<tr>
<td>75-89 per cent</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>50-74 per cent</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Under 50 per cent</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Please specify:

(a) Year(s) to which completeness estimate refers
(b) Basis of completeness estimate

- Demographic analysis
- Dual record check
- Questions in population census
- Questions in sample surveys

- Other (specify) see file "Note VT statistics basis.doc" 
- No evaluation

Please include any reports describing completeness of registration and methods used in arriving at estimated completeness:

Please include any reports describing the methods used for estimates of vital statistics based on other sources than civil registration:
Table 1.1 - Urban / rural definitions

| Please state the definition used for urban area and the period of time it has been in use: | Urban area - municipality with the status of city assigned by the Ministry of Interior (there are 138 urban municipalities in the Slovak Republic). |
| Please state the definition used for rural area and the period of time it has been in use: | Rural area - the rest of municipalities (without the status of city) |

Table 1.6 - Grounds for legally induced abortion

Please mark with an "X" the applicable options

| Please mark with an "X" the applicable options | X |
| a) Continuance of pregnancy would involve risk to the life of the pregnant woman greater than if the pregnancy were terminated. | x |
| b) Continuance of pregnancy would involve risk of injury to the physical health of the pregnant woman greater than if pregnancy were terminated. | x |
| c) Continuance of pregnancy would involve risk of injury to the mental health of the pregnant woman greater than if pregnancy were terminated. | x |
| d) Continuance of pregnancy would involve risk of injury to the mental or physical health of the pregnant woman greater than if pregnancy were terminated. | x |
| e) There is a substantial risk that if the child were born it would suffer from such physical or mental abnormalities as to be seriously handicapped. | x |
| f) Other, please specify. | |

Tables 14a, 14b, 15a and 15b - Life tables

| Do the life tables refer to de Facto population or de Jure population? | de Jure population |
| Was any method used to smoothen the life table? Which one? | no |
| Was any specific method used to close the life table at older ages (e.g., Gompertz, Makeham, etc.)? Which one? | Compertz – Makeham formula |
If any model life table or relational model was used to derive the life table (e.g., Coale-Demeny West, UN South Asian pattern), what model was used?

Please mark with an "X" the applicable options

What source of data was used to compute the life tables?

- a) Unadjusted vital registration deaths
- b) Adjusted vital registration deaths
- c) Deaths census information
- d) Life expectancy at birth
- e) Under-five mortality
- f) Infant mortality
