# Plenary session

International Workshop on Time-Use Statistics

Xi'an, 25 -27 June 2024

Plenary discussion

1. **<u>Time-use data in the national data ecosystem</u>**

- Does your NSO have a *specific mandate* to collect time-use data? Does it specify the periodicity of data collection?

- Are time-use data collections in your country part of a *specific programme* (allocated budget, dedicated team) or *integrated* into other statistical programs (including through modules or questions in other surveys).

Plenary discussion

2. Identifying users of Time-use statistics

- *User groups :* Who are current and/or potential users of time use statistics in your country?

- *Users' needs:* What information do they demand or could be useful for them?

3. Identifying uses of Time-use statistics

- *Time-use data and SDGs:* How does your country use time-use data to monitor SDGs?

- What are the *current trends* in time-use research/data collection?

- Which *other topic areas* might benefit from time-use data?

Plenary discussion

4. Challenges and lessons learned

- *Challenges of time-use statistics:* What are the challenges that your country experienced in the production of time-use statistics? How could the international community offer support?

- *Lessons learned from the collection of time-use data:* What mechanisms are in place for ensuring quality of time-use data collections? What partnerships are needed to strengthen time-use data?

Plenary discussion

5. Expectations about the workshop

- What knowledge and skills do you hope to acquire?

- How do you plan to apply the knowledge acquired in the workshop?

- What are the plans of your country/institution for time-use data collection?
