Revision of the SEEA: Draft Version for Second Round of Global Consultation, October 2011 – Chapters 1 – 6

Reading guide for the SEEA Revision Second Round of Global Consultation

Supporting material for selected classifications and lists in the revised SEEA

Part I: General comments

This is the first global consultation based on the complete set of chapters for the SEEA Central Framework. In this section please provide general comments on the drafts chapters. You may like to consider providing comments on the style and tone, the content and coverage, and the general accessibility of the material.

National Statistical Service of Armenia (NSS RA) finds that the revision of the SEEA is very important and connected to the global changes of environment and world economy, which lead to the changes of their accounting systems. The chapters provide a good guidance and broad and accessible methodological explanations of the SEEA in the context of the SNA 2008.

The chapters are generally well structured and material and the coverage of the chapters are well balanced. The style, tone and readability of the text are very good. The chapters are constructed by logic sequence which allows passing easily from one section to another.

NSS RA carries out a huge work on constructing the satellite environmental account and the SEEA handbook will help to know more about the subject in this area.

Part II: Technical and other comments

In the box below please supply any additional comments including those of a more technical nature. As this is the first consultation where the complete 6 chapters have been released, comments on the consistency of the technical content across the chapters would be appreciated.

Please reference your responses with the relevant paragraph number or section number.
