

Quality of vital statistics obtained from civil registration

| I. Basis of tabulation                                  | Live births | Deaths    | Infant deaths | Late foetal deaths | Marriages | Divorces  |
|---|-------------|-----------|---------------|--------------------|-----------|-----------|
| Present basis of tabulation:                            |             |           |               |                    |           |           |
| - date of occurrence                                    |             |           |               |                    |           |           |
| - date of registration                                  | x           | x         | x             | x                  | x         | x         |
| How long has the present basis of tabulation been used? | from 1959   | from 1959 | from 1959     | from 1959          | from 1959 | from 1959 |

| II. Estimated completeness of registration        | Live births | Deaths | Infant deaths | Late foetal deaths | Marriages | Divorces |
|---|-------------|--------|---------------|--------------------|-----------|----------|
| 90 per cent or more                               | x           | x      | x             | x                  | x         | x        |
| 75-89 per cent                                    |             |        |               |                    |           |          |
| 50-74 per cent                                    |             |        |               |                    |           |          |
| Under 50 per cent                                 |             |        |               |                    |           |          |
| Please specify:                                   |             |        |               |                    |           |          |
| (a) Year(s) to which completeness estimate refers |             |        |               |                    |           |          |
| (b) Basis of completeness estimate                |             |        |               |                    |           |          |
| -Demographic analysis                             |             |        |               |                    |           |          |
| -Dual record check                                |             |        |               |                    |           |          |
| -Questions in population census                   |             |        |               |                    |           |          |
| -Questions in sample surveys                      |             |        |               |                    |           |          |
| -Other (specify)                                  |             |        |               |                    |           |          |
| -No evaluation                                    | x           | x      | x             | x                  | x         | x        |

Please include any reports describing completeness of registration and methods used in arriving at estimated completeness:

**Additional metadata for selected tables**

**Table 1.1 - Urban / rural definitions**

|  |  |
|--|--|
| Please state the definition used for urban area and the period of time it has been in use: | Urban settlements - settlements determined by legal acts as cities and settlements of urban type. All other settlements are recognized as rural. |
| Please state the definition used for rural area and the period of time it has been in use: | Rural settlements - villages and settlements of rural type regardless of their administrative subordination.                                     |

**Table 1.6 - Grounds for legally induced abortion**

|  |   |  |
|--|---|--|
| <i>Please mark with an "X" the applicable options</i>  | X |  |
| a) Continuance of pregnancy would involve risk to the life of the pregnant woman greater than if the pregnancy were terminated.                            |   |  |
| b) Continuance of pregnancy would involve risk of injury to the physical health of the pregnant woman greater than if pregnancy were terminated.           |   |  |
| c) Continuance of pregnancy would involve risk of injury to the mental health of the pregnant woman greater than if pregnancy were terminated.             |   |  |
| d) Continuance of pregnancy would involve risk of injury to the mental or physical health of the pregnant woman greater than if pregnancy were terminated. |   |  |
| e) There is a substantial risk that if the child were born it would suffer from such physical or mental abnormalities as to be seriously handicapped.      |   |  |
| f) Other, please specify.  |   |  |

**Tables 14a, 14b, 15a and 15b - Life tables**

|   |                     |
|---|---------------------|
| Do the life tables refer to de Facto population or de Jure population?  | Resident population |
| Was any method used to smoothen the life table? Which one?  | No                  |
| Was any specific method used to close the life table at older ages (e.g., Gompertz, Makeham, etc.)? Which one?  | No                  |
| If any model life table or relational model was used to derive the life table (e.g., Coale-Demeny West, UN South Asian pattern), what model was used? | No                  |

|  |   |  |
|--|---|--|
|  |   |  |
| <i>Please mark with an "X" the applicable options</i>    | X |  |
| What source of data was used to compute the life tables? |   |  |
| a) Unadjusted vital registration deaths                  |   |  |
| b) Adjusted vital registration deaths                    |   |  |
| c) Deaths census information                             | x |  |
| d) Life expectancy at birth                              |   |  |
| e) Under-five mortality                                  |   |  |
| f) Infant mortality                                      |   |  |
