SEEA Revision
Chapters 1-6

Comment Form

Global Consultation Comment Form

Revised SEEA Chapter 1 - 6

Deadline for responses: 7 December 2011

Send responses to: seea@un.org

Your name:	Ms. KONG Pek Fong (Director)
Your country/organization:	Macao, China/Statistics and Census Service
Contact (e.g. email address):	info@dsec.gov.mo

To submit responses please save this document and send it as an attachment to the following e-mail address: seea@un.org.

The comment form has been designed to facilitate the analysis of comments. In Part I general comments on the general style, content and coverage of the chapter are sought. In Part II any technical and other comments should be included.

Relevant documents

Before submitting responses you are encouraged to read the accompanying papers available on the website.

Revision of the SEEA: Draft Version for Second Round of Global Consultation, October 2011 – Chapters 1 – 6

Reading guide for the SEEA Revision Second Round of Global Consultation

Supporting material for selected classifications and lists in the revised SEEA

Part I: General comments

This is the first global consultation based on the complete set of chapters for the SEEA Central Framework. In this section please provide general comments on the drafts chapters. You may like to consider providing comments on the style and tone, the content and coverage, and the general accessibility of the material.

The complete set of chapters for the SEEA Central Framework are better structured and are easier to understand than the first one.

Part II: Technical and other comments

In the box below please supply any additional comments including those of a more technical nature. As this is the first consultation where the complete 6 chapters have been released, comments on the consistency of the technical content across the chapters would be appreciated.

Please reference your responses with the relevant paragraph number or section number.

We totally agree that it is very important to monitor environmental impacts caused by economic activities. For doing this in a comprehensive conceptual framework such as SEEA, it is necessary for us to develop a proper system to collect environmental statistics on utilization of national resources. Apart from the conceptual problems and controversies raised by other countries and international organizations, as we don't have sufficient environmental data which are difficult and costly to collect, it is certainly a long term project for us to complete the whole set of tables of SEEA.
