

# Monitoring progress in increasing the integration and wellbeing of migrants

**Rachael Beaven, Director Statistics Division, ESCAP,**  
Technical Workshop on International Migration and Temporary Mobility Statistics  
16-19 July 2024, Warsaw, Poland

# Outline

Advancing understanding of and increasing national capacities for production of migration statistics in different settings of statistical systems

## 01

### WHY

Why are we measuring progress in migrants' wellbeing and integration?

## 02

### WHAT

What are we measuring and what are the different data sources

## 03

### CHALLENGES

What are some of the challenges countries face when measuring these issues

## 04

### LESSONS

What are some of the lessons we have learnt and how can we share these lessons between countries.

# Role of regional commissions

## Platform for exchange

- Regional forums and workshops
- Regional data hubs and networks

## Share good practice

- Case studies and success stories
- Peer learning and technical workshop

**ESCAP**  
Economic and Social Commission  
for Asia and the Pacific

## Advocacy

- High level events
- CRVS Decade and ministerial conferences

# Outline

Advancing understanding of and increasing national capacities for production of migration statistics in different settings of statistical systems

01

## WHY

Why are we measuring progress in migrants' wellbeing and integration?

02

## WHAT

Strengthen Civil Registration and Vital Statistics Systems

03

## BROADER WORK

Data governance including data integration practices

04

## LESSONS

What are some of the lessons we have learnt and how can we share these lessons between countries.

# Data sources - Administrative data

- Includes education information systems, CRVS, health information systems, border and identity management systems.....
- Need strong data protection
- Political sensitivity to inclusion and integration
- Data often sits with line ministries needs coordination
- Need appropriate data governance

# CRVS decade: focus on inclusion

- CRVS important for measuring many indicators as well as providing legal identity and preventing statelessness
- Countries committed to including migrants, refugees, asylum-seekers and stateless people in CRVS systems
- However, often barriers in both supply and demand
- Focus of expansion of Decade to 2030 to be on inclusion (and resilience)
- Recent workshop with UNHCR, UNICEF, IDAC and EGRISS on inclusive CRVS systems

# Common challenges

- Data variability – lack of harmonization, different indicators
- Hard to reach populations, not reached by any data source
- Do no harm principles, need strong data protection
- Issues with data sharing
- Misuse of data, political sensitivities
- Limited funding and technical resources
- Are we comparing to a host population? If so, how is this to be defined?

# Outline

Advancing understanding of and increasing national capacities for production of migration statistics in different settings of statistical systems

01

## WHY

Why are we measuring progress in migrants' wellbeing and integration?

02

## WHAT

Strengthen Civil Registration and Vital Statistics Systems

03

## BROADER WORK

Data governance including data integration practices

04

## LESSONS

What are some of the lessons we have learnt and how can we share these lessons between countries.

Data governance is defined as  
the exercise of authority and control  
over the management and transformation of data  
with the objective of enhancing the value of data  
assets and mitigating data-related risks.

# DATA GOVERNANCE FRAMEWORK

## PILLAR 1

Vision  
and  
policy intent

## PILLAR 2

Data  
management  
policies,  
rules  
and  
institutions

## PILLAR 3

Data  
custodians  
and  
data  
stewards

## PILLAR 4

Data sharing,  
data  
accessibility  
and  
data  
integration

## PILLAR 5

Data sharing,  
risks  
and  
mitigation

# VISION AND POLICY INTENT

# 1

Is the vision for data part of a broader digital services agenda?

DIGITAL  
AGENDA

Is the vision for data about better public services?

BETTER  
PUBLIC  
SERVICES

GOVERNMENT  
VISION FOR  
DATA

Is the vision for data part of efforts to see data as a service?

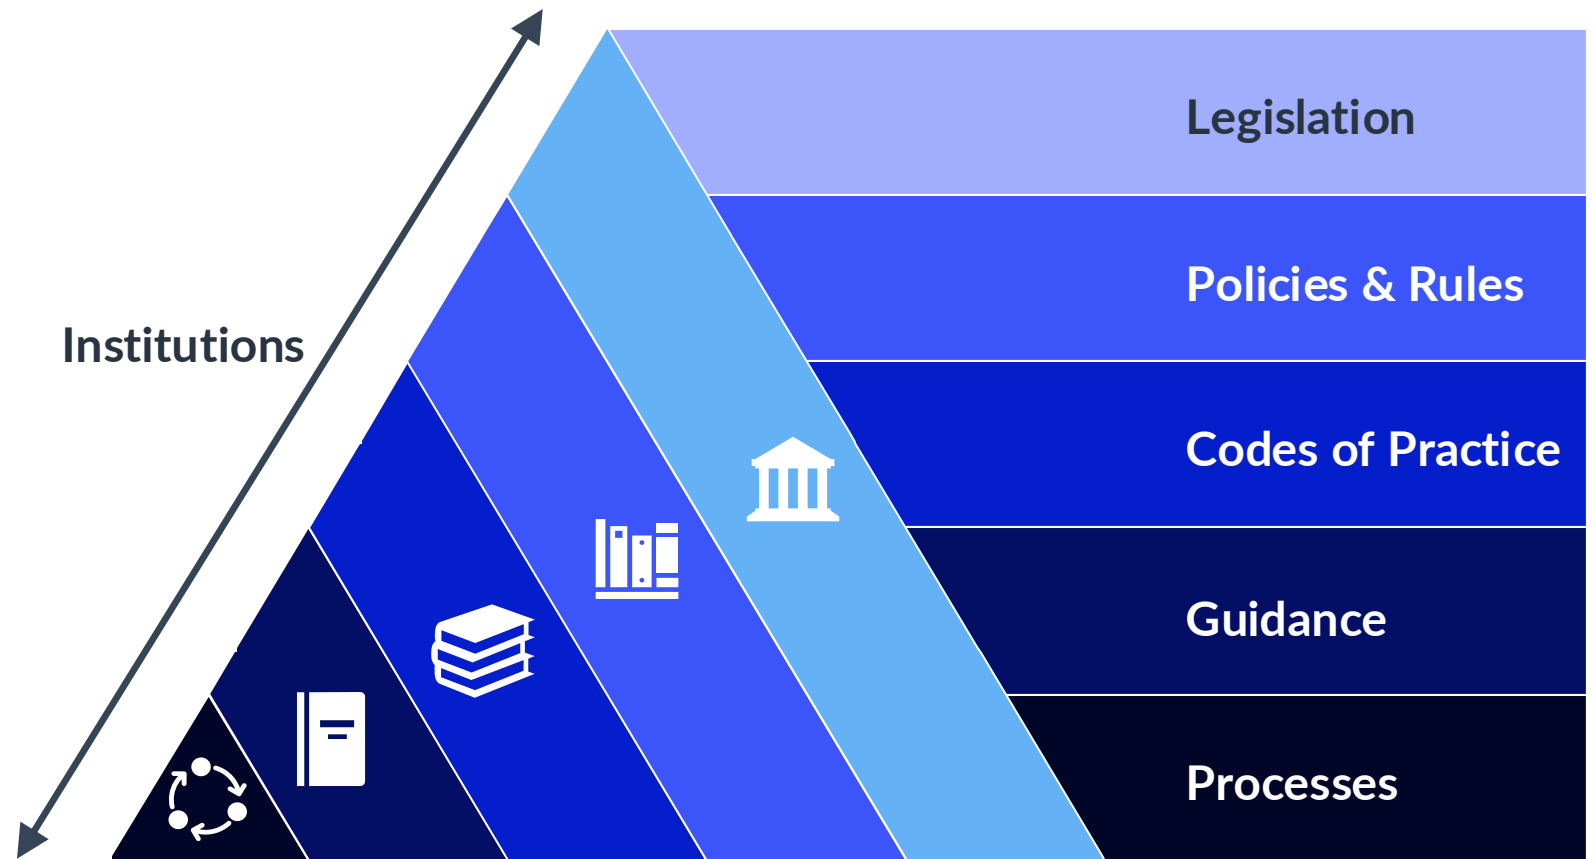

DATA AS A  
SERVICE

Is the vision for data about building a stronger economy?

STRONG  
ECONOMY

**POLICIES,  
RULES AND  
INSTITUTIONS  
THAT  
GOVERN DATA  
MANAGEMENT  
PRACTICES**

2

# DATA CUSTODIANS AND DATA STEWARDS

# 3

## Data Custodians

- Perform a specific data management role
- Manage the process of data collection, storage and retrieval
- Ensure quality assurance at source and data privacy at source

**Provide a data  
management role**

## Data Stewards

- Perform a professional function over and above the data production processes
- Assess and promote the use of data, identify shortcomings in the data system and strive to meet the needs and build trust of data users

**Provide a longer term,  
more strategic  
perspective**

DATA  
SHARING,  
DATA  
ACCESSIBILITY  
AND DATA  
INTEGRATION

4

## Challenges

- Need quality administrative data
- Need public approval
- Need a legal basis
- Need collaboration mechanisms
- Need technical skills

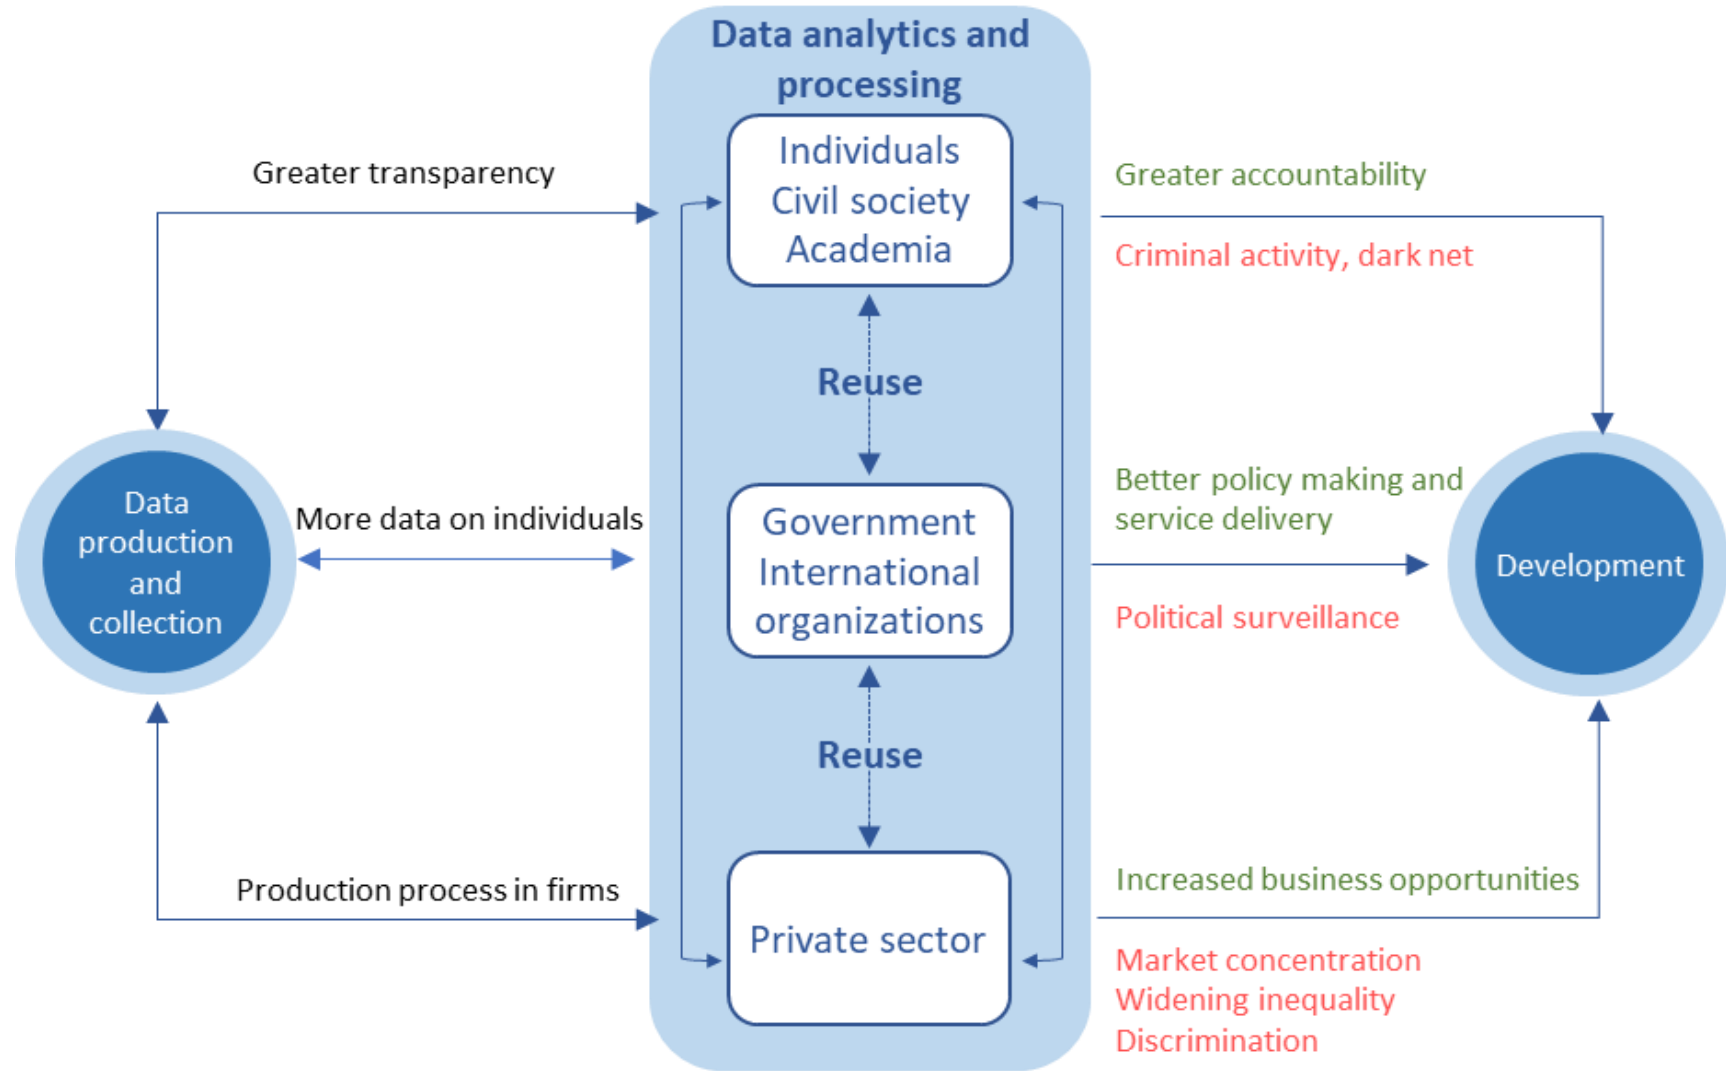

## Opportunities

- Bridge data gaps
- Reduce response burden
- Provide granular data
- Improve coverage
- Improve timeliness
- Improve frequency
- Lower costs

# DATA SHARING RISKS AND MITIGATION

# 5

Note: Positive impacts are shown in green; negative impacts are shown in red

# New Zealand: Data governance profile

## 1. Vision and policy intent

[Stats NZ](#) is New Zealand's lead agency for government-held data. Its goal is to provide quality, trustworthy data and statistics with which New Zealanders can make evidence-based decisions. At the heart of this work is transparency, trust, and integrity around the use of data the government holds.

The nation's highly decentralized government model grants agencies autonomy separate from the Executive Branch.

Stats NZ sees success as a data system that is both inclusive and integrated. A system where anyone who wants to base their decisions on credible information can do so with ease. A system that generates the deepest insights and the best services, at the least effort to the people and organisations behind the data.

## 2. Data Management: policies, rules & institutions

New Zealand's most important official statistics, classified as 'Tier 1,' are produced by Stats NZ and 15 other government bodies. They adhere to a framework of [principles and protocols](#) based on the UN Fundamental Principles of Official Statistics. The framework was written in 2007 and is currently under review.

In 2017, the [Government Chief Data Steward](#) (GCDS) role was established, held by Stats NZ's Chief Executive, to drive data's value realization across government. The GCDS leads efforts, as highlighted by the 2021 [Government Data Strategy and Roadmap](#). This includes:

- A Data Investment Plan;
- An Open Data Charter Plan to ensure data is open, inclusive, accessible, and findable
- A Data System Maturity Assessment; and
- An updated approach to mandating and managing standards.

A new [Data and Statistics Act 2022](#) strengthened the role of the GCDS to make the best use of data collected and held by govt while ensuring private and confidential information is held securely and used appropriately.

## 3. Data custodians and data stewardship

Data stewardship: is defined In a 2018 [policy document](#), as follows:

- a) to create a safe, high-trust data environment supported by public confidence;
- b) to improve availability and accessibility of govt data;
- c) to establish sustainable data capability across govt; and
- d) to establish partnerships to innovate with data and solve complex problems.

Two key governance bodies support the role of the GCDS:

- The [Information Group](#), the key advisory body for the GCDS;
- The [Digital Government Leadership Group](#) which supports the GCDS and the [Government Chief Digital Officer](#) to develop and improve digital and data systems and ensure they are aligned with the [Government Data Strategy and Roadmap](#) and the [Strategy for a Digital Public Service](#).

The GCDS has developed a [data stewardship framework and toolkit](#) to help govts to better manage and safely access data and to ensure that data is managed as a valuable asset and used ethically. Agencies will often appoint a data custodian.

## 4. Data sharing, accessibility and integration

Sharing across government occurs through Information Sharing Agreements ([Privacy Act 2020](#)) and other specific arrangements. The [Government Chief Privacy Officer](#) is establishing an information sharing centre of excellence. Sharing is regulated by the [Privacy Commission](#).

Stats NZ provides two large collections of integrated administrative and survey data:

- The [Integrated Data Infrastructure](#) (IDI) holds integrated microdata about people and households. Researchers use the IDI to conduct cross-sectoral research on complex social and economic issues; and
- The [Longitudinal Business Database](#) (LBD) holds de-identified microdata about businesses. Data comes from a range of Stats NZ surveys and government agencies. Researchers use the LBD to evaluate policies and analyse business performance.

## 5. Data sharing risks & mitigation

Stats NZ uses a '[five safes framework](#)' and Ngā Tikanaga Paihere to protect privacy and guide ethical use of data. Before data is made available to approved researchers, all personal identifiers are removed or encrypted to ensure the data records are not associated with named individuals.

The Ngā Tikanaga Paihere framework uses Māori concepts to guide the ethical and culturally appropriate use of data.

Access is only provided if all the 'five safes' conditions are met: safe people, safe projects, safe settings, safe data, and safe output.

The GCDS supports a Data Ethics Advisory Group available to all government agencies

# Outline

Advancing understanding of and increasing national capacities for production of migration statistics in different settings of statistical systems

01

## WHY

Why are we measuring progress in migrants' wellbeing and integration?

02

## WHAT

Strengthen Civil Registration and Vital Statistics Systems

03

## BROADER WORK

Data governance including data integration practices

04

## LESSONS

What are some of the lessons we have learnt and how can we share these lessons between countries.

# Lessons learned

- Strengthen data ecosystem as a whole including embedding international standards and definitions;
- Consider using range of data, including non-traditional and quantitative data;
- Promote data sharing between agencies to ensure all possible data is used;
- Fully leverage technology for data collection, analysis and dissemination;
- Capacity building – on all aspects including data sharing, anonymization, data use etc.

# Next Steps

## Future Direction

- Encourage efforts and collaboration
- Strengthen data systems
- Enhance regional cooperation
- Commit to continuous improvement in data quality and availability
- Inclusive CRVS systems (ministerial conference in 2025)

- Enhance regional cooperation.
- Invest in data infrastructure and capacity building.
- Develop regional programme on migration statistics
