

Session 1: Policy Data needs

United Nations Statistics Division (UNSD)
Social and Gender Statistics Section

Second Expert Group Meeting (EGM) on Innovative and Effective ways to collect
Time-Use Statistics (TUS)

New York, 20-22 May 2019

Policy relevance of time-use data

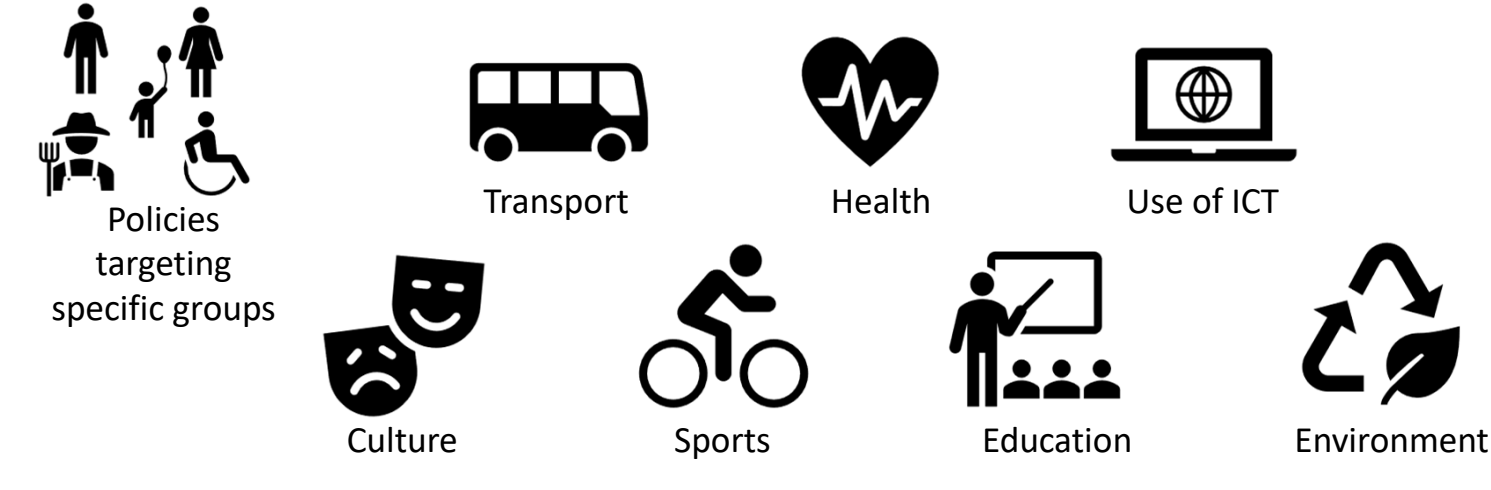

Unpaid work and non-market production

Gender Equality

Wellbeing

Policies targeting specific groups

Transport

Health

Use of ICT

Culture

Sports

Education

Environment

Questions

Background

List policy and research questions that can be answered with time-use data

Which of the above questions can be answered with the different TUS instruments?

Can you list the limitations of each instrument vis-a-vis of data needs/questions?

Questions

Data needs in your country

What are the time-use data needs in your country (policy and research)?

How are these needs determined? Do stakeholders (producers and users including academia) get together and discuss?

Do/did these needs influence the selection of instrument: full diary, light diary, stylized questions?

Questions

Data use

How do you monitor the use of time-use data produced by your office? How are these data used? For policy making? If yes, please describe. If not, please explain why.

What would improve the use of time-use data in your country?

Groups

Group 1	Group 2	Group 3
Patricia	Jay	Rachel
Xuhua	Donhua	Hannu
Norma	Laura	Todgerel
Chirawat	Dihlolelo	Rabelani
Didier	Fatima	Eleanor
Ignace	Shane	Lauren
Iliana	Francesca	Elisa
Harumi	Lingyan	Haoyi
		Mehmet
