### **United Nations Statistics Division: Demographic Yearbook Questionnaire on Population Estimates** Part 2: Metadata

Reporting country: Indonesia Reporting year: 2023

	A 41		4.
1	Author	organi	7atı∩n
••	Addioi	Organn	Lutivii

1. Author organization
Author organization function: Directorate of Population and Labor Statistics
2. Timeliness
Date when the provided population estimates were produced:
Reference dates of the sources of the latest data used to derive these estimates: midyear
3. Periodicity
Calendar of the production of population estimates:
produced annually
⊠ after each census
at the midpoint of intercensal period
☑ other, please specify: after each intercensal survey
4. Status of data
<b>4.1</b> Type of estimation: intercensal, postcensal, other; please specify: postcensal
<b>4.2</b> Data revision status: provisional, provisional revised, final, final revised, other; please specify: final

### 5. Coverage

- **5.1** Please specify the time period covered by time series of the reported population estimates: On September for Population Census 2020 and On June (midyear) for population projection postcensal.
- **5.2** Please specify the territorial coverage of the time series of the reported

population estimates: by regency/municipality for total and by province for urban and rural classification

**5.2.1** In case any areas of the country were not enumerated during the latest population census, are they considered in reported population estimates? Please describe as necessary: All regions are enumerated in Population Census 2020

5.3 Type of population count employed for the re	eported pop	ulation estim	nates:
□ present population (de-facto)			
□ usually resident population			
registered population			
other; please specify:			
5.4 Included or excluded population groups; ple	ease fill out	the below ta	bulation:
In order to clarify the exact composition of the given in this questionnaire, please indicate below the			
Population group	Included	Excluded	Not applicable
(a) Nomads and persons living in areas to which access is difficult	$\boxtimes$		
(b) Civilian residents temporarily absent from the country		If they lived in the country more than one year or equal, then they are excluded	
(c) Civilian foreigners who do not cross a border daily and are in the country temporarily	If they lived in the country more than		

one year or equal, then they are

	included	
(d) Refugees, asylum seekers and internally displaced persons	If they lived in the country more than one year or equal, then they are included	
(e) Military, naval and diplomatic personnel and their families located outside the country	$\boxtimes$	
(f) Foreign military, naval and diplomatic personnel and their families located in the country		
(g) Civilian foreigners who cross a border daily to work in the country		
(h) Civilian residents who cross a border daily to work in another country	$\boxtimes$	
(i) Merchant seafarers and fishers resident in the country but at sea at the time of the latest census	$\boxtimes$	
(j) Homeless or roofless persons, and persons with no concept of usual residence	$\boxtimes$	
(k) Persons living in buildings with restricted access	$\boxtimes$	
(I) Stateless persons	$\boxtimes$	
(m) Other; please specify		$\boxtimes$

## 6. Primary data source (base data)

6 1	Type	of	hase	data:

	(1)	) Continuous	popul	lation	regis	ter
--	-----	--------------	-------	--------	-------	-----

i) population actually enumerated
☐ ii) population adjusted to take account of % underenumeration
(3) Sample survey taken (date)
(4) Partial census taken or partial registration (date)
Please describe method:
(5) Non-censal count of (date)
Please describe method:
(6) Conjectural estimate derived by means other than counting
Please describe method:
<b>6.2 Territorial coverage of base data, please specify:</b> national, province, regency/municipality
6.3 Type of population count employed in base data:
□ present population (de facto)
□ usually resident population
☐ registered population
other, please specify:
7. Method of producing the reported population estimates
7.1 Total population
Estimates of total population of a country may be constructed using several methods. Please indicate by a check mark the method used in constructing the reported population estimates.
7.1.1 Method of time adjustment
$\square$ (1) Population estimates are sourced annually from a population register
$\square$ (2) Applying statistics of births and deaths (natural increase), and migration
☐ (i) Registered vital statistics

☐ (ii) Vital statistics adjusted for incompleteness	
$\hfill \square$ (3) Applying statistics of births and deaths (natural increase), but no account taken of migration	
☐ (i) Registered vital statistics	
☐ (ii) Vital statistics adjusted for incompleteness	
$\square$ (4) Applying an assumed rate of increase, based on:	
$\square$ (i) Assumption with respect to mortality, fertility, migration	
$\hfill \square$ (ii) Assumption with respect to mortality, fertility, but no account taker of migration	1
☐ (iii) Other assumed rate	
Please provide the rate used, and describe how it was obtained:	
(5) No time adjustment (base figure held constant)	
$\boxtimes$ (6) Other; please explain: applying population projection using Population Census as base data and with assumption with respect to mortality, fertility, migration.	
7.2 Population by age and sex	
Estimates of population by age and sex are assumed to be constructed on the same base data as are the total population estimates. However, certain additional factors may affect age distributions estimated from census enumerations or from sample surveys Please indicate below the adjustment(s) made in the basic age distribution used to construct the reported population estimates by age and sex.	у 3.
7.2.1 Adjustments in base data	
$\square$ (1) No adjustments – the calculations are based on population actually enumerated at various ages or estimated from survey results.	
$\square$ (2) Enumerated population or population estimated from survey results adjusted to take account of under enumeration at various ages. Please describe as necessary the methods of adjustment.	
$\boxtimes$ (3) Base age distribution is "smoothed", i.e., adjusted to remove effects of digit preference in age reporting. Please describe as necessary the methods of smoothing.	

# 7.2.2 Method of time adjustment

	Urban/rural	City population
Please indicate below the method used in making of urban, rural, and of city population.	ng intercensal or po	stcensal estimates
7.3 Urban and rural population, and the popula	ation of cities	
(4) Other treatment for unknown age ca	ategory.	
$\boxtimes$ (3) The frequency of unknown age app zero.	earing in the census	or survey was
(2) Frequency in unknown age categor among known ages.	y has been distribute	ed proportionately
(1) An age has been assigned to perso census or sample survey.	ns for whom age did	not appear in the
Please indicate below whether, in the preparation and sex:	n of the population es	stimates by age
7.2.3 Disposition of unknown age		
(7) By other means, please describe:		
(6) Innovative methods that use registe describe as necessary:	rs and administrative	e data. Please
$\boxtimes$ (5) Use of the cohort-components methage and sex	od to produce popul	ation estimates by
(4) Distributing the total estimate accordance age-sex group at time of census of s		f population in
(3) Applying actual or assumed natural	increase alone	
(2) Applying actual or assumed natural	increase and migrat	ion
(1) Population estimates by age and se population register	x are sourced annua	ally from a
Please indicate below the method used in consreported population estimates by age and sex.	tructing the age-sex	distribution of the

	population	
(1) Continuous population registers		
(2) Surveys, other than a census		
(3) Extrapolation of percentage		
(4) Observed rate of growth, assumed to continue	Using Urban Rural Growth Difference (URGD)	
(5) By other means; please describe:		

#### 8. Bibliography of Demographic Statistics

Please list publications that contain results of your latest population census or survey, and current statistics on population estimates:

- Portrait of the Population Census 2020 Towards One Indonesian Population Data
- Official Release of Statistics No. 7/01/Th. XXIV, January 21, 2021: The Result of Indonesia's Population Census 2020
- Statistical Yearbook of Indonesia 2023: Population and Employment Chapter.
- Province in Figures 2023: Population and Employment Chapter.
- Municipality in Figures 2023: Population and Employment Chapter
