The 2030 Agenda is a commitment of 193 countries and data support is so much needed.

Shared country experiences in this regional meeting is rich. Most of the countries can produce data on disability. However, there are still rooms for improvement to make these be relevant at the country level and at the global level. Together, let us address the comparability and data disaggregation issue.

hope the region can develop disability questions,; for surveys; to have at least a minimum standard tool for censuses and for surveys; and if possible, have a GLOBAL Strategy for disability measurement for inclusive growth

Hope we continue to collaborate in the region because there are a number of Tier 3 SDG indicators which we can altogether develop including the indicators on disability.
