### 1. Coverage of data

In order to clarify the exact composition of the population for which estimates were given in this questionnaire, please indicate below the disposition of each group listed. Please also specify the years to which description refers to.

<table>
<thead>
<tr>
<th>Population group</th>
<th>Estimated total population for the following years 2015</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Included</td>
</tr>
<tr>
<td>(a) Nomads</td>
<td></td>
</tr>
<tr>
<td>(b) Persons living in remote areas</td>
<td></td>
</tr>
<tr>
<td>(c) Military, naval and diplomatic personnel and their families located outside the country</td>
<td></td>
</tr>
<tr>
<td>(d) Merchant seamen and fishermen resident in the country but at sea at the time of the census (including those who have no place of residence other than their quarters aboard ship)</td>
<td></td>
</tr>
<tr>
<td>(e) Civilian residents temporarily in another country as seasonal workers</td>
<td></td>
</tr>
<tr>
<td>(f) Civilian residents who cross a frontier daily to work in another country</td>
<td></td>
</tr>
<tr>
<td>(g) Civilian residents other than those in (c), (e), and (f) working in another country</td>
<td></td>
</tr>
<tr>
<td>(h) Civilian residents other than those in (c)-(g), temporarily absent from the country</td>
<td></td>
</tr>
<tr>
<td>(i) Foreign military, naval and diplomatic personnel and their families located in the country</td>
<td>X</td>
</tr>
<tr>
<td>(j) Civilian aliens temporarily in the country as seasonal workers</td>
<td></td>
</tr>
<tr>
<td>(k) Civilian aliens who cross a frontier daily to work in another country</td>
<td></td>
</tr>
<tr>
<td>(l) Civilian aliens other than those in (i), (j), and (k) working in another country</td>
<td></td>
</tr>
<tr>
<td>(m) Civilian aliens other than those in (l)-(l), temporarily in country</td>
<td></td>
</tr>
<tr>
<td>(n) Transients on ships in harbour at the time of the census</td>
<td></td>
</tr>
</tbody>
</table>
2. Method of estimation

2.1 Total population

Estimates of total population for a country as a whole may be constructed by a variety of means. Please indicate by a check mark the method used in constructing the latest population estimate for 2015 (date) indicating the source of "base data" and the "method of time adjustment".

2.1.1 Base Data

☐ (1) Continuous population register

☑ (2) Complete census taken 29-09-2010 (date)
   ☐ i) population actually enumerated
   ☑ ii) population adjusted to take account of 8.24 % underenumeration

☐ (3) Sample survey taken (date)

☐ (4) Partial census taken or partial registration (date)
   (Please describe:)

☐ (5) Non-censal count of (date)
   (Please describe method:)

☐ (6) Conjectural estimate derived by means other than counting
   (Please describe method:)

2.1.2 Method of time adjustment

☐ (1) Base data secured annually through population register

☑ (2) Applying statistics of births and deaths (natural increase), and migration
   ☑ (i) Registered vital statistics
   ☐ (ii) Vital statistics adjusted for incompleteness

☐ (3) Applying statistics of births and deaths (natural increase), but no account taken of migration
   ☐ (i) Registered vital statistics
   ☐ (ii) Vital statistics adjusted for incompleteness
(4) Extrapolating mathematically from censuses taken (date 1), (date 2) and (date 3). Please give formula: 

(5) Applying an assumed rate of increase, not derived by mathematical extrapolation or interpolation but based on: 
- (i) Assumption with respect to mortality, fertility, migration 
- (ii) Assumption with respect to mortality, fertility, but no account taken of migration 
- (iii) Other assumed rate 

Please provide the rate used, and describe how it was obtained: 

(6) No time adjustment (base figure held constant) 

(7) Other (Please explain: ) 

2.2 Population by age and sex 

Estimates of population according to age and sex are assumed to be constructed on the same base data as are the total estimates. However, certain additional factors may affect age distributions estimated from census enumerations or from sample surveys. Please indicate below the adjustment(s) made in the basic age distribution used to construct estimates shown in Tables 2 and 4. 

2.2.1 Adjustments in base 

- (1) No adjustments – the calculations are based on population actually enumerated at various ages or estimated from survey results. 
- (2) Enumerated population or population estimated from survey results adjusted to take account of under enumeration at various ages. 
- (3) Base age distribution is "smoothed", i.e., adjusted to remove effects of digit preference in age reporting. 

2.2.2 Method of time adjustment 

Distribution of estimated population according to age and sex may also be made by same methods as used to obtain the projection of the total figure, or it may be derived by distributing the estimate according to the percentage of population in each age-sex group at time of census. 

Please indicate below the method used in constructing the age-sex distribution of the latest estimate shown in Table 2. 

- (1) Applying actual or assumed natural increase and migration 
- (2) Applying actual or assumed natural increase alone
(3) Distributing the total estimate according to percentage of population in each age-sex group at time of census of sample survey
(4) By other means (Please describe: )

2.2.3 Disposition of unknown age

If frequency in unknown age category of tables 2 and 4 is zero, please indicate below whether, in the preparation of the estimates:

(1) An age has been assigned to persons for whom age did not appear in the census or sample survey.

(2) Frequency in unknown age category has been distributed proportionately among known ages.

(3) The frequency of unknown age appearing in the census or survey was zero.

2.3 Urban and rural population, and the population of cities

Please indicate below the method used in making post-censal estimates of urban and rural, and of city population.

<table>
<thead>
<tr>
<th>Method</th>
<th>Urban/rural population</th>
<th>City population</th>
</tr>
</thead>
<tbody>
<tr>
<td>(1) Continuous population registers</td>
<td>☐</td>
<td>☒</td>
</tr>
<tr>
<td>(2) Surveys, other than a census</td>
<td>☐</td>
<td>☐</td>
</tr>
<tr>
<td>(3) Extrapolation of percentage</td>
<td>☐</td>
<td>☐</td>
</tr>
<tr>
<td>(4) Observed rate of growth, assumed to continue</td>
<td>☐</td>
<td>☐</td>
</tr>
<tr>
<td>(5) By other means (Please describe: )</td>
<td>☐</td>
<td>☐</td>
</tr>
</tbody>
</table>

3. Bibliography of Demographic Statistics

Please list publications that contain results of your latest population census or survey, and current statistics on population estimates:

Fifth Population and Housing Census, Selected Tables 2010
Population Projections 2010-2030
Second Generation Migrants
Mapping Census 2010: Social-Demographic Diversity in Aruba
Profile of Aruba’s children
Family formation and Household Composition on Aruba
ICT in Aruba 2010
Population projections Aruba 2010-2030; the 2014 revision
Profile of the divorced person
The foreign-born population of Aruba
The prevalence of disability in Aruba
Vulnerable groups within the population of Aruba
Life Table Analysis: Mortality experience of the Aruban population, 2010
Census 2010 paper: Ageing on Aruba
Universal Children’s day, 2014, Infographic
World Population Day 2013, Infographic
International Migrants Day 2014, Infographic
Quarterly Demographic Bulletins
