Gender Statistics in SA

Desiree Manamela
Chief Director: Labour Statistics
Statistics South Africa
31 August 2023
About gender statistics

- Stats SA is the main producer of gender data and statistical publications.
- There is strong management support for its continued production and dissemination.
- Dedicated gender unit since 1998 which has been expanded to include marginalized groups statistics.
- Additionally, Stats SA routinely produces sex disaggregated data, and some gender specific reports, e.g. QLFS, PIS, Census.
More regular data sources of gender statistics

More regular data sources includes:

- QLFS
- SESE
- VAS
- GHS
- GPSJS
- CENSUS

Admin:
- NPR
- DHA
- D.Ed.
- SAPS
- Parliament
Adhoc data sources of gender statistics

- **Time Use Survey (TUS)**
  - To measure and analyze time spent from day to day by different individuals
  - 1st introduce in 2000, 2010...
  - Lack of funds
  - Possible approaches to be piloted
  - To have this on a more sustainable basis
  - Learn from other countries, ILO

- **South African Demographic and Health Survey (SADHS)** (National Department of Health and the South African Medical Research Council)
  - About health matters and gender based violence (more accurate) source
  - Last in 2016 and
  - Will be done with other line ministries responsible for health -DH

The South African population in 2022 is estimated at ...

48.9% Male
(29.6M)

51.1% Female
(31.0M)

Source: MYPE 2022
South Africa has a youthful population, with a significant youth bulge aged 25-39

SA age structure by 5 year age groups, 2022

Figures represent percentage of total

Source: MYPE 2022
• South Africa has made significant progress in the representation of women across Government.

• South Africa experienced an increase in the proportion of seats held by females in parliament, from 33,0% in 2004 to 46,0% in 2019. Cabinet achieved parity in 2019.

• Three in every ten mayors are women. Appointments were equally distributed in North West, while wide gaps were observed in Western Cape, Gauteng and KwaZulu-Natal.
In spite of these gains in terms of women’s representation as political office bearers, women have not yet reached the desired level of economic participation and empowerment.
Economic empowerment

There were 2 million less women employed in Q2:2023 than men.

Women

- Employed: 7.2M
- Unemployed: 4.0M
- Other NEA: 7.7M

Men

- Employed: 9.2M
- Unemployed: 3.9M
- Other NEA: 5.6M

❖ Only 54.3% of women of working age in South Africa participate in the labour force either as employed or looking for work.

Source: QLFS Q2:2023

Key challenges and opportunities in data collection and analysis

**Key challenges**

- No available data on LGBTQIA+
  - Ongoing research
- Strengthening Gender mainstreaming in all our surveys.
  - Work closely with DWYPD
  - AND participate in international fora
- Introduce a regular and sustainable TUS module
  - Work with ILO and UN
  - Has introduced a survey in 2010
- More innovative ways of collecting more gender based data

**Opportunities**

- Even as the official supplier of statistics in South Africa, Stats SA cannot produce all data required to measure gender-related indicators.
  - forge strong working relationships between the various gender data producers as well as between users and producers
- International best practices and harmonisation of concepts and definitions
- Research on the inclusion on our surveys to include the LGBTQIA+ communities
Thank you
