

**Quality of vital statistics obtained from civil registration**

<b>I. Basis of tabulation</b>	Live births	Deaths	Infant deaths	Late foetal deaths	Marriages	Divorces
Present basis of tabulation:						
- date of occurrence	Live births		Infant deaths	Late foetal deaths	Marriages	Divorces
- date of registration		Deaths				
How long has the present basis of tabulation been used?						

<b>II. Estimated completeness of registration</b>	Live births	Deaths	Infant deaths	Late foetal deaths	Marriages	Divorces
100 per cent						
90 - 99 per cent	Live births		Infant deaths	Late foetal deaths	Marriages	Divorces
80 - 89 per cent						
70 - 79 per cent		Deaths				
60 - 69 per cent						
50 - 59 per cent						
Under 50 per cent						
Please specify:						
(a) Year(s) to which completeness estimate refers	2019	2019	2019	2019	2019	2019
(b) Basis of completeness estimate						
-Demographic analysis						
-Dual record check	Live births	Deaths	Infant deaths	Late foetal deaths	Marriages	Divorces
-Questions in population census						
-Questions in sample surveys						
-Other (specify)						
-No evaluation						

Please include any reports describing completeness of registration and methods used in arriving at estimated completeness:

**Quality of vital statistics obtained from other sources**

<b>Basis of vital statistics estimates is</b>						
- Population censuses (date)						
- Sample surveys	X	X				
- Population registers			X	X		
- Dual record systems					X	X
- Other (specify)						

Please include any reports describing the methods used for estimates of vital statistics based on other sources than civil registration:

Additional metadata for selected tables

**Table 1.1 - Urban / rural definitions**

Please state the definition used for urban area and the period of time it has been in use:	Urban area: the area within the boundaries of municipalities or within the boundaries of the capital
Please state the definition used for rural area and the period of time it has been in use:	Rural area: the area that lies outside the boundaries of the municipalities and outside the borders of the capital

**Table 1.6 - Grounds for legally induced abortion**

<i>Please mark with an "X" the applicable options</i>	X	
a) Continuance of pregnancy would involve risk to the life of the pregnant woman greater than if the pregnancy were terminated.	X	
b) Continuance of pregnancy would involve risk of injury to the physical health of the pregnant woman greater than if pregnancy were terminated.	X	
c) Continuance of pregnancy would involve risk of injury to the mental health of the pregnant woman greater than if pregnancy were terminated.	X	
d) Continuance of pregnancy would involve risk of injury to the mental or physical health of the pregnant woman greater than if pregnancy were terminated.	X	
e) There is a substantial risk that if the child were born it would suffer from such physical or mental abnormalities as to be seriously handicapped.	X	
f) Other, please specify.		

**Tables 14a, 14b, 15a and 15b - Life tables**

Do the life tables refer to de Facto population or de Jure population?	de Facto	
Was any method used to smoothen the life table? Which one?	Strong	
Was any specific method used to close the life table at older ages (e.g., Gompertz, Makeham, etc.)? Which one?	Gompertz	
If any model life table or relational model was used to derive the life table (e.g., Coale-Demeny West, UN South Asian pattern), what model was used?	Coale-Demeny West	
<i>Please mark with an "X" the applicable options</i>	X	
What source of data was used to compute the life tables?		
a) Unadjusted vital registration deaths		
b) Adjusted vital registration deaths		
c) Information on deaths from census		
d) Life expectancy at birth		
e) Under-five mortality		
f) Infant mortality	X
