

Quality of vital statistics obtained from civil registration

I. Basis of tabulation	Live births	Deaths	Infant deaths	Late foetal deaths	Marriages	Divorces
Present basis of tabulation:						
- date of occurrence	31/DES2015	31/DES2015	1jan2012	_	2015	2015
- date of registration	31/DES2015	31/DES2015		_		
How long has the present basis of tabulation been used?				_		

II. Estimated completeness of registration	Live births	Deaths	Infant deaths	Late foetal deaths	Marriages	Divorces
100 per cent				_	100	100
90 - 99 per cent	98			_		
80 - 89 per cent				_		
70 - 79 per cent				_		
60 - 69 per cent		65		_		
50 - 59 per cent				_		
Under 50 per cent				_		
Please specify:						
(a) Year(s) to which completeness estimate refers						
(b) Basis of completeness estimate		2015				
-Demographic analysis		2015				
-Dual record check		_				
-Questions in population census		2015			2015	2015
-Questions in sample surveys	adhoc survey	_	2012			
-Other (specify)		_				
-No evaluation						

Please include any reports describing completeness of registration and methods used in arriving at estimated completeness:

Quality of vital statistics obtained from other sources

Basis of vital statistics estimates is						
- Population censuses (date)						
- Sample surveys	DHS Survey 2012	_	DHS Survey 2012	_	_	_
- Population registers	_	_	_	_	_	_
- Dual record systems	_	_	_	_	_	_
- Other (specify)	_	_	_	_	_	_

Please include any reports describing the methods used for estimates of vital statistics based on other sources than civil registration:

**Additional metadata for selected tables**

**Table 1.1 - Urban / rural definitions**

Please state the definition used for urban area and the period of time it has been in use:	Urban* includes localities of (5000) or more Population as were defined in the 2004 census.
Please state the definition used for rural area and the period of time it has been in use:	Rural includes localities of less than (5000) Population as were defined in the 2004 census.

**Table 1.6 - Grounds for legally induced abortion**

<i>Please mark with an "X" the applicable options</i>	X				
a) Continuance of pregnancy would involve risk to the life of the pregnant woman greater than if the pregnancy were terminated.	x		Data not available		
b) Continuance of pregnancy would involve risk of injury to the physical health of the pregnant woman greater than if pregnancy were terminated.	x		Data not available		
c) Continuance of pregnancy would involve risk of injury to the mental health of the pregnant woman greater than if pregnancy were terminated.	x		Data not available		
d) Continuance of pregnancy would involve risk of injury to the mental or physical health of the pregnant woman greater than if pregnancy were terminated.	x		Data not available		
e) There is a substantial risk that if the child were born it would suffer from such physical or mental abnormalities as to be seriously handicapped.	x		Data not available		
f) Other, please specify.					

**Tables 14a, 14b, 15a and 15b - Life tables**

Do the life tables refer to de Facto population or de Jure population?	De Jure				
Was any method used to smoothen the life table? Which one?	WE USED UN MODEL LIFE TABLE				
Was any specific method used to close the life table at older ages (e.g., Gompertz, Makeham, etc.)? Which one?	COALE- DEMENY STANDARD Technique				
If any model life table or relational model was used to derive the life table (e.g., Coale-Demeny West, UN South Asian pattern), what model was used?	WE USED East Model COALE- DEMENY				
<i>Please mark with an "X" the applicable options</i>	X				
What source of data was used to compute the life tables?	x		DHS Survey.q0.q1-5		
a) Unadjusted vital registration deaths	x		indirect technique		
b) Adjusted vital registration deaths	x		Bristen cool methued		
c) Information on deaths from census					
d) Life expectancy at birth	x		DHS Survey2012		
e) Under-five mortality	x		DHS Survey2012		
f) Infant mortality	x		DHS Survey2012
