

The Indonesian Population Census 2020 Highlights

BPS – Statistics Indonesia

United Nations Expert Group Meeting, 9-12 February 2021

INTRODUCTION

Legal Basis

PC2020 is the 7th Population Census

“Documenting Indonesia toward ONE POPULATION DATA for Advanced Indonesia”

- **UU No. 16 Tahun 1997** tentang Statistik
- **UU No. 23 Tahun 2006** tentang Administrasi Kependudukan
- **UU No. 52 Tahun 2009** tentang Perkembangan Kependudukan dan Pembangunan Keluarga
- **UU No. 24 Tahun 2013** tentang Perubahan atas UU No. 23 Tahun 2006 tentang Administrasi Kependudukan
- **PP No. 51 Tahun 1999** tentang Penyelenggaraan Statistik

United Nations Recommendation 2017

Population and Housing Census 2020

Perpres No. 39 Tahun 2019

Satu Data Indonesia

Perpres No. 62 Tahun 2019

Strategi Nasional Percepatan Administrasi Kependudukan untuk Pengembangan Statistik Hayati

POPULATION CENSUS 2020

GOALS

Provides data on number, composition, distribution, and characteristics of Indonesian toward **ONE POPULATION DATA IN INDONESIA**

- ▶ Completed in 2020

Provides demographic parameters (fertility, mortality, and migration) as well as other individual characteristics for **population projection** and **SDGs indicators**.

- ▶ Will be conducted in September 2021

BASIC IMPROVEMENTS

COMBINED METHOD

The use of relevant administrative data (data managed by the ministry of home affairs) completed by sample survey

DATA COLLECTION MODE

Online population census, drop off pick up (DOPU), and interview

POPULATION CENSUS DURING COVID-19 PANDEMIC

Challenges dan responses from various countries conducting population census

Challenges

Implementation of strict health protocols:

- ✓ Reduce face-to-face interaction
- ✓ The use of PPE is a must – for countries conducting census

Budget reallocation for health and economic recovery

Responses of countries

31 countries *delayed or extended the period of population census*

- Indonesia
- USA
- Malaysia, etc

13 countries *conducted census as scheduled or utilizing administrative data or switched to register-based census*

- Japan
- Korea
- Finland, etc

Adjustments made in Population Census 2020

ONLINE POPULATION CENSUS

15 February – 31 March 2020

Extended until 29 May 2020

DEVELOPING POPULATION REGISTER/LIST

ENUMERATORS TRAINING

Initially planned to be face-to-face, adjusted into online training

ENUMERATOR'S GEARS

Rapid test, PPE (face shield, face mask, disposable gloves), ID card, office supplies, and vest

FIELD ACTIVITIES

Initial plan: JULY 2020

Delayed to: SEPTEMBER 2020

FIELD VERIFICATION

DESK VERIFICATION OF POPULATION REGISTER/LIST

INDIVIDUAL ENUMERATION

- Two modes data collection
Initially CAPI and PAPI, adjusted to DOPU and PAPI
- Field enumerator workload increases

OUTPUT:

- ✓ Population count and distribution
- ✓ Sex
- ✓ Age structure
- ✓ Residential status: usual residence vs registered residence.

PC2020 RESULTS

Population of Indonesia (Million)

- ✓ Population of Indonesia based on PC2020 (September 2020): **270,20 million**
- ✓ With the total land area about 1,9 mill km², the population density in Indonesia: **141 people/km²**
- ✓ For the period of 2010-2020, the average population growth in Indonesia: **1,25 percent**

Population of Indonesia Based on Synchronization of PC2020 and Administrative Data

$r_{Sep'20-Des'20} = 0,14\%*$

At the national level, the population of Indonesia based on PC2020 is in line with the synchronized administrative data. At the regional level, the difference in population data between PC2020 and administrative data indicates the number of people who have migrated, whether for work, school, or other reasons.

Note:

*Estimated growth rate per month (September-December 2020)

Population of Indonesia by Island, 2020

56,10 %
(151,6 million)
of Indonesian
are **living in**
Java

Population of Indonesia by Island, 1971 - 2020

The trend
continues...

Population of Indonesia by Residential Status, 2020

Population of Indonesia by Province, 2020

- ✓ The most populated province in Indonesia is **West Java: 48,27 million**
- ✓ The least populated province in Indonesia is **North Kalimantan: 0,70 million**

POPULATION BY SEX

50,58%

MALES

136,66 million

50,58%

49,42%

FEMALES

133,54 million

49,42%

SEX RATIO OF INDONESIA, 1971-2020

SEX RATIO by Province in Indonesia, 2020

✓ The highest sex ratio:
Provinsi Papua → 114

✓ The lowest sex ratio:
DI Yogyakarta → 98

Age Distribution of Indonesia, 1971-2020 (Percent)

- The proportion of persons aged 0-14 years decrease from 44.12 percent in 1971 to 23.33 percent in 2020*
- The working age group (15-64 years) increase from 53.39 percent to 70.72 percent*
- The proportion of person aged 65 years and over increase from 2.49 percent to 5.95 percent*

Notes for PC2020:
1) N.A. data is not included in the calculation
2) Age data derived from administrative data

Indonesia is dominated by Millenials and Gen Z

Post Gen Z

- Born: 2013 and later
- Est current age: up to 7 yrs

Gen Z

- Born: 1997-2012
- Est current age: 8-23 yrs

Millenials

- Born: 1981-1996
- Est current age: 24-39 yrs

Gen X

- Born: 1965-1980
- Est current age: 40-55 yrs

Baby Boomers

- Born: 1946-1964
- Est current age: 56-74 yrs

Pre-Boomers

- Born: before 1945
- Est current age: 75+ yrs

Notes for PC2020: 1) N.A. data is not included in the calculation
2) Age data derived from administrative data

Source of classification : William H. Frey analysis of Census Bureau Population Estimates (25 June, 2020)

Follow up in 2021: PC2020 Long Form Enumeration

When

- ✓ September 2021

SAMPLE SIZE

- ✓ 3,5% of total family (3,05 million families) equal to 268 thousand census blocks
- ✓ Level of estimation: sub-regional level

DATA COLLECTION

Data collection mode:

CAPI (Computer Assisted Personal Interviewing)

PAPI (Pencil and Paper Interviewing)

VARIABLES (105 Questions)

Individual
(15 questions)

Disability
(12 questions)

Fertility and Mortality
(26 questions)

Education
(5 questions)

Migration
(19 questions)

Housing
(20 questions)

Labor related
(8 questions)

Thank you

For all supports...
