Outline

1. Public Policy Framework

2. NTUS 2024-2025

3. Care Economy Satellite Account
   - Simulator of unpaid care work (Calculator)

4. National Transfer Time (NTT) and National Time Transfer Account (NTTA)

5. Maintenance of Classification (CUOC)

6. Care Map

Public Policy Framework

Law 1413 of 2010

Establishes the inclusion of the care economy in the National Accounts System, with the aim of measuring women's contribution to the country's economic and social development and as a fundamental tool for defining and implementing public policies.

National Development Plan 2022-2026

The general section outlines the long-term national goals and objectives, the medium-term goals and priorities for government action, and the general strategies and guidelines for economic, social, and environmental policies that the government will adopt.

National Care Public Policy de 2025 (CONPES 4143)

Proposes an action plan to advance toward the consolidation of a caring society in which the State guarantees the right to receive care and to provide care in dignified conditions, while recognizing, protecting, and strengthening collective and community forms of care (133 actions, including 35 ministries).

National Time Use Survey 2024-2025 (4th edition)

Key methodological aspects

Strategic partnerships

New concepts

Geographic coverage

Ministry of Equality and Equity	Community Care	Orinoquía and Amazonía

Sample
70.000 households (increase 40% in comparison with 2020-2021)

National Account System and Care Economy

Care Economy Satellite Account

01 Economic value of the Unpaid Domestic and Care Work and context indicators

02 UDCW Production and Income Generation Account

03 Expanded Work Matrix

Bringing care into the System of National Accounts – SNA- reveals how paid and unpaid work interact by tracking how people allocate their time.

National Account System and Care Economy

Unpaid Work Calculator

DANE

Compartir en redes:

Simulador del trabajo doméstico y de cuidado no remunerado para el hogar y la comunidad

Como ejercicio reflexivo y de reconocimiento, el DANE y la ONG internacional Oxfam desarrollaron este simulador a través del cual se puede calcular el tiempo y el aporte que hacen las personas a su hogar y al país con el Trabajo Doméstico y de Cuidado que realizan cotidianamente sin remuneración. Los cálculos se basan en el Salario Mínimo Mensual Legal Vigente* del 2024. Esta herramienta tiene fines exclusivamente de cultura estadística. NO se constituye de ninguna manera en un valor oficial ni es base para liquidaciones o cobros judiciales, dado que esto no es competencia del DANE.

¿Sabía que las tareas domésticas que realiza en el hogar y el cuidado que da a otras personas sin recibir pago también son consideradas trabajo?

¡Descubra su aporte al hogar y a la economía del país!

Care Economy Satellite Account: NTT + NTTA

Innovating the production of gender-disaggregated evidence.

National Transfer Account

- 2021-2022: Publication of NTA results with 2017 as the reference year.

  2024: Publication of gender-disaggregated NTA results, with 2021 as the reference year.

- **Understanding the generational transfer of labor income** from people in their productive years to the dependent age groups.

- **Integrates statistical microdata with administrative registers:** National Accounts, National Quality of Life Survey, social security affiliation records, etc.

National Time Transfer Account

- Quantifying the **value and flow of non-monetary intergenerational transfers** (unpaid care work, household services) by age and sex.

- Enabling the equitable and empirically-based design of public policies that account for the **intergenerational distribution of unpaid labor**

- To construct the time-use profiles, the 2020–2021 **National Time-Use Survey** was used (Household composition, Education, Labor force, Time use)

- To monetize the profiles, estimates of employee compensation and average income from the **Care Economy Satellite Account** were used.

Occupational classification maintenance

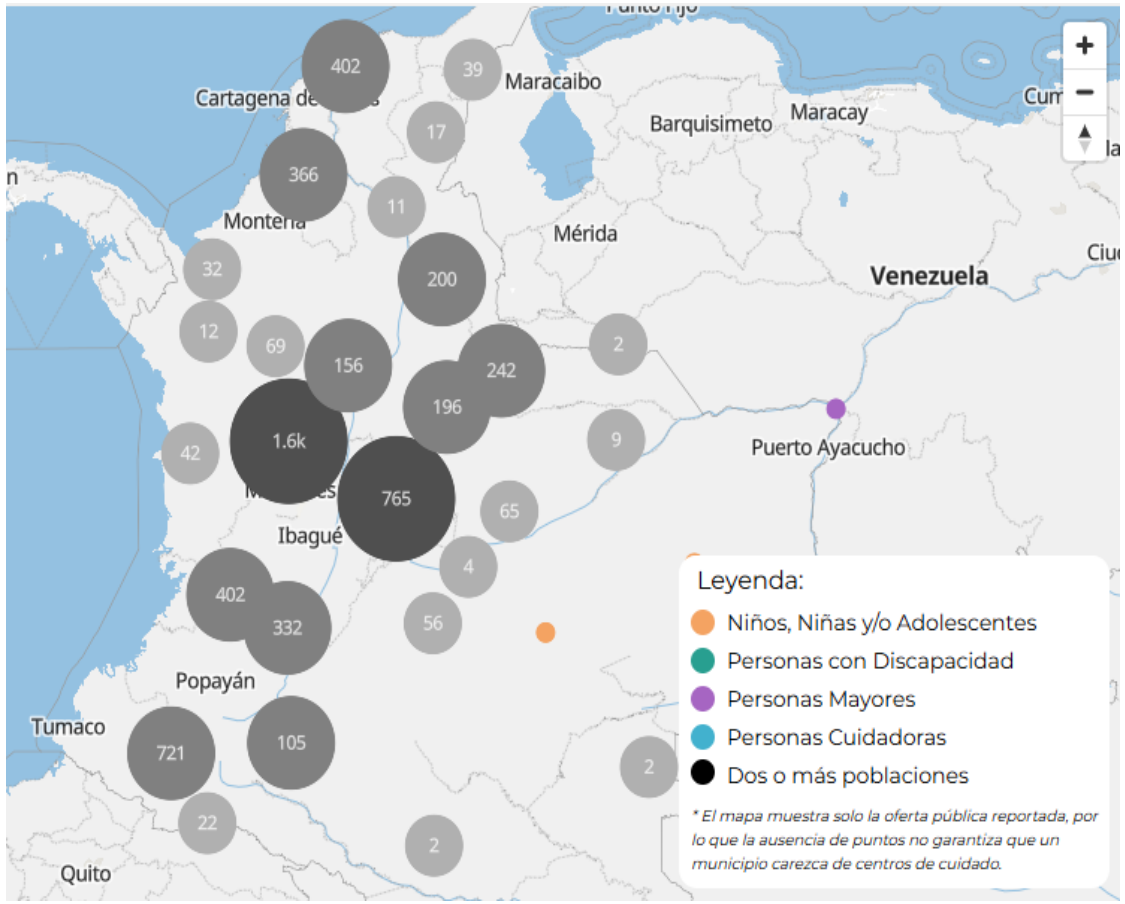
Law 2297 of 2023 establishes in Article 9. Creates the occupational profile "Caregiver or Personal Assistant for Persons with Disabilities."

- **Occupation:**
Code 53220 Home caregiver or personal assistant for persons

- **Description:** Provide personal care—daily routines, ADLs, self-care, communication, and emotional support—for people needing assistance due to aging, illness, disability, injury, or other conditions..

Inclusive language

Care Map



Development of a geospatial inventory (mapping + georeferencing) of ***public care facilities*** across national, departmental, and municipalities.

Ongoing actions are **strengthening information management—data collection and processing—**for mapping public care services.
