Department of Economic and Social Affairs

The Department of Economic and Social Affairs of the United Nations is a vital interface between global policies in the economic, social and environmental spheres and national action. The Department works in three main interlinked areas: (i) it compiles, generates and analyses a wide range of economic, social and environmental data and information on which United Nations Member States draw to review common problems and to take stock of policy options; (ii) it facilitates the negotiations of Member States in many intergovernmental bodies on joint courses of action to address ongoing or emerging global challenges; and (iii) it advises interested Governments on the ways and means of translating policy frameworks developed in United Nations conferences and summits into programmes at the country level and, through technical assistance, helps build national capacities.

Note

Symbols of United Nations documents are composed of capital letters combined with figures. Mention of such a symbol indicates reference to a United Nations document. The designations employed and the presentation of material in this publication do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area, or of its authorities, or concerning the delimitation of its frontiers or boundaries. Where the designation "country or area" appears in the headings of tables, it covers countries, territories, or areas.

INTRODUCTION

This issue of the *Population and Vital Statistics Report* presents data for countries or areas¹ on population size (total, male, and female) from the latest available census, estimated total population size for 2021 or 2022 (the later available year), and the number and rate of vital events (live births, deaths, and infant deaths) for the latest available year within the past 15 years (2008-2022). These data are presented as reported by national statistical authorities to the *Demographic Yearbook* of the Statistics Division of the United Nations Department of Economic and Social Affairs.² This issue also presents population estimates for 2021 and 2022 of the world and its major areas and regions¹. These estimates were prepared by the Population Division of the United Nations Department of Economic and Social Affairs.³ The data described in this paragraph are presented in three tables:

Table 1. Estimated mid-year population by major area and region, 2021 and 2022

Table 2. Population, latest available census and estimates for 2021 or 2022

Table 3. Live births, deaths, and infant deaths, latest available year within the past 15 years (2008-2022)

TECHNICAL NOTES

A. Population

Population estimates for 2021 and 2022 for the world and its major areas and regions (table 1) refer to 1 July of the given year, and are produced by the United Nations Population Division.³

Latest population census figures for countries or areas (table 2) refer to the given date, and are presented as reported by national statistical authorities to the *Demographic Yearbook* of the United Nations Statistics Division. The data are from national population and housing censuses. These censuses use different methods of enumeration: traditional, based on administrative/population registers, or a combination of methods that may include a sample survey.⁴ The censuses are conducted on either a *de facto* or a *de jure* basis, as indicated in the column "Code." The *de facto* population consists of all persons who are physically present in the country or area at the reference date, whether or not they are usual residents. The *de jure* population consists of all usual residents, whether or not they are present at the time of the enumeration. Population census data are presented for 240 countries or areas that conducted a census during the period 1960-2022.

Mid-year population estimates for 2021 or 2022 for countries or areas (table 2) refer to 1 July of the given year unless otherwise stated, and are presented as reported by national statistical authorities to the *Demographic Yearbook* of the United Nations Statistics Division. They are also coded as either *de jure* or *de facto*, since for some countries or areas the code is not the same as for the census figure.

B. Vital statistics

Table 3 presents data for countries or areas on live births, deaths, and infant deaths (excluding foetal deaths) for the latest available year within the last 15 years (2008-2022). The data usually refer to vital events that *occurred* in the specified year, even if some were registered later. In some countries or areas, however, they refer to events that were *registered* in the specified year, and, therefore, include some events that occurred previously, and exclude some events that occurred in the specified year but that were or will be registered later. In this case, the symbol "+" is displayed in the column "Code."

Most of the vital statistics data presented in table 3 are from national civil registration systems. These systems differ markedly in the completeness of the data that they produce. If the country or area reports to the *Demographic Yearbook* its

¹ In table 1 of this report "countries or areas" are grouped geographically into 21 "regions" (for example, Central America), which are then grouped into six "major areas" (for example, Latin America and the Caribbean). In tables 2 and 3 they are listed by six continents (Africa; America, North; America, South; Asia; Europe; Oceania).

² Data on these and many other demographic statistics are maintained and continuously updated in the *Demographic Yearbook* database. A small selection of demographic statistics are published annually as the *Population and Vital Statistics Report*, and a much larger selection of data, including complementary technical notes, are published annually as the *Demographic Yearbook*. The *Demographic Yearbook* is also available online, at: <http://unstats.un.org/unsd/demographic/products/dyb/default.htm>.

³ United Nations, Department of Economic and Social Affairs, Population Division (2022). *World Population Prospects 2022*.

⁴ If the census method of enumeration is not traditional, the type of method is indicated in a footnote to the census date in the table.

own estimate of the completeness of its civil registration data, then this estimate is classified in the column “Code” as follows: “C” indicates virtually complete data (that is, representing 90 per cent or more of the events occurring in the specified year); and “U” indicates incomplete data (that is, less than 90 per cent of the events). Data not derived from civil registration - usually official estimates from censuses, sample surveys or demographic analyses - that are assumed reliable are indicated by “|”.

The table shows both the number of vital events and the rates at which they occur. *Crude birth and death rates* are the number of live births and (total) deaths, respectively, per thousand persons in the same year. The denominators of these rates are the estimates of mid-year population as reported by national statistical authorities to the *Demographic Yearbook*. The *infant mortality rate* is the number of deaths of persons less than one year of age per thousand live births in the same year. Unless otherwise stated, the rates shown were computed by the United Nations Statistics Division. Rates were only computed when the numerator - the number of vital events - is at least 30 and when the denominator (mid-year population or the number of live births) is available for the same year. Furthermore, rates were computed only if the code for vital events (see the previous paragraph) is “C” or “|”.

C. Symbols

The following symbols and notations are used:

...	Data or information not available/rates not computed
-	Magnitude zero
*	Provisional figure
+	Data tabulated by year of registration rather than occurrence
C	Civil registration, estimated 90 per cent or more complete
U	Civil registration, estimated less than 90 per cent complete
	Source other than civil registration, estimated reliable
DF	Population de facto
DJ	Population de jure
SSDF	Sample survey, population de facto
SSDJ	Sample survey, population de jure

D. Highlights

1. Population censuses

One goal of this report is to present the most recent data for total, male, and female population collected by a national population census. In the majority of cases, national population censuses are carried out once every ten years, that is, once every census round. A census round, as defined and implemented by the United Nations, encompasses ten years starting with the fifth year of a decade and ending in the fourth year of the next decade. The 2020 census round started on 1 January 2015 and will end on 31 December 2024, whereas the 2010 census round started on 1 January 2005 and ended on 31 December 2014. Detailed information on planned or conducted national population censuses is collected by the United Nations Statistics Division and presented at: <http://unstats.un.org/unsd/demographic/sources/census>

The latest available census figures for total population (for 1960-2022) are given in this publication for 240 countries or areas, whenever available disaggregated by sex. Of these figures, 110 (46 per cent) refer to the current 2020 round (2015-2024), 113 (47 per cent) refer to the 2010 census rounds (2005-2014), 10 (4 per cent) refer to the 2000 census round (1995-2004), 2 (1 per cent) refer to the 1990 census round (1985-1994), and 5 (2 per cent) refer to the 1980 or previous census rounds.

2. Vital statistics

The main source of vital statistics is civil registration. “Civil registration is defined as the continuous, permanent, compulsory and universal recording of the occurrence and characteristics of vital events pertaining to the population, as provided through decree or regulation in accordance with the legal requirements in each country.”⁵ The availability of detailed vital statistics for a country or area illustrates national capacity in the compilation of these statistics from civil registration systems. This report aims to present the most recent data for the period 2008-2022 on live births, deaths, and infant deaths

⁵ *Principles and Recommendations for a Vital Statistics System, Revision 3*, Sales No.E.13.XVII.10, United Nations, New York, 2014.

reported to the *United Nations Demographic Yearbook*.

Out of 240 countries or areas, the latest available figure for live births refers to year 2015 or later for 192 countries or areas (80 per cent); to years 2008-2014 for 18 countries or areas (8 per cent) and no data for live births are available for 30 countries or areas (or 12 per cent) for the period 2008-2022. The availability of data on (total) deaths is similar. However, recent data on infant deaths are somewhat less available: Data of 158 countries or areas (or 66 per cent) refer to years 2015 or later, 18 (or 7 per cent) to 2008-2014, and 64 countries or areas (or 27 per cent) did not report data on infant deaths for the period 2008-2022.

italic Estimates that are less reliable

a "Code" indicates the source of data, as follows:

DF De facto

DJ De jure

SSDF Sample survey, de facto

SSDJ Sample survey, de jure

◆ Data refer to 2021

1 Total resident population including common and collective households of nomadic population, and population counted separately.

2 Postcensal estimates.

3 Based on the results of the 2011 Population Census.

4 Data refer to national projections.

5 Source: Population projections and estimates of priority targets for the various health programs and interventions, National Institute of Statistics (2016).

6 Excluding Mayotte.

7 Based on the results of the 2014 Population Census.

8 Data refer to usual resident population.

9 Estimates or projections based on the 2015 population census.

10 Source: The 1984 Population and Housing Census of Ethiopia (Analytical Report at National Level).

11 Estimates based on the 2000 quick population count results and 1995, 2002 and 2010 Eritrea Demographic and Health Surveys.

12 Estimates considering also the results of the 2007 Population Census.

13 Population in households only.

14 Data are projections taking into consideration also the results of the 2019 census.

15 The figure for both sexes includes intersex persons.

16 Data are projections based on the 2016 Population Census.

17 Data refer to Libyan nationals only.

18 Data refer to projections based on the 2018 Population Census.

19 Including nomadic population.

20 Excludes the islands of St. Brandon and Agalega.

21 Data from the main operation.

22 Data refer to 1 January.

23 Projections based on the results of national survey on population and health conducted between 2010 and 2011, and especially population and housing census 2014.

24 Data refer to national projections based on 2017 census.

25 Projections based on the 2012 Population Census.

26 Source: National Population Commission.

27 Data refer to Saint Helenian resident population.

28 Data are de facto Census counts that have been adjusted for age and sex errors.

29 Data have not been adjusted for underenumeration, estimated at 7 per cent.

30 Comprising the Northern Region (former Saguia el Hamra) and Southern Region (former Rio de Oro).

31 Data based on the 2010 Population Census.

32 Data refer to 18 August.

33 Data refers to resident population adjusted for the undercount of 18 per cent and including the institutional population.

34 Data refer to 31 December.

35 Based on the results of the 2016 Population Census.

36 To ensure confidentiality, the values, including totals are randomly rounded either up or down to a multiple of '5' or '10.' As a result, when these data are summed or grouped, the total value may not match the individual values since totals and sub-totals are independently rounded. Similarly, percentages, which are calculated on rounded data, may not necessarily add up to 100%.

37 Adjusted for census net undercoverage (including adjustment for incompletely enumerated Indian reserves).

38 Preliminary postcensal estimates.

39 Estimates are based on 2016 population census counts.

40 Total includes unknown sex.

41 The source of data is the national household survey.

42 Data refer to national projections based on 2007 census.

43 Source: El Salvador National Population Estimates and Projections 2005-2050 (2021 revision).

44 Population statistics are compiled from registers.

45 Excluding data for Saint Barthélemy and Saint Martin.

46 Projections based on the 2013 Population Census.

47 The figures represent the census counts adjusted for under-coverage. Adjustments are done by applying weights calculated (to 4 decimal places) for each sex and age group to the enumerated population when the tabulations are produced. Minor discrepancies between totals and the sum of the component parts of a table and minor discrepancies between the totals across tables are due to rounding after weights are applied.

48 Including an estimation of 6 337 751 persons corresponding to 1 588 422 housing units without information of the occupants.

49 The population projections of CONAPO (National Population Council).

50 Including armed forces stationed in the area.

51 Excluding the institutional population.

52 Data refer to the resident population for the 50 states and the District of Columbia.

53 Data refer to resident population.

54 Excluding U.S. Armed Forces overseas and civilian U.S. citizens whose usual place of residence is outside the United States.

55 Source: U.S. National Center for Health Statistics, National Vital Statistics Reports (NVSR).

56 Data refer to 30 June.

57 Projection of the population of Brazil and Federation Units by sex and age for the period 2010-2060.

58 Data include persons in remote areas, military personnel outside the country, merchant seamen at sea, civilian seasonal workers outside the country, and other civilians outside the country, and exclude nomads, foreign military, civilian aliens temporarily in the country, transients on ships and Indian jungle population.

59 Data are revised projections taking into consideration also the results of the 2018 census.

60 Excludes nomadic Indian tribes.

61 Population projections based on information available up to 2020.

62 A dispute exists between the governments of Argentina and the United Kingdom of Great Britain and Northern Ireland concerning sovereignty over the Falkland Islands (Malvinas).

63 Figures for male and female may not add up to the total, since they do not include the category "Unknown".

64 Estimates or projections considering also the results of the 2012 Population Census.

65 Data have not been adjusted for underenumeration and exclude an estimated population of 1,855,501 at the national level.

66 Source: INEI – National population estimates and projections.

67 Figures for male and female population do not add up to the figure for total population, because they exclude 108 homeless people of unknown sex.

68 Data refer to the settled population based on the 1979 Population Census and the latest household prelisting. The refugees of Afghanistan in Iran, Pakistan, and an estimated 1.5 million nomads, are not included.

69 Excluding nomad population.

70 Data have been adjusted for underenumeration.

71 Figures for male and female may not add up to the total, since the total includes 12629 Hijra (transgender) and 85957 balance of population.

72 Excluding 8408 non-Bhutanese/tourists found in hotels on the census reference day.

73 Data refer to 30 May.

74 Estimates or projections based on the 2017 Population Census.

75 Data based on the 2019 Population Census.

76 For statistical purposes, the data for China do not include those for the Hong Kong Special Administrative Region (Hong Kong SAR), Macao Special Administrative Region (Macao SAR) and Taiwan province of China.

77 Data have been estimated on the basis of the annual National Sample Survey on Population Changes.

78 Data refer to Hong Kong resident population at the census moment, which covers usual residents and mobile residents. Usual residents refer to two categories of people: (1) Hong Kong permanent residents who had stayed in Hong Kong for at least three months during the six months before or for at least three months during the six months after the census moment, regardless of whether they were in Hong Kong or not at the census moment; and (2) Hong Kong non-permanent residents who were in Hong Kong at the census moment. Mobile Residents, they are Hong Kong permanent residents who had stayed in Hong Kong for at least one month but less than three months during the six months before or for at least one month but less than three months during the six months after the census moment, regardless of whether they were in Hong Kong or not at the census moment.

79 Data refer to government controlled areas.

80 Includes data for the Indian-held part of Jammu and Kashmir, the final status of which has not yet been determined.

81 Data are projections based on the 2011 Population Census.

82 Data are based on Indonesia population census of 2020 and from interim population projection 2020-2023.

83 Data refer to the Iranian Year which begins on 21 March and ends on 20 March of the following year.

84 Excluding the population in three autonomous provinces in the north of the country.

85 Because of rounding, totals are not in all cases the sum of the respective components.

86 Includes data for East Jerusalem and Israeli residents in certain other territories under occupation by Israeli military forces since June 1967.

87 Data are rounded for confidentiality reasons.

88 Data refer to Israeli citizens and permanent residents who are listed in the Population Register.

89 Excluding diplomatic personnel outside the country and foreign military and civilian personnel and their dependants stationed in the area.

90 For the 2020 census, urban areas are "Densely Inhabited Districts", defined as areas within a municipality that is composed of a group of contiguous Basic Unit Blocks, each of which has a population density of 4,000 inhabitants or more per square kilometer and whose total population exceeds 5,000 as of 1 October 2020. The detailed methodological explanation is available at <https://www.stat.go.jp/english/data/chiri/did/1-1.html>

91 Estimates or projections based on the 2020 population census.

92 Excluding data for Jordanian territory under occupation since June 1967 by Israeli military forces.

93 Source: Living conditions of household survey, October 2011 to September 2012.

94 Estimates based on the results of 2020 census.

95 Data refer to resident population which includes resident Maldivians and resident foreigners.

96 The total for the whole country includes 1,206,353 persons estimated not to have been counted in parts of States of Rakhine, Kachin and Kayin.

97 Data refer to 1 October.

98 Data refer to registered population data from Royal Oman Police.

99 E-census data based 100% on administrative registers.

100 Data from national registration system.

101 Excluding data for the Pakistan-held part of Jammu and Kashmir, the final status of which has not yet been determined.

102 Data include both Koreans and foreigners. De jure residence refers to expected length of stay of more than three months.

103 Based on the results of the 2022 Population Census.

104 Data refer to resident population which comprises Singapore citizens and permanent residents.

105 Data are based on the latest register-based population estimates for 2020.

106 Data refer to total population, which comprises Singapore residents and non-residents. Data exclude residents who have been away from Singapore for a continuous period of 12 months or longer as at the reference date.

107 Including Palestinian refugees.

108 Data based on Address Based Population Registration System.

109 Data include non-national population.

110 Statistics are compiled from registers.

111 Based on the results of the 2021 Population Census.

112 Excluding Faroe Islands and Greenland shown separately, if available.

113 Excluding diplomatic personnel outside the country and including members of alien armed forces not living in military camps and foreign diplomatic personnel not living in embassies or consulates.

114 Excluding military personnel, visitors and transients.

115 Data refer to 31 March.

116 Data refer to the Vatican City State.

117 The population figure is 466 persons.

118 Data refer to registered resident population.

119 Data refer to 31 May.

120 Including civilian nationals temporarily outside the country.

121 Including residents temporarily outside the country.

122 Tiraspol, Bender, Slobozia, Ribnita, Camenca Yrigoricpol/Grigoriopol are districts from Transnistria where the census was not conducted.

123 Data refer to usual resident population based on the 2014 Census. Without the data on districts from the left side of the river Nistru and municipality Bender.

124 Information provided by the Russian Federation. Includes statistical data for the Autonomous Republic of Crimea and the city of Sevastopol, Ukraine, temporarily occupied by the Russian Federation.

125 Excludes data for Kosovo and Metohia.

126 Fully register based census.

-
- 127 Inhabited only during the winter season. The Norwegian population of these islands is included also in the de jure population of Norway.
- 128 Data refer to the permanent resident population at the main place of residence.
- 129 Data refer to legal resident population.
- 130 The Government of Ukraine has informed the United Nations that it is not in a position to provide statistical data concerning the Autonomous Republic of Crimea and the city of Sevastopol.
- 131 Excluding Channel Islands (Guernsey and Jersey) and Isle of Man, shown separately, if available.
- 132 Including population in off-shore, migratory and shipping.
- 133 Data in this table have been randomly adjusted to avoid the release of confidential data. No reliance should be placed on small numbers. Urban/Rural areas are based on Australian Statistical Geography Standard (ASGS): Volume 3. Urban includes Major Urban and Other Urban. Rural includes Bounded Locality Areas and Rural Balance.
- 134 Updated postcensal estimates.
- 135 Data refer to 17 September.
- 136 Based on the 2010 Population and Housing Census and 2013/2014 Household Income and Expenditure Survey.
- 137 Data of mini-census taken in 2019.
- 138 These data have been randomly rounded to protect confidentiality. Individual figures may not add up to totals, and values for the same data may vary in different tables.
- 139 The urban and rural classification for 2018 differs significantly from the classification used in previous years.
- 140 Estimates are prepared by the Secretariat of the Pacific Community.
- 141 Data have not been adjusted for underenumeration.
- 142 Projections based on adjusted 2009 census counts.
- 143 Data of mini-census taken in 2017.
