

MEETING OF THE UNITED NATIONS COMMITTEE OF EXPERTS ON INTERNATIONAL STATISTICAL CLASSIFICATIONS

THE MODERNIZATION OF MALAYSIA STATISTICAL INDUSTRIAL CLASSIFICATION (MSIC) AND THE IMPACTS OF THE REVISED ISIC ON STATISTICS IN MALAYSIA

DEPARTMENT OF STATISTICS, MALAYSIA NEW YORK USA, 25-28 OCTOBER 2022

20 OCT

INTRODUCTION ON MALAYSIA STANDARD INDUSTRIAL CLASSIFICATION (MSIC)

MALAYSIA STANDARD INDUSTRIAL CLASSIFICATION (MSIC)

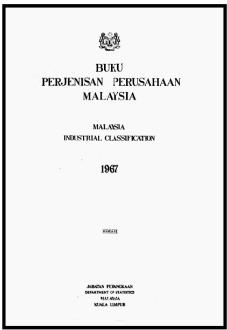

MSIC 2008 is a classification of all economic activities in Malaysia which adopts the International Standard Industrial Classification (ISIC), Revision 4 for enabling comparisons of activities at international level.

To provide a standard framework for classifying statistical units in all official statistics

1967 Malaysia Industrial Classification 1967 (ISIC Rev.1,1958)

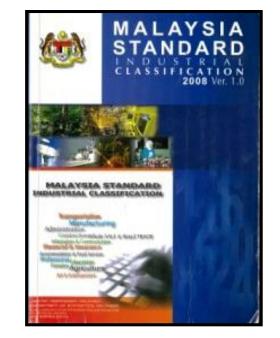

The first Malaysia Industrial Classification (MIC) was published in 1957

1972 Malaysia Industrial Classification 1972 (ISIC Rev.2,1968)

2000
Malaysia Standard Industrial
Classification 2000
(ISIC Rev. 3, 1990)

2008
Malaysia Standard Industrial
Classification 2008
(ISIC Rev. 4, 2006 : official release 2008)

It was subsequently revised in 1967 to bring it inline with the International Standard Industrial Classification of all Economic Activities (ISIC) of 1958 (Statistical Papers, Series M, No.4, Rev.1)

INNOVATION ON CLASSIFICATION

BizCode@Stats?

Mobile application has been recognized as an impressive channel for information exchange in digital world. With the transformation of static behavior into mobile lifestyle, mobile application is getting well known as **robust platform to be used by public in delivering information simplicity.** Mobile application development for statistical codes and classifications allows users to access the application via handheld devices.

This mobile applications should serve users with similar services to those accessed on PCs and it could be accessed even without internet connection.

INNOVATION ON CLASSIFICATION

Mobile Apps – Bizcode@Stats

OUTCOME

Why BizCode@STATS

Facilitate stakeholders or the public to get more specific industry code

Provide positive and professional impression to users

Improve the efficiency of services to users

- 1 Improve the quality of coding
- 1mprove the quality of data

06

Facilitate the work of DOSM staff during field work

IMPORTANCE OF CLASSIFICATION IN STATISTICS

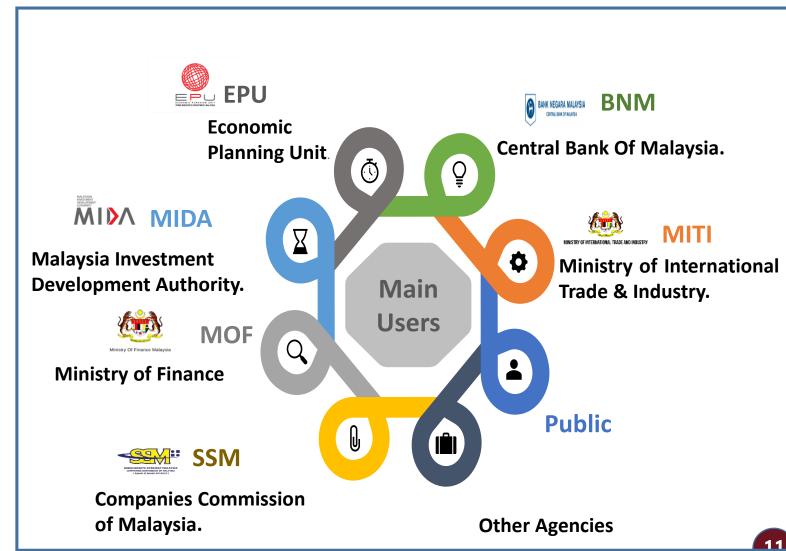

To ensure the comparability of data provided by countries around the world

To enable comparisons among categories of economies throughout the world

To serve as a guideline for other countries to develop their classification

Provide general comparable performance of the same category's economy trend

MAIN CHANGES FOR THE REVISED ISIC

MAIN CHANGES FOR THE REVISED ISIC

Part B. Main changes in the revised ISIC

- 10. Since the approval of ISIC Rev. 4 by the UNSC in 2006, globalization and digitalization have changed the way in which many economic activities provide goods and services; new activities have gained importance while others have lost importance in the global economy; and rapid and dynamic changes took place in the information technology environment. In addition, the increased awareness of the impact of the economy on the environment has created specialized activities to protect the environment. The revision of ISIC Rev. 4 aims to address these issues to reflect more closely the reality of current economic activities in the classification.
- 11. Below is the list of the major changes in the revised ISIC. They are organized by the Sections of ISIC Rev. 4 (sections G, J, K, P and R) followed by cross-sectional issues such as the classification of intermediation services, factoryless goods producers (FGPs), selected activities related to the environment and other issues.

THREE APPROACHES OF COMPILING GDP

Production Approach

Measures the sum of the VA created through the production of goods and services within the economy.

Value Added =

Output – Intermediate Input

Expenditure Approach

- + Final Private Consumption
- + Gov. Final Consumption
- + GFCF
- + Changes in Inventories
- + Export Import

Measures total **expenditures on all finished goods and services** produced within the economy.

Income Approach

- +Compensation of employees
- + Operating Surplus
- + Mixed Income
- + (Taxes Subsidies)

Measures total income generated by the production of goods and services within the economy.

Production Approach = Expenditure Approach = Income Approach

CLASSIFICATION

- a. GDP compilation correspond with the following classifications;
 - Malaysia Standard Industrial Classification (MSIC 2008)
 - Malaysia Classification of Product by Activity (MCPA 2009)
 - Classification of the Functions of Government (COFOG)
 - Classification of Individual Consumption by Purposes (COICOP)
 - Standard International Trade Classification (SITC) Rev. 4
- b. Any changes on ISIC will affect the compilation and contribution of each economic activity on GDP.

Affects the production of time series data related to relevant subsectors due to the changes in ISIC codes to other sub sector or transferred to the other subsectors.

THE IMPACTS FOR INDUSTRY STRUCTURE IN MALAYSIA

The change of ISIC from Section 45 (Section G) to Section T will lead to change in the values of inputs, output and value added for the Input-Output Tables.

(Million)

		BEFORE CH	AFTER CHANGES	
Year	Item	Section G : Wholesale and retail trade	Section G: repair of motor vehicles and motorcycles (Group 45)	Section G : Wholesale and retail trade
	Output	199,972	29,261	170,711
2010	Input	87,563	12,194	75,369
	Value Added	112,409	17,067	95,342
	Output	302,031	35,437	266,594

In the compilation of the Input-Output Table, the size of the compiled table is 124 Commodities according to 124 Industries. Section 45 in section G is in a group 93 (Wholesale & Retail Trade, Motor Vehicle and Motorcycle Repair), while Section T is in group 124 (Other Private Services). Therefore, the changes in ISIC will lead to the change in the value added structure. For example, the changes of code from Part 45 to Section T, becomes the dominant and major contribution in the group of 124 I/O tables.

- We recommend in ISIC Rev. 4, code 6619: Other activities auxiliary to financial service activities, to include digital asset exchanges
- The recommendation comes from the Central Bank of Malaysia

Eg: Bitcoin, Non-Fungible token (NFT)

3D Printing

- 3D printing is a process of making three-dimensional solid objects from a digital file.
- Industrial 3D printing has gone mainstream in a big way. This technology has moved well beyond prototyping, rapid tooling, trinkets, and toys. "Additive manufacturing" is creating durable and safe products for sale to real customers in moderate to large quantities.
- We recommend in ISIC Rev. 4, code 1811: Printing, to include 3D printing
- The recommendation comes from the Malaysia Digital Economy Corporation (MDEC) and Department of Statistics Malaysia (DOSM)

- Fintech is a new financial industry that applies technology to improve financial activities
- We recommend in ISIC Rev. 4, code 6619: Other activities auxiliary to financial service activities, to include digital asset exchanges
- The recommendation comes from the Central Bank of Malaysia

Central Bank of Malaysia statements:

Add description to cover Fintech companies intending to carry on: (i) an authorised or registered business as defined in the Financial Service Act 2013 (FSA) and

- (ii) an authorised business as defined in the Islamic Financial Service Act 2013 (IFSA); or
- (iii) a money services business as defined in the Money Services Business Act 2011 (MSBA)

6 T

Transaction/payment processing services through online (Digital bank)

- We recommend in ISIC Rev. 4, code 6619: Other activities auxiliary to financial service activities, to include transaction/ payment processing services through online
- The recommendation comes from the Central Bank of Malaysia

Eg: paywave, touch n go GO, E-wallet / mobile payments
