**GENERAL NOTES - NOTES GENERALES**

Ratios are number of late foetal deaths in each age and birth-order group per 1 000 live births in the same age and birth-order group. Late foetal deaths are those of at least 28 weeks of gestation. Foetal deaths of unknown gestational age are included. Late foetal deaths of unknown legitimacy are considered illegitimate. Unless otherwise specified, total birth-order is based on number

of previous live births and foetal deaths to the mother. For method of evaluation and limitations of data, see Technical Notes for this table. — Les rapports représentent le nombre de morts fœtales tardives pour 1 000 naissances vivantes du même groupe d'âge. Les morts fœtales tardives sont celles qui surviennent après 28 semaines de gestation au moins. Les données du présent tableau comprennent les morts fœtales survenues après une période de gestation de durée inconnue. Les morts fœtales tardives dont

la légitime n'est pas établie sont considérées comme illégitimes. Sauf indication contraire, le rang de naissance est déterminé par le nombre total d'enfants nés vivants ou morts-nés que la mère a déjà eus. Pour la méthode d'évaluation et les insuffisances des données voir, Notes techniques pour ce tableau.
