<sup>b</sup> A Roman number in front of the data for males specifies the range of the reference period of life expectancy for males and females presented on the

row. For example, a reference year of 2005 and a range of V years means that the reference period for the life expectancy is 2001 - 2005. The absence of a Roman number means the reference period is one year and the reference period therefore coincides with the reference year.

Un chiffre romain devant la donnée relative aux hommes indique l'étendue de la période de référence concernant l'espérance de vie des hommes et des femmes présentée dans la ligne. Par exemple, une année de référence 2005 et une étendue de V signifie que la période de référence pour l'espérance de vie est 2001-2005. L'absence de chiffre romain signifie que la période de référence est d'un an et donc coïncide avec l'année de référence.
