GENERAL NOTES - NOTES GENERALES

For certain countries or areas, there is a discrepancy between the mid-year population estimates shown in this table and those shown in subsequent tables for the same year. Usually this discrepancy arises because the estimates occurring in a given year are revised, although the remaining tabulations are not. Unless otherwise indicated, data are official estimates of population for 1 July, or averages of end-year estimates. Crude birth, death and natural increase rates are computed per 1 000 population, infant mortality rates are per 1 000 live births. For method of evaluation and limitations of data, see Technical Notes for this table. — Pour quelques pays ou zones il y a une discordance entre les estimations au milieu de l'année présentées dans ce tableau et celles présentées dans des tableaux suivants pour la même année. Habituellement ces différences apparaissent lorsque les estimations pour une certaine année ont été révisées; alors que les autres tabulations ne l'ont pas été. Sauf indications contraire les données sont des estimations officielles de population au 1er juillet ou des moyennes d'estimations de fin d'années. Les taux bruts de natalité, de mortalité et d'accroissement naturel sont calculés pour 1 000

personnes; les taux de mortalité infantile sont calculés pour 1 000 naissances vivantes. Pour la méthodes d'évaluation et les insuffisances des données, voir Notes techniques pour ce tableau.
