

7th Global Forum on Gender Statistics 2018
Session 2

Producing statistics on asset ownership from a gender perspective in Georgia: Abstract of the presentation

Presenter: Tengiz Tsekvava

The presentation will consider methodological preparations for the asset ownership, actual implementation and obtained results.

The gender gap was observed with regard to all core assets in terms of ownership, modes of acquisition and alienation rights. These aspects, along with the attempt to evaluate the gender wealth gap, will be presented.

Finally, conclusions, lessons learnt and possible options for producing the asset ownership statistics in the future will be discussed.
