**GENERAL NOTES - NOTES GENERALES**

Late foetal deaths are those of 28 or more completed weeks of gestation. Data include foetal deaths of unknown gestational age. Ratios are the number of late foetal deaths per 1 000 live births. Ratios are shown only for countries or areas having at least a total of 1 000 late foetal deaths in a given year. For method of evaluation and limitations of data, see Technical Notes for this table. — Les morts foetales tardives sont celles qui surviennent après 28 semaines complètes de gestation au moins.
