definition, or to further operationalise a definition on the basis of situations encountered in practice, do not affect the meaning of a classification item. The same goes for extending a Classification Index or case law.</p>
NC- NOTIFICATION CHANGE	<p>A classification item stays the same while changes are made at lower levels without change in the scope that item. This helps users of a particular classification item level (usually higher levels of the classification) know that changes happened at the lowest level, so it would be interesting or important to verify (using the correspondence table for example).</p>
