

Environment and Energy: Indicators

Environment and
Energy Statistics
Workshop for the Arab
Region

Amman, Jordan 8-12 September 2013

Environment and Energy Statistics Branch,
United Nations Statistics Division

Indicators

1. Indicators are key for monitoring policy and informing the public
2. Methodological process for constructing indicators
3. The importance of methodological sheets
4. There are numerous indicators initiatives at the global, regional and national levels, notably the SDI for the Arab region (presented by ESCWA).
5. You will receive 4 lists of energy-environment indicators for illustrative purposes
6. What energy-environment indicators are being produced in your country?

Indicators exercise – 30 minutes

1. Work in country teams if you have a national partner
2. Analyze the list of common environment-energy indicators provided (and its methodological sheets when available)
3. Select those indicators are being produced in your country:
 - a) regularly produced and disseminated
 - b) work in progress (indicator under development)
4. Mark them in the front page of the lists (a or b). We will consolidate and report back tomorrow on the most commonly produced indicators in the region. Start with the indicators in list of the JFDES
5. This is NOT a formal report to UNSD, just an exercise designed for didactical purposes within the workshop
