NOTES

1 Data as reported; the total differs from the sum of categories.

² Data for gas refer to candles.

³ The category "other" refers to housing units without electricity.

⁴ Data for the category "other" include candles and battery lamps.

⁵ Data refer to population and not households.

⁶ Data reported in percentages only.

⁷ Calculated by the United Nations.

⁸ Not included are 430 units that use solar lighting. As one household can use one or more sources of lighting the sum of categories does not add up to total.
