United Nations Statistics Division: Demographic Yearbook Questionnaire on Population Estimates Part 2: Metadata

Reporting country: Indonesia Reporting year: 2025

1.	Author organization	

Author organization function: Directorate of Population and Labor Statistics			
2. Timeliness			
Date when the provided population estimates were produced:			
Reference dates of the sources of the latest data used to derive these estimates:			
3. Periodicity			
Calendar of the production of population estimates:			
produced annually			
⊠ after each census			
at the midpoint of intercensal period			
⊠ other, please specify: After each intercensal Population Survey			
4. Status of data			
4.1 Type of estimation: intercensal, postcensal, other; please specify: Postcensal			
4.2 Data revision status: provisional, provisional revised, final, final revised, other; please specify: Final, Final revised			

5. Coverage

- **5.1** Please specify the time period covered by time series of the reported population estimates: on September for Population Census 2020, on June for Long Form Population Census 2020 and on June (midyear) for population projection postcensal
- **5.2** Please specify the territorial coverage of the time series of the reported population estimates: All regions are covered

5.2.1 In case any areas of the country were not enumerated during the latest population census, are they considered in reported population estimates? Please describe as necessary:

5.3 Type of population count employed for the re	eported popu	ulation estim	iates:
present population (de-facto)			
□ usually resident population			
registered population			
other; please specify:			
5.4 Included or excluded population groups; ple	ease fill out t	the below ta	bulation:
In order to clarify the exact composition of the given in this questionnaire, please indicate below t			
Population group	Included	Excluded	Not applicable
(a) Nomads and persons living in areas to which access is difficult	\boxtimes		
(b) Civilian residents temporarily absent from the country		If they absent from the country more than one year or equal, then they are excluded	
(c) Civilian foreigners who do not cross a border daily and are in the country temporarily	If they lived in the country more than one year or equal, then they		

(d) Refugees, asylum seekers and internally

are included

 \boxtimes

displaced persons	If they lived in the country more than one year or equal, then they are included				
(e) Military, naval and diplomatic personnel and their families located outside the country	\boxtimes				
(f) Foreign military, naval and diplomatic personnel and their families located in the country		\boxtimes			
(g) Civilian foreigners who cross a border daily to work in the country					
(h) Civilian residents who cross a border daily to work in another country					
(i) Merchant seafarers and fishers resident in the country but at sea at the time of the latest census					
(j) Homeless or roofless persons, and persons with no concept of usual residence					
(k) Persons living in buildings with restricted access					
(I) Stateless persons	\boxtimes				
(m) Other; please specify			\boxtimes		
6. Primary data source (base data) 6.1 Type of base data:					
(1) Continuous population register					
(2) Complete census taken September 2020 (date)					
i) population actually enumerated					
ii) population adjusted to take account of % underenumeration					
(3) Sample survey taken June 2022 (date)					
(date)					

Please describe method:
(date)
Please describe method:
\square (6) Conjectural estimate derived by means other than counting
Please describe method:
6.2 Territorial coverage of base data, please specify: National, Province, Regency/Municipality
6.3 Type of population count employed in base data:
present population (de facto)
□ usually resident population
☐ registered population
other, please specify:
7. Method of producing the reported population estimates7.1 Total populationEstimates of total population of a country may be constructed using several methods.
Please indicate by a check mark the method used in constructing the reported population estimates.
7.1.1 Method of time adjustment
$\hfill\square$ (1) Population estimates are sourced annually from a population register
$\hfill\square$ (2) Applying statistics of births and deaths (natural increase), and migration
☐ (i) Registered vital statistics
(ii) Vital statistics adjusted for incompleteness
$\hfill \square$ (3) Applying statistics of births and deaths (natural increase), but no account taken of migration
☐ (i) Registered vital statistics
(ii) Vital statistics adjusted for incompleteness

Г] (4) Applying an assumed rate of increase, based on:
	(i) Assumption with respect to mortality, fertility, migration
	$\hfill \square$ (ii) Assumption with respect to mortality, fertility, but no account taken of migration
	☐ (iii) Other assumed rate
	Please provide the rate used, and describe how it was obtained:
	(5) No time adjustment (base figure held constant)
	(6) Other; please explain: applying population projection using Population as base data and with assumption with respect to mortality, fertility, migration.
7.2 Ρορι	lation by age and sex
base da affect a Please	es of population by age and sex are assumed to be constructed on the same ta as are the total population estimates. However, certain additional factors may ge distributions estimated from census enumerations or from sample surveys indicate below the adjustment(s) made in the basic age distribution used to the reported population estimates by age and sex.
7.2.1 Adj	ustments in base data
	(1) No adjustments – the calculations are based on population actually numerated at various ages or estimated from survey results.
a	(2) Enumerated population or population estimated from survey results djusted to take account of under enumeration at various ages. Please describe a necessary the methods of adjustment.
di	(3) Base age distribution is "smoothed", i.e., adjusted to remove effects of git preference in age reporting. Please describe as necessary the methods of moothing.
7.2.2 Me	thod of time adjustment
	ndicate below the method used in constructing the age-sex distribution of the
	population estimates by age and sex.
	population estimates by age and sex. (1) Population estimates by age and sex are sourced annually from a pulation register

(3) Applying actual or assumed natural	(3) Applying actual or assumed natural increase alone				
` '	(4) Distributing the total estimate according to percentage of population in each age-sex group at time of census of sample survey				
\boxtimes (5) Use of the cohort-components meth age and sex	\boxtimes (5) Use of the cohort-components method to produce population estimates by age and sex				
(6) Innovative methods that use registe describe as necessary:	(6) Innovative methods that use registers and administrative data. Please describe as necessary:				
(7) By other means, please describe:	(7) By other means, please describe:				
7.2.3 Disposition of unknown age					
Please indicate below whether, in the preparation and sex:	of the population es	stimates by age			
(1) An age has been assigned to person census or sample survey.	$\hfill \square$ (1) An age has been assigned to persons for whom age did not appear in the census or sample survey.				
(2) Frequency in unknown age category among known ages.	$\ \square$ (2) Frequency in unknown age category has been distributed proportionately among known ages.				
\boxtimes (3) The frequency of unknown age appearing in the census or survey was zero.					
(4) Other treatment for unknown age ca	(4) Other treatment for unknown age category.				
7.3 Urban and rural population, and the population of cities					
Please indicate below the method used in making intercensal or postcensal estimates of urban, rural, and of city population.					
	Urban/rural population	City population			
(1) Continuous population registers					
(2) Surveys, other than a census					
(3) Extrapolation of percentage					
(4) Observed rate of growth, assumed to continue					
(5) By other means; please describe:					

8. Bibliography of Demographic Statistics

Please list publications that contain results of your latest population census or survey, and current statistics on population estimates:

- Indonesia Population Projection 2010-2035
- Indonesia Population Projection 2015-2045 Result of SUPAS 2015
- Indonesia Population Projection 2020-2050 Result of Population Census 2020
- Result of Long Form Population Census 2020 from https://sensus.bps.go.id/
- www.bps.go.id
