35 Data refers to resident population adjusted for the undercount of 18 per cent and including the institutional population.

36 Based on the results of the 2016 Population Census.

37 To ensure confidentiality, the values, including totals are randomly rounded either up or down to a multiple of '5' or '10.' As a result, when these data are summed or grouped, the total value may not match the individual values since totals and sub-totals are independently rounded. Similarly, percentages, which are calculated on rounded data, may not necessarily add up to 100%.

38 Adjusted for census net undercoverage (including adjustment for incompletely enumerated Indian reserves).

39 Preliminary postcensal estimates.

40 Estimates are based on 2016 population census counts.

41 The source of data is the national household survey.

42 Data refer to national projections based on 2007 census.

- 43 Source: El Salvador National Population Estimates and Projections 2005-2050 (2021 revision).
- 44 Population statistics are compiled from registers.
- 45 Excluding data for Saint Barthélemy and Saint Martin.
- 46 Projections based on the 2013 Population Census.
- 47 The figures represent the census counts adjusted for under-coverage. Adjustments are done by applying weights calculated (to 4 decimal places) for each sex and age group to the enumerated population when the tabulations are produced. Minor discrepancies between totals and the sum of the component parts of a table and minor discrepancies between the totals across tables are due to rounding after weights are applied.
- 48 Including an estimation of 6 337 751 persons corresponding to 1 588 422 housing units without information of the occupants.
- 49 The population projections of CONAPO (National Population Council).
