Comment Form

Global Consultation Comment Form

Revised SEEA Chapter 1 - 6

Deadline for responses: 7 December 2011

Send responses to: seea@un.org

Your name:	ŠEVALA KORAJČEVIĆ
Your country/organization:	Agency for Statistics of Bosnia and Herzegovina
Contact (e.g. email address):	Sevala.korajcevic@bhas.ba

To submit responses please save this document and send it as an attachment to the following e-mail address: seea@un.org.

The comment form has been designed to facilitate the analysis of comments. In Part I general comments on the general style, content and coverage of the chapter are sought. In Part II any technical and other comments should be included.

Relevant documents

Before submitting responses you are encouraged to read the accompanying papers available on the website.

Revision of the SEEA: Draft Version for Second Round of Global Consultation, October 2011 – Chapters 1 – 6

Reading guide for the SEEA Revision Second Round of Global Consultation

Supporting material for selected classifications and lists in the revised SEEA

Part I: General comments

This is the first global consultation based on the complete set of chapters for the SEEA Central Framework. In this section please provide general comments on the drafts chapters. You may like to consider providing comments on the style and tone, the content and coverage, and the general accessibility of the material.

Agency for Statistics of Bosnia and Herzegovina – Environment and Energy Statistics Department recognised the importance of the revised SEEA document. We find the environmental accounting very important. Bosnia and Herzegovina have not yet implemented such accounts, and there is a dilemma how to do so. There are many questions regarding the implementation, for example what should be the first step taken, who will use this kind of data...

Efficient work on environmental accounting depends on common work of people who provide required data and who have a common and unified goal to support the project. A good start is revised SEEA methodological guide, than learning more about the subject by discussing to others experienced in the area, identifying the key players in the country, selection of institution that will carry out the initial accounting work and build a team to compile the accounts.

Revised Integrated Environmental and Economic Accounting (SEEA) provides international statistical standard for Environmental-Economic Accounting, and makes a good basis for the development of environmental accounts and international comparison.

Part II: Technical and other comments

In the box below please supply any additional comments including those of a more technical nature. As this is the first consultation where the complete 6 chapters have been released, comments on the consistency of the technical content across the chapters would be appreciated.

Please reference your responses with the relevant paragraph number or section number.
