

Table 6 - Demographic Yearbook 2013

Table 6 presents total population by sex for as many years as possible between 2004 and 2013, as well as urban population as available.

Description of variables: Data are from nation-wide population censuses or are estimates, some of which are based on sample surveys of population carried out among all segments of the population. This characteristic of the data is indicated in the column "Code". The codes used are explained at the end of the table.

Urban is defined according to the national census definition. The definition for each country is set forth at the end of the technical notes to this table.

Percentage computation: Percentages urban are the number of persons residing in an area defined as "urban" per 100 total population. They are calculated by the Statistics Division of the United Nations Department of Economic and Social Affairs. In very few cases the data for total population have been revised but the data for the urban and rural population have not been. These data are footnoted accordingly. In these cases, particular caution should be used in interpreting the figures for percentage urban.

Reliability of data: Estimates that are believed to be less reliable are set in *italics* rather than in roman type. Classification in terms of reliability is based on the method of construction of the total population estimate discussed in the technical notes for table 3.

Limitations: Statistics on urban population by sex are subject to the same qualifications as have been set forth for population statistics in general, as discussed in section 3 of the Technical Notes.

The basic limitations imposed by variations in the definition of the total population and in the degree of under-enumeration are perhaps more important in relation to urban/rural than to any other distributions. The classification by urban and rural is affected by variations in defining usual residence for purposes of sub-national tabulations. Likewise, the geographical differentials in the degree of under-enumeration in censuses affect the comparability of these categories throughout the table. The distinction between *de facto* and *de jure* population is also very important with respect to urban/rural distributions. The difference between the *de facto* and the *de jure* population is discussed at length in section 3.1.1 of the Technical Notes.

A most important and specific limitation, however, lies in the national differences in the definition of urban. Because the distinction between urban and rural areas is made in so many different ways, the definitions have been included at the end of this table. The definitions are necessarily brief and, where the classification of urban involves administrative civil divisions, they are often given in the terminology of the particular country or area. As a result of variations in terminology, it may appear that differences between countries or areas are greater than they actually are. On the other hand, similar or identical terms (for example, town, village, district) as used in different countries or areas may have quite different meanings.

It will be seen from an examination of the definitions that they fall roughly into three major types: (1) classification of localities as urban based on size; (2) classification of administrative centres of minor civil divisions as urban and the remainder of the division as rural; and (3) classification of minor civil divisions on a set of criteria, which may include type of local government, number of inhabitants or proportion of population engaged in agriculture.

The designation of areas as urban or rural is so closely bound to historical, political, cultural, and administrative considerations that the process of developing uniform definitions and procedures moves very slowly. Not only do the definitions differ from one country or area to the other, but, they may also no longer reflect the original intention for distinguishing urban from rural. The criteria once established on the basis of administrative subdivisions (as most of these are) become fixed and resistant to change. For this reason, comparisons of time-series data may be severely affected because the definitions used become outdated. Special care must be taken in comparing data from censuses with those from sample surveys because the definitions of urban used may differ.

Despite their shortcomings, however, statistics on urban and rural population are useful in describing the diversity of population distribution within a country or area.

The definition of urban/rural areas is based on both qualitative and quantitative criteria that may include any combination of the following: size of population, population density, distance between built-up areas, predominant type of economic activity, conformity to legal or administrative status and urban characteristics such as specific services and facilities¹. Although statistics classified by urban/rural areas are widely available, no international standard definition

appears to be possible at this time since the meaning differs from one country or area to another. The urban/rural classification of population used here is reported according to the national definition.

Earlier data: Urban and total population by sex have been shown in previous issues of the Demographic Yearbook. For information on specific years covered, readers should consult the Historical Index.

DEFINITION OF "URBAN"

AFRICA

Algeria: The urban/rural delimitation is performed after the census operation based on the classification of built-up areas. Groupings of 100 or more constructions, distant less than 200 metres from one another are considered urban.

Botswana: Agglomeration of 5 000 or more inhabitants where 75 per cent of the economic activity is non-agricultural.

Burundi: Commune of Bujumbura.

Burkina Faso: All administrative centres of provinces (total of 45) plus 4 medium-sized towns are considered as urban areas.

Comoros: Every locality or administrative centre of an island, region or prefecture that has the following facilities: asphalted roads, electricity, a medical centre, telephone services, etc.

Egypt: Governorates of Cairo, Alexandria, Port Said, Ismailia, Suez, frontier governorates and capitals of other governorates, as well as district capitals (Markaz). The definition of urban areas for the 2006 Census is "SHIAKHA", a part of a district.

Equatorial Guinea: District centres and localities with 300 dwellings and/or 1 500 inhabitants or more.

Ethiopia: Localities of 2 000 or more inhabitants.

Kenya: Areas having a population of 2 000 or more inhabitants that have transport systems, build-up areas, industrial/manufacturing structures and other developed structures.

Lesotho: All administrative headquarters and settlements of rapid growth.

Liberia: Localities of 2 000 or more inhabitants.

Malawi: All townships and town planning areas and all district centres.

Mauritius: The five Municipal Council Areas which are subdivided into twenty Municipal Wards defined according to proclaimed boundaries.

Namibia: Proclaimed urban areas for which cadastral data is available and other unplanned squatter areas.

Niger: Capital city, capitals of the departments and districts.

Rwanda: All administrative areas recognized as urban by the law. These are all administrative centres of provinces, and the cities of Kigali, Nyanza, Ruhango and Rwamagana.

Senegal: Agglomerations of 10 000 or more inhabitants.

South Africa: Places with some form of local authority.

Sudan: Localities of administrative and/or commercial importance or with population of 5 000 or more inhabitants.

Swaziland: A geographical area constituting of a city or town, characterized by higher population density and vast human features in comparison to areas surrounding it.

Tunisia: Population living in communes.

Uganda: Gazettes, cities, municipalities and towns.

United Republic of Tanzania: 16 gazetted townships.

Zambia: Localities of 5 000 or more inhabitants, the majority of whom all depend on non-agricultural activities.

AMERICA, NORTH

Canada: Places of 1 000 or more inhabitants, having a population density of 400 or more per square kilometre.

Costa Rica: Administrative centres of cantons.

Cuba: Towns that fulfil a political or administrative function, or that have a population of 2 000 or more and definite urban characteristics.

Dominican Republic: Administrative centres of municipalities and municipal districts, some of which include suburban zones of rural character.

El Salvador: Administrative centres of municipalities.

Greenland: Localities of 200 or more inhabitants.

Guatemala: Municipality of Guatemala Department and officially recognized centres of other departments and municipalities.

Haiti: Administrative centres of communes.

Honduras: Localities of 2 000 or more inhabitants, having essentially urban characteristics.

Jamaica: Localities of 2 000 or more inhabitants, having urban characteristics.

Mexico: Localities of 2 500 or more inhabitants.

Nicaragua: Administrative centres of municipalities and localities of 1 000 or more inhabitants or with more than 150 dwellings, with streets, electric light, water service, school and health centre.

Panama: Localities of 1 500 or more inhabitants having essentially urban characteristics. Beginning 1970, localities of 1 500 or more inhabitants with such urban characteristics as streets, water supply systems, sewerage systems and electric light.

Puerto Rico: Agglomerations of 2 500 or more inhabitants, generally having population densities of 1 000 persons per square mile or more. Two types of urban areas: urbanized areas of 50 000 or more inhabitants and urban clusters of at least 2 500 and less than 50 000 inhabitants.

United States of America: Agglomerations of 2 500 or more inhabitants, generally having population densities of 1 000 persons per square mile or more. Two types of urban areas: urbanized areas of 50 000 or more inhabitants and urban clusters of at least 2 500 and less than 50 000 inhabitants.

United States Virgin Islands: Agglomerations of 2 500 or more inhabitants, generally having population densities of 1 000 persons per square mile or more. Two types of urban areas: urbanized areas of 50 000 or more inhabitants and urban clusters of at least 2 500 and less than 50 000 inhabitants. (As of the 2000 Census, no urbanized areas are identified in the United States Virgin Islands.)

AMERICA, SOUTH

Argentina: Populated centres with 2 000 or more inhabitants.

Bolivia: Localities of 2 000 or more inhabitants.

Brazil: Urban and suburban zones of administrative centres of municipalities and districts.

Chile: Areas of concentrated housing units with more than 2 000 inhabitants, or between 1 001 and 2 000 inhabitants having 50 per cent or more of its economically active population doing secondary or tertiary activities. As an exception, centres of tourism and recreation with more than 250 housing units that do not satisfy the population requirement are nevertheless considered urban.

Colombia: Areas composed of groups of buildings and adjacent structures grouped into blocks with, in general, provision of essential services such as water, sewage, electricity, hospitals and schools, among others. This category includes the capital city and other municipal capitals.

Ecuador: Capitals of provinces and cantons.

Falkland Islands (Malvinas): Town of Stanley.

Paraguay: Cities, towns and administrative centres of departments and districts.

Peru: Populated centres with 100 or more dwellings.

Suriname: The districts of Paramaribo and Wanica.

Uruguay: Towns established as cities, villages, towns and other populated centers by legislation under the Law of Population Centers.

Venezuela (Bolivarian Republic of): Centres with a population of 2 500 or more inhabitants.

ASIA

Armenia: Cities and urban-type localities, officially designated as such, usually according to the criteria of number of inhabitants and predominance of agricultural, or number of non-agricultural workers and their families.

Azerbaijan: An administrative division which covers more than 15 000 population, engaging mainly in industrial and other economic and social activities and which include administrative and cultural centers.

Bahrain: Communes or villages of 2 500 or more inhabitants.

Cambodia: Areas at the commune level satisfying the following three conditions: (1) Population Density exceeding 200 per square Km, (2) Percentage of male employed in agriculture below 50 per cent, (3) Total population of the commune exceeds 2 000 inhabitants.

China: Cities only refer to the cities proper of those designated by the State Council. In the case of cities with district establishment, the city proper refers to the whole administrative area of the district if its population density is 1 500 people per kilometre or higher; or the seat of the district government and other areas of streets under the administration of the district if the population density is less than 1 500 people per kilometre. In the case of cities without district establishment, the city proper refers to the seat of the city government and other areas of streets under the administration of the city. For the city district with the population density below 1 500 people per kilometre and the city without district establishment, if the urban construction of the district or city government seat has extended to some part of the neighboring designated town(s) or township(s), the city proper does include the whole administrative area of the town(s) or township(s).

Cyprus: As determined by the Department of Town Planning and Housing of the Ministry of Interior.

Georgia: Cities and urban-type localities, officially designated as such, usually according to the criteria of number of inhabitants and predominance of agricultural, or number of non-agricultural workers and their families.

India: Towns (places with municipal corporation, municipal area committee, town committee, notified area committee or cantonment board); also, all places having 5 000 or more inhabitants, a density of not less than 1 000 persons per square mile or 400 per square kilometre, pronounced urban characteristics and at least three fourths of the adult male population employed in pursuits other than agriculture.

Indonesia: Area which satisfies certain criteria in terms of population density, percentage of agricultural households, and a number of urban facilities such as roads, formal education facilities, public health services, etc.

Iran (Islamic Republic of): Every district with a municipality.

Israel: Localities with 2 000 or more residents.

Japan: City (shi) having 50 000 or more inhabitants with 60 per cent or more of the houses located in the main built-up areas and 60 per cent or more of the population (including their dependants) engaged in manufacturing, trade or other urban type of business.

Jordan: Localities of 5 000 or more inhabitants.

Kazakhstan: Cities and urban-type localities, officially designated as such, usually according to the criteria of number of inhabitants and predominance of agricultural, or number of non-agricultural workers and their families.

Kyrgyzstan: Cities and urban-type localities, officially designated as such, usually according to the criteria of number of inhabitants and predominance of agricultural, or number of non-agricultural workers and their families.

Lao People's Democratic Republic: Areas or villages that satisfy at least three of the following five conditions: located in metropolitan areas of district or province, there is access to road in dry and rainy seasons, about 70 per cent or 2/3 of the population has access to piped water, about 70 per cent or 2/3 of the population has access to public electricity, there is a market operating every day.

Malaysia: Gazetted areas with their adjoining built-up areas which have a combined population of 10 000 or more. Built-up areas are defined as areas contiguous to a gazetted area and have at least 60 per cent of their population (aged 15 years and over) engaged in non-agricultural activities. The definition of urban areas also takes into account the special development area which is not gazetted and can be identified and separated from the gazetted area or built-up area of more than 5km and a population of at least 10 000 with 60 per cent of the population (aged 15 years and over) engaged in non-agricultural activities.

Maldives: Malé, the capital.

Mongolia: Capital and district centres.

Nepal: As declared by the government municipalities.

Pakistan: Places with municipal corporation, town committee or cantonment.

Philippines: Cities and municipalities and their central districts with a population density of at least 500 persons per square km. Urban areas are considered other districts regardless of population size that have streets, at least six establishments (commercial, manufacturing, recreational and/or personal services), and at least three public structures such as town hall, church, public park, school, hospital, library, etc.

Republic of Korea: For estimates: Places with 50 000 or more inhabitants. For census: the figures are composed in the basis of the minor administrative divisions such as Dongs (mostly urban areas) and Eups or Myeons (rural areas).

Sri Lanka: Urban sector comprises of all municipal and urban council areas.

State of Palestine: Any locality where the population amounts to 10 000 persons or more. This applies to all governorates/districts regardless of their size, and to all localities whose populations vary from 4 000 to 9 999 persons provided they have at least four of the following elements: public electricity network, public water network, post office, health center with a full time physician and a school offering a general secondary education certificate.

Syrian Arab Republic: Cities, Mohafaza centres and Mantika centres, and communities with 20 000 or more inhabitants.

Tajikistan: Cities and urban-type localities, officially designated as such, usually according to the criteria of number of inhabitants and predominance of agricultural, or number of non-agricultural workers and their families.

Thailand: Municipal areas.

Turkey: Province and district centres.

Turkmenistan: Cities and urban-type localities, officially designated as such, usually according to the criteria of number of inhabitants and predominance of agricultural, or number of non-agricultural workers and their families.

Uzbekistan: Cities and urban-type localities, officially designated as such, usually according to the criteria of number of inhabitants and predominance of agricultural, or number of non-agricultural workers and their families.

Viet Nam: Urban areas include inside urban districts of cities, urban quarters and towns. All other local administrative units (communes) belong to rural areas.

EUROPE

Albania: Towns and other industrial centres of more than 400 inhabitants.

Austria: Urban areas are localities with 2 000 or more inhabitants. The delineation of localities goes back to 1991.

Belarus: Urban settlements are settlements authorized under the law as towns, urban-type settlements, workers settlements and health resort areas.

Bulgaria: All towns and cities according to the Territorial and Administrative-Territorial Division of the country.

Czech Republic: Localities with 2 000 or more inhabitants.

Estonia: Urban settlements include cities, cities without municipal status and towns.

Finland: Urban communes including those municipalities in which at least 90 per cent of the population lives in urban settlements or in which the population of the largest urban settlement is at least 15 000.

France: Communes containing an agglomeration of more than 2 000 inhabitants living in contiguous houses or with not more than 200 metres between houses, also communes of which the major portion of the population is part of a multi-communal agglomeration of this nature.

Greece: Urban is considered every municipal or communal department of which the largest locality has 2 000 inhabitants and over.

Hungary: Localities recognized by the President of the Republic with the title of town, on the basis of specific (economic, commercial, institutional, cultural etc.) criteria.

Iceland: Localities of 200 or more inhabitants.

Ireland: Cities and towns including suburbs of 1 500 or more inhabitants.

Latvia: Cities and urban-type localities, officially designated as such, usually according to the criteria of number of inhabitants and predominance of agricultural, or number of non-agricultural workers and their families.

Lithuania: Urban population refers to persons who live in cities and towns, i.e., the population areas with closely built permanent dwellings and with the resident population of more than 3 000 of which 2/3 of employees work in industry, social infrastructure and business. In a number of towns the population may be less than 3 000 since these areas had already the status of "town" before the law was enforced (July 1994)

Malta: Areas with population density of 150 persons or more per square km.

Montenegro: According to the current law of territorial division of Montenegro. This means that each local community has the obligation to decide which settlements are urban and which are rural.

Netherlands: Urban: Municipalities with a population of 2 000 and more inhabitants. Semi-urban: Municipalities with a population of less than 2 000 but with not more than 20 per cent of their economically active male population engaged in agriculture, and specific residential municipalities of commuters.

Norway: A hub of buildings inhabited by at least 200 people and where the distance between the buildings does not exceed 50 metres. The boundaries are dynamic and may be changed due to developments and population changes.

Poland: Towns and settlements of urban type, e.g. workers' settlements, fishermen's settlements, health resorts.

Portugal: Localities with 2 000 or more inhabitants.

Republic of Moldova: Cities and urban-type localities, officially designated as such, usually according to the criteria of number of inhabitants and predominance of agricultural, or number of non-agricultural workers and their families.

Romania: Cities, municipalities and other towns.

Russian Federation: Cities and urban-type localities, officially designated as such, usually according to the criteria of number of inhabitants and predominance of agricultural, or number of non-agricultural workers and their families.

Serbia: Municipalities, cities and the city of Belgrade.

Slovakia: The municipalities with the status of a town having 5 000 inhabitants or more.

Slovenia: Settlements of 3 000 or more inhabitants, settlements that serve as seats of municipalities with at least 1 400 inhabitants, and sub-urban areas that are being gradually integrated with an urban settlement of 5 000 or more inhabitants.

Spain: For the purposes of publishing comparable results at the European level, Eurostat proposes to consider as urban, intermediate and rural, areas formed by municipalities with respectively a population over 10 000 inhabitants, 2 001 to 10 000 inhabitants, and 2 000 or less inhabitants.

Switzerland: Agglomerations and isolated towns (towns not attached to a cluster and with at least 10,000 inhabitants) are the urban space.

Ukraine: Cities and urban-type localities, officially designated as such, usually according to the criteria of number of inhabitants and predominance of agricultural, or number of non-agricultural workers and their families.

United Kingdom of Great Britain and Northern Ireland: Built-up areas (of at least 20 hectares of built-up land) with 10 000 or more people living in them.

OCEANIA

Australia: An urban centre is generally defined as a population cluster of 1 000 or more people.

American Samoa: Agglomerations of 2 500 or more inhabitants, generally having population densities of 1 000 persons per square mile or more. Two types of urban areas: urbanized areas of 50 000 or more inhabitants and urban clusters of at least 2 500 and less than 50 000 inhabitants. (As of Census 2000, no urbanized areas are identified in American Samoa.)

Cook Islands: Raratonga, the most populous island.

Guam: Agglomerations of 2 500 or more inhabitants, generally having population densities of 1 000 persons per square mile or more, referred to as "urban clusters".

New Caledonia: Nouméa and communes of Païta, Nouvel Dumbéa and Mont-Dore.

New Zealand: All cities, plus boroughs, town districts, townships and country towns with a population of 1 000 or more usual residents.

Northern Mariana Islands: Agglomerations of 2 500 or more inhabitants, generally having population densities of 1 000 persons per square mile or more. Two types of urban areas: urbanized areas of 50 000 or more inhabitants and urban clusters of at least 2 500 and less than 50 000 inhabitants.

Tokelau: All of Tokelau's population is considered to be rural.

Tonga: Nuku'alofa.

Vanuatu: Luganville centre and Vila urban.

NOTES
