Workshop on the Strategic Framework for the African Bioenergy Data Management

Good and best practices for releasing the data to identified target groups

CÔTE D’IVOIRE

LOME, 24-26 April 2023

François KOKOLA

General Directorate of Energy
Depute Director of Statistics and Energy System Information

N'Damoua FOFANA

National Institute of Statistics
Research Officer at the Sub-Directorate of Emerging Statistics (SDSE)
Institutional anchoring of data collection and publication

Forest regulations

Collection methodology and data collected

Tools for drawing up energy balances and indicators

Tools used in the dissemination of statistics to the public
Decree No. 2012-1159 of December 19, 2012 establishing a department in charge of planning and statistics within ministries
- Each sector is invited to collect, organize and disseminate statistics, sector studies, development plan

The National Statistical System (SSN) of Côte d'Ivoire is governed by Law No. 2013-537 of July 30, 2013 (principles, missions, sanctions)

Law No. 2013-867 of December 23, 2013 on access to information of public interest
ENCRAGE INSTITUTIONEL DE LA STATISTIQUE
CADRE INSTITUTIONNEL ET REGLEMENTAIRE DU SECTEUR DE L’ENERGIE

MINISTRY OF ECONOMY AND FINANCE
MINISTRY OF MINES, PETROLEUM AND ENERGY
MINISTRY OF BUDGET AND STATE PORTFOLIO

DIRECTION GENERALE DE L’ENERGIE
Implementation of the energy policy and the repression system

DIRECTION GENERALE DES HYDROCARBURES
Implementation of the energy policy in terms of hydrocarbons

SMB

GAS and OIL PRODUCERS
FOXTROT  CNR

DISTRIBUTORS OF OIL and GAS PRODUCTS
GPP  APCI

1. Control of compliance with the texts in force
2. Settlement of disputes between Operators
3. Consumer Protection
4. Advice and assistance to the State
• Law No. 65-255 of August 4, 1965, relating to the protection of wildlife and the practice of hunting.

• Law No. 65-425 of December 20, 1965, on the Forest Code which defines forests, protection and reforestation areas as well as the categories of rights that exist in the forest domain.

• The forest code covers the establishment of reserves and classified forests, the exercise of customary rights and the issuance of logging concessions in forests in the domain of the State;

• From these two laws will be built all the regulations with decrees, orders or ordinances which are nothing other than texts of application or orientation of political decisions in forestry.

• Thus, faced with the increasing degradation of the country's forest resources, the Government took the following measures from 1994:
  - prohibition of logging above the 8th parallel;
  - freeze on logging in areas straddling rural areas and classified forests;
  - creation of a file of approved timber operators;
  - sensitization of populations bordering classified forests and rural areas as well as timber manufacturers with a view to their adherence to the reform of logging;
  - intensification of checks on logging activities through the creation of a Forest Police and Litigation Department and the strengthening of surveillance resources;
  - continuation of the development of classified forests;
  - intensification of village reforestation.
Four methods are used:

- Administrative method: activity reports, letter of request with attached form
- Survey
- Estimation from past trend or from a sample
- Search on websites
Hydrocarbons: DGH
- Supply: PETROCI and its partners, SIR
- Transformation: SIR, SMB
- Final consumption: GPP; APCI and all marketers

Electricity: CIE
- 3 monthly reports, 9 annual reports

Biomass: estimate / calculation based on past surveys (2013)

Other data: from large companies (sample) / estimate
Côte d'Ivoire does not yet have its own tools for collecting, analyzing and developing energy balances and indicators.

However, we rely on the tools of AFREC, UEMOA and ECOWAS.
- Economic context of the year: Analysis of supplies, transformations and final consumption by product and by sector
- Fuel and electricity prices: Policy evaluation: access to electricity, clean fuels, clean transport, etc.
- Macro and efficiency indicators

- Participants: main players in the electricity, oil, gas, environment, transport, forestry, NGOs, private associations, industrialists, Ministries of Planning, economy, infrastructure, etc.
- Content: importance of statistics, process for collecting and preparing reports, methodology, analysis of the report, evaluation of certain public policies, macro indicators, difficulties and recommendations

- Presentation of the missions of the DGE, the institutional and regulatory framework, the texts and laws in force in the sector
- Activities and news
- Documents drawn up by the DGE and some statistics
Thanks !
