

Quality of vital statistics obtained from civil registration

I. Basis of tabulation	Live births	Deaths	Infant deaths	Late foetal deaths	Marriages	Divorces
Present basis of tabulation:						
- date of occurrence	x	x	x		x	x
- date of registration	x	x	x		x	x
How long has the present basis of tabulation been used?						

II. Estimated completeness of registration	Live births	Deaths	Infant deaths	Late foetal deaths	Marriages	Divorces
90 per cent or more	x	x	x			
75-89 per cent						
50-74 per cent						
Under 50 per cent						
Please specify:						
(a) Year(s) to which completeness estimate refers	2010	2010	2010			
(b) Basis of completeness estimate						
-Demographic analysis						
-Dual record check						
-Questions in population census						
-Questions in sample surveys						
-Other (specify)	sample checking completeness of registration of newborn and dead					
-No evaluation						

Please include any reports describing completeness of registration and methods used in arriving at estimated completeness:

--

Quality of vital statistics obtained from other sources

Basis of vital statistics estimates is						
- Population censuses (date)						
- Sample surveys						
- Population registers						
- Dual record systems						
- Other (specify)	x	x	x		x	x

Please include any reports describing the methods used for estimates of vital statistics based on other sources than civil registration:

Registry documents on birth, death, marriages and divorces compiling by civil registry offices.

Additional metadata for selected tables

Table 1.1 - Urban / rural definitions

Please state the definition used for urban area and the period of time it has been in use:	Urban population - population living in urban settlements. Urban settlements are settlements approved by Jogorku Kenesh (Parliament of the republic) as towns and settlements of urban type.
Please state the definition used for rural area and the period of time it has been in use:	Rural population- population living in rural settlements. Rural settlements are settlements not classified as urban.

Table 1.6 - Grounds for legally induced abortion

<i>Please mark with an "X" the applicable options</i>	X	
a) Continuance of pregnancy would involve risk to the life of the pregnant woman greater than if the pregnancy were terminated.		
b) Continuance of pregnancy would involve risk of injury to the physical health of the pregnant woman greater than if pregnancy were terminated.		
c) Continuance of pregnancy would involve risk of injury to the mental health of the pregnant woman greater than if pregnancy were terminated.		
d) Continuance of pregnancy would involve risk of injury to the mental or physical health of the pregnant woman greater than if pregnancy were terminated.		
e) There is a substantial risk that if the child were born it would suffer from such physical or mental abnormalities as to be seriously handicapped.		
f) Other, please specify.		

Tables 14a, 14b, 15a and 15b - Life tables

Do the life tables refer to de Facto population or de Jure population?	Annual average number of resident population
Was any method used to smoothen the life table? Which one?	was not used
Was any specific method used to close the life table at older ages (e.g., Gompertz, Makeham, etc.)? Which one?	was not used
If any model life table or relational model was used to derive the life table (e.g., Coale-Demeny West, UN South Asian pattern), what model was used?	full mortality table
<i>Please mark with an "X" the applicable options</i>	X
What source of data was used to compute the life tables?	The source of mortality table is annual average number of resident population and number of dead by age and sex.
a) Unadjusted vital registration deaths	-
b) Adjusted vital registration deaths	x
c) Information on deaths from census	-
d) Life expectancy at birth	x
e) Under-five mortality	x
f) Infant mortality	x
