Supporting material for selected classifications and lists in the revised SEEA

Part I: General comments

This is the first global consultation based on the complete set of chapters for the SEEA Central Framework. In this section please provide general comments on the drafts chapters. You may like to consider providing comments on the style and tone, the content and coverage, and the general accessibility of the material.

Statistical Office of the Slovak Republic appreciates all efforts and hard work put in the preparations of the revised SEEA. In our opinion, the revised SEEA is well written and rather comprehensible for readers.

In general, the chapters seem well presented and appropriately cover the scope they deal with. The structure of the chapters is good and the content of particular chapters is adequately balanced.

We appreciate that our comments and suggestion as well as comments from other countries were taken into consideration and were supplemented into the drafts chapters.

Part II: Technical and other comments

In the box below please supply any additional comments including those of a more technical nature. As this is the first consultation where the complete 6 chapters have been released, comments on the consistency of the technical content across the chapters would be appreciated.

Please reference your responses with the relevant paragraph number or section number.
