

**United Nations Statistics Division: Demographic Yearbook
Questionnaire on Population Estimates
Part 2: Metadata**

Reporting country: [United States of America](#)
Reporting year: 2022

1. Author organization

Author organization function: [U.S. Census Bureau, Population Division](#)

Contact person(s):

Contact person(s) functions(s):

Contact person(s) email address(es):

2. Timeliness

Date when the provided population estimates were produced: [December 2021](#)

Reference dates of the sources of the latest data used to derive these estimates: [July 1, 2021](#)

3. Periodicity

Calendar of the production of population estimates:

- produced annually
- after each census
- at the midpoint of intercensal period
- other, please specify:

4. Status of data

4.1 Type of estimation: intercensal, postcensal, other; please specify: [postcensal](#)

4.2 Data revision status: provisional, provisional revised, final, final revised, other; please specify: [final](#)

5. Coverage

5.1 Please specify the time period covered by time series of the reported population estimates: [April 1, 2020 \(population estimates base\)](#) and [July 1, 2020, to July 1, 2021](#)

5.2 Please specify the territorial coverage of the time series of the reported population estimates:

5.2.1 In case any areas of the country were not enumerated during the latest population census, are they considered in reported population estimates? Please describe as necessary:

5.3 Type of population count employed for the reported population estimates:

- present population (de-facto)
- usually resident population
- registered population
- other; please specify:

5.4 Included or excluded population groups; please fill out the below tabulation:

In order to clarify the exact composition of the population for which estimates were given in this questionnaire, please indicate below the disposition of each group listed.

Population group	Included	Excluded	Not applicable
(a) Nomads and persons living in areas to which access is difficult	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(b) Civilian residents temporarily absent from the country	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(c) Civilian foreigners who do not cross a border daily and are in the country temporarily	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(d) Refugees, asylum seekers and internally displaced persons	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(e) Military, naval and diplomatic personnel and their families located outside the country	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(f) Foreign military, naval and diplomatic personnel and their families located in the country	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(g) Civilian foreigners who cross a border daily to work in the country	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(h) Civilian residents who cross a border daily to work in another country	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

(i) Merchant seafarers and fishers resident in the country but at sea at the time of the latest census	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(j) Homeless or roofless persons, and persons with no concept of usual residence	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(k) Persons living in buildings with restricted access	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(l) Stateless persons	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
(m) Other; please specify	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

6. Primary data source (base data)

6.1 Type of base data:

- (1) Continuous population register
- (2) Complete census taken [REDACTED] (date)
- i) population actually enumerated
- ii) population adjusted to take account of [REDACTED] % underenumeration
- (3) Sample survey taken [REDACTED] (date)
- (4) Partial census taken or partial registration [REDACTED] (date)
- Please describe method:
- (5) Non-censal count of [REDACTED] (date)
- Please describe method:
- (6) Conjectural estimate derived by means other than counting

Please describe method:

Due to delays in the 2020 Census resulting from the COVID-19 pandemic, Vintage 2021 data used a “blended base” that supplements national, state and county totals from the 2020 Census Public Law 94-171 redistricting file with other sources of data from the Census Bureau’s Population Estimates Program to achieve the highest accuracy possible. These sources of estimated population data for Census Day (April 1, 2020) were the [Vintage 2020 estimates](#) and the [2020 Demographic Analysis \(DA\) middle series](#), which impact the base data distribution by age, sex, race, and Hispanic origin. The population totals in the base data for counties and higher levels of geography match the results of the 2020 Census.

For more information, refer to our [Vintage 2021 methodology statement](#) and our [overview of method changes for the new decade](#).

6.2 Territorial coverage of base data, please specify:

6.3 Type of population count employed in base data:

- present population (de facto)
- usually resident population
- registered population
- other, please specify:

7. Method of producing the reported population estimates

7.1 Total population

Estimates of total population of a country may be constructed using several methods. Please indicate by a check mark the method used in constructing the reported population estimates.

7.1.1 Method of time adjustment

- (1) Population estimates are sourced annually from a population register
- (2) Applying statistics of births and deaths (natural increase), and migration
 - (i) Registered vital statistics
 - (ii) Vital statistics adjusted for incompleteness
- (3) Applying statistics of births and deaths (natural increase), but no account taken of migration
 - (i) Registered vital statistics
 - (ii) Vital statistics adjusted for incompleteness
- (4) Applying an assumed rate of increase, based on:
 - (i) Assumption with respect to mortality, fertility, migration
 - (ii) Assumption with respect to mortality, fertility, but no account taken of migration

- (iii) Other assumed rate

Please provide the rate used, and describe how it was obtained:

- (5) No time adjustment (base figure held constant)
- (6) Other; please explain:

7.2 Population by age and sex

Estimates of population by age and sex are assumed to be constructed on the same base data as are the total population estimates. However, certain additional factors may affect age distributions estimated from census enumerations or from sample surveys. Please indicate below the adjustment(s) made in the basic age distribution used to construct the reported population estimates by age and sex.

7.2.1 Adjustments in base data

- (1) No adjustments – the calculations are based on population actually enumerated at various ages or estimated from survey results.
- (2) Enumerated population or population estimated from survey results adjusted to take account of under enumeration at various ages. Please describe as necessary the methods of adjustment.

As noted above: Vintage 2021 data used a “blended base” that supplements national, state and county totals from the 2020 Census Public Law 94-171 redistricting file with other sources of Census Bureau data from the Population Estimates Program to achieve the highest accuracy possible. These sources of estimated population data for Census Day (April 1, 2020) were the [Vintage 2020 estimates](#) and the [2020 Demographic Analysis \(DA\) middle series](#). Specifically, the distribution of the population in the base data by age and sex come from the 2020 DA estimates.

- (3) Base age distribution is "smoothed", i.e., adjusted to remove effects of digit preference in age reporting. Please describe as necessary the methods of smoothing.

7.2.2 Method of time adjustment

Please indicate below the method used in constructing the age-sex distribution of the reported population estimates by age and sex.

- (1) Population estimates by age and sex are sourced annually from a population register
- (2) Applying actual or assumed natural increase and migration

- (3) Applying actual or assumed natural increase alone
- (4) Distributing the total estimate according to percentage of population in each age-sex group at time of census or sample survey
- (5) Use of the cohort-components method to produce population estimates by age and sex
- (6) Innovative methods that use registers and administrative data. Please describe as necessary:
- (7) By other means, please describe:

7.2.3 Disposition of unknown age

Please indicate below whether, in the preparation of the population estimates by age and sex:

- (1) An age has been assigned to persons for whom age did not appear in the census or sample survey.
- (2) Frequency in unknown age category has been distributed proportionately among known ages.
- (3) The frequency of unknown age appearing in the census or survey was zero.
- (4) Other treatment for unknown age category.

7.3 Urban and rural population, and the population of cities

Please indicate below the method used in making intercensal or postcensal estimates of urban, rural, and of city population.

	Urban/rural population	City population
(1) Continuous population registers	<input type="checkbox"/>	<input type="checkbox"/>
(2) Surveys, other than a census	<input type="checkbox"/>	<input type="checkbox"/>
(3) Extrapolation of percentage	<input type="checkbox"/>	<input type="checkbox"/>
(4) Observed rate of growth, assumed to continue	<input type="checkbox"/>	<input type="checkbox"/>
(5) By other means; please describe: Distributive Housing Unit Method	<input type="checkbox"/>	<input checked="" type="checkbox"/>

8. Bibliography of Demographic Statistics

Please list publications that contain results of your latest population census or survey, and current statistics on population estimates:
