2010 World Population and Housing Census Programme

**Regional Seminar on Census data Dissemination and Spatial Analysis,
Santiago, Chile, 31 May-3 June 2011**

Overview of Presentation

- ❑ What is CensusInfo
- ❑ Objectives
- ❑ Main features of the software
- ❑ UNSD activities to assist CensusInfo
- ❑ CensusInfo website

What is CensusInfo

CensusInfo is a software tool to disseminate census data on the web and CD-ROM

- ❑ Developed by UNSD in partnership with UNICEF and UNFPA to disseminate census results
- ❑ Officially launched in February 2009 at the 40th session of the Statistical Commission

Initiative

- Dissemination has been the weakest point of population and housing censuses
- Census Data Dissemination as one of three main goals of the **“2010 World Population and Housing Census Programme”**
- Assist countries in their efforts to disseminate census results in a timely manner

Objectives

- Develop a software solution to facilitate the dissemination of census results fulfilling following minimum criteria:
 - Easy to implement and easy to use
 - Free to use
 - Dissemination of census data at any geographical level
 - Able to generate census-specific outputs
 - Customization for country-specific requirements
 - Dissemination on the web and CD-ROM

United Nations
Statistics Division

Main features of CensusInfo

- CensusInfo is user and administrator friendly software

Information ✖

Data/Indicator

Annual growth rate

population.

Classification:

Method of Computation: It is computed by using the exponential growth rate. Two types of data are required: (a) the population of specific geographical units from the current census and (b) the population of the same geographical units, with the same borders, from the previous census. It is usually expressed as a percentage.

It is calculated by the following formula: $r = \frac{\ln(P_{t+n} / P_t)}{n} * 100$, where:

- P_t is the population at date t (previous census)
- P_{t+n} is the population at date t+n (current census)
- n is the interval between the two censuses (in years)
- r is the annual growth rate of the population.

(h) Household deaths in the past 12 months (paras. 2.194–2.198) ◆

(i) Maternal or paternal orphanhood (paras. 2.199–2.201) ○

6. Educational characteristics (paras. 2.202–2.230)

(a) Literacy (paras. 2.202–2.208) ◆

(b) School attendance (paras. 2.209–2.214) ◆

(c) Educational attainment (paras. 2.215–2.222) ◆

(d) Field of education and educational qualifications (paras. 2.223–2.230) ○

7. Economic characteristics (paras. 2.231–2.349)

(c) Activity status (paras. 2.240–2.300) ◆

(e) Occupation (paras. 2.301–2.305) ◆

Legend:
◆ Core topic
◻ Core topic, derived
○ Additional topic

(b)	Age (paras. 2.135–2.143)	◆
(c)	Marital status (paras. 2.144–2.151)	◆
(d)	Religion (paras. 2.152–2.155)	○
(e)	Language (paras. 2.156–2.159)	○
(f)	Ethnicity (paras. 2.160–2.162)	○
(g)	Indigenous peoples (2.163–2.167)	○
5. Fertility and mortality (paras. 2.168–2.201)		
(a)	Children ever born alive (paras. 2.180–2.185)	◆
(b)	Children living (paras. 2.186–2.187)	◆
(c)	Date of birth of last child born alive (paras. 2.188–2.191)	◆

dents because usual residence is generally the best indication of where people will demand and consume services, and a count of usual residents is therefore most relevant for planning and policy purposes.

2.19. Some countries will supplement the population count from their census with information from other sources, for example on usual residents temporarily outside the country at the time of the census, to produce population estimates. Other countries will rely solely on the population count from the population census.

2.20. Information about each person can be collected and entered in the census questionnaire either where he or she is (or was) present on the day of the census or at his or her usual residence. Paragraphs 1.461–1.477 describe the place of enumeration basis for the census.

Main features of CensusInfo

- CensusInfo is user and administrator friendly software
- Disseminates census results at any geographical level
- Provides a suggested list of census topics, data and indicators with accompanying metadata (based on UN recommendations)
- Easy to customize to meet country-specific needs

Main features of CensusInfo

- CensusInfo is user and administrator friendly software
- Disseminates census results at any geographical level and for multiple censuses
- Provides a suggested list of census topics, data and indicators with accompanying metadata (based on UN recommendations)
- Easy to customize to meet country-specific needs
- Supports to disseminate census data with multiple languages
- Generates user-defined tables, maps, graphs and reports
- Provides standard profile reports by geographic units

Global CensusInfo

Global CensusInfo is an application of CensusInfo implemented by the UNSD presenting data from national censuses. [More...](#)

[Global CensusInfo Database](#)

National Applications

CensusInfo applications developed by national statistics offices:

www.censusinfo.net

Training

The United Nations Statistics Division organizes CensusInfo training workshops to enhance the national capacity in the use of the CensusInfo to disseminate their census data.

[More...](#)

What is CensusInfo

The United Nations Statistics Division, in partnership with UNICEF and UNFPA, has developed a software package, CensusInfo to help countries disseminate their census data on CD-ROM and on the web. [More...](#)

Main Features

- CensusInfo is a tool to disseminate data on the web and on CD-ROM.
- CensusInfo includes census topics and a suggested list of census indicators with accompanying metadata. [More...](#)
- CensusInfo can be customized to meet country-specific census indicators.
- CensusInfo presents indicators by time period, and geographic area, up to sub-national level, with extensive metadata.
- CensusInfo generates user-defined tables, graphs, maps and reports.
- CensusInfo can import data from other software applications, such as CPro, SAS, SPSS and Redatam.

Comparison with other software solutions

CensusInfo is specifically designed for census data dissemination. It combines a set of features which can not be found as such in most other software solutions. To help users, a comparison with other software packages in the context of data dissemination can be found [here](#).

How to Get

Worldwide

Egypt
<http://www.censusinfo.capmas.gov.eg>

CensusInfo Egypt is a country adaption of CensusInfo developed by the Central Agency for Public Mobilization and Statistics (CAPMAS) in Cairo, Egypt, with support from the United Nations Statistics Division. It contains over 90.000 data values from the 2006 census and the 1996 census. CensusInfo Egypt is available in Arabic and English language.

India
www.devinfo.info/CensusInfo/India/

CensusInfo India is a country adaptation of CensusInfo containing the latest data from India's most recent population and housing census.

Liberia

A CensusInfo adaptation for Liberia is presently under development by the Liberia Institute of Statistics & Geo-Information Services. When completed, it will serve to disseminate data from the 2008 Population and Housing census.

Malawi

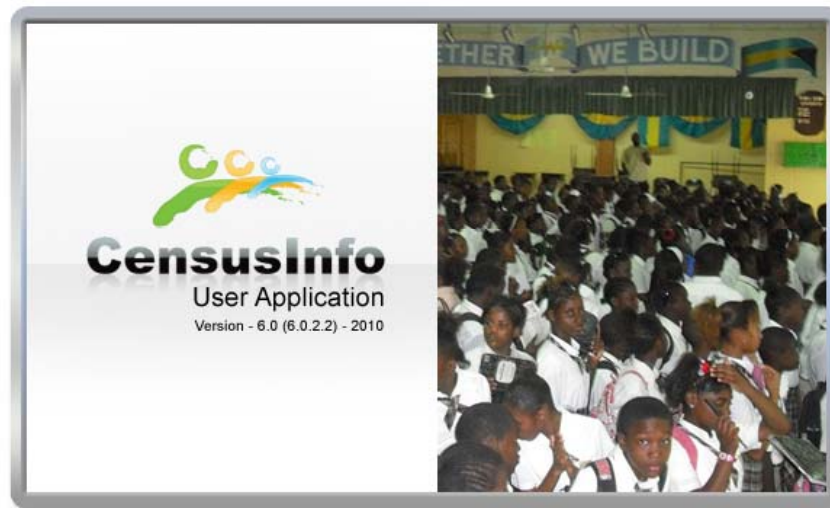

A CensusInfo adaptation for Malawi is presently under development.
