

# World Migration Report 2022

Since 2000, IOM has been producing world migration reports. The World Migration Report 2022, the eleventh in the world migration report series, has been produced to contribute to an increased understanding of migration throughout the world. This new edition presents key data and information on migration as well as thematic chapters on highly topical migration issues.

Fragile States Index  
(From least fragile to most)

The United States of America has been the main country of destination for international migrants since 1970. Since then, the number of foreign-born people residing in the country has more than quadrupled - from less than 12 million in 1970, to close to 51 million in 2019. Germany, the second top destination for migrants, has also observed an increase over the years, from 8.9 million in 2000 to nearly 16 million in 2020.
