General Explanation and Report Form

DEVELOPMENT OF THE REPORT FORM

Planning for the NASS organic production survey began in the fall of 2013. Report form content was developed with individuals from the organic industry and with representatives from other federal agencies. NASS pretested an early draft of the report form by conducting cognitive interviews with organic producers. Results from the cognitive interviews, along with recommendations from industry and federal representatives, were carefully considered before the final 2014 Organic Survey report form was completed.

TERMS AND DEFINITIONS

Acres and quantity harvested. Most crops were reported in whole and tenths of acres depending upon the commodity. Totals for crops reported in tenths of acres were rounded to whole acres at the aggregate level during the tabulation process. Nursery and greenhouse crops grown under glass or other protection were reported in square feet and are published in square feet. If a crop was planted but not harvested, the acres were not reported as harvested.

All other production expenses. See Production expenses.

Certifying agency. An agency or organization that, for an annual fee, certifies an operation's organic practices are in accordance with the USDA rules.

Certified organic commodity. Any commodity produced according to the National Organic Program standards. For more information, go to <http://www.ams.usda.gov> and select the National Organic Program.

Community Supported Agriculture (CSA). A type of operation intended to create a relationship

between farmers and consumers in which risks and bounties are shared. CSA customers buy shares for a season by paying a fee in advance. In return, they receive a regular (in most cases weekly) selection of food.

Consumer Direct Sales. This is the process of marketing directly to consumers. Sometimes it is called relationship marketing. U-Pick or Pick-Your-Own farms grow crops specifically to be harvested by customers. Community Supported Agriculture customers buy shares for a season by paying a fee in advance.

Cut Christmas trees. Data are for acres of organic Christmas trees – cut or to be cut – in production, number of trees cut, and value of sales.

Direct-to-retail marketing. This is an agreement between the producer/grower and the retailer (food store, restaurant, or institution) to provide a specific product. Generally, with specific quality standards.

EQIP Organic Initiative. A program administered by the National Resource Conservation Service (NRCS) which provides financial support and planning to help farmers implement conservation practices to support the environmental sustainability of their organic operations.

Exempt organic farms. These farms follow the NOP standards and expect to have less than \$5,000 in annual sales. Exempt farms may use the term organic but are not eligible to use the USDA Organic seal.

First point of sale. This is the first point at which money is exchanged for organic products.

Floriculture and bedding crops. This category includes annuals, herbaceous perennials, vegetable plants for sale, cut flowers and cut florist greens,

indoor foliage plants, potted flowering plants, and other floriculture and bedding plants including cacti and succulents.

Genetically Modified Organisms (GMOs). This refers to genetically modified crops used in agriculture, the DNA of which has been modified using genetic engineering techniques. In most cases the aim is to introduce a new trait to the plant that does not occur naturally in the species.

Livestock purchased or leased. See Production expenses.

Market value of all agricultural products sold. This is the gross value of sales before taxes and production expenses were deducted of all agricultural products, including organic products, sold or removed from the place in 2014 regardless of who received the payment.

Marketing contract. A verbal or written agreement reached before harvest of a crop or before completion of a livestock production stage, setting a price or pricing formula and market for the commodity.

Marketing practices. Data were collected for the types of marketing strategies employed by organic producers, including types of sales outlets used, first point of sales by location, and other marketing approaches.

National Organic Certification Cost-Share Program. This program provides cost-share assistance to organic crop and livestock producers who have been certified by a USDA accredited certifying agent. USDA has determined that payments will be limited to 75-percent of an individual producer's certification costs, up to a maximum of \$750.

National Organic Program (NOP). The Secretary of Agriculture appointed 15 individuals to develop, implement, and administer national production, handling, and labeling standards for organic agricultural products. The NOP also accredits the certifying agents (foreign and domestic) who inspect organic production and handling operations to certify they meet USDA standards.

Net household income. The measure of all income generated during a year (from on- and off-farm sources) including salary, investment earnings, child support, and alimony payments, minus all deductions.

Nursery crops, including aquatic plants. This category includes ornamentals, shrubs, shade trees, live Christmas trees (potted, balled and burlapped, etc.), fruit and nut trees grown for sale, vines, palms, ornamental grasses, and aquatic plants.

Organic. Any commodity produced according to the National Organic Program standards. For more information, go to <http://www.ams.usda.gov> and select the National Organic Program option.

Organic vegetables grown under protection. This category includes vegetables grown in greenhouses under glass, rigid plastic, and plastic film, including "tunnel" protection and hoop houses.

Other fruit. This category includes any fruit not listed on the report form.

Other organic cattle and calves. This category includes organic bulls, beef calves, replacement milk heifers, etc.

Other organic livestock. This category includes organic livestock not listed separately on the report form, such as farm raised bison, deer, rabbits, and fish.

Other organic livestock products. This category includes semen, embryos, manure that was sold, feathers, etc.

Other organic poultry. This category includes organic poultry not listed separately on the report form. It includes turkeys, ducks, quail, etc.

Other field crops. This category includes any field crops that did not have a specific code in the field crops section.

Other fruits, tree nuts, and berries. This category includes fruit data not listed separately on the report form. Grapes and apples were collected in separate

sections and their data are not included in this category.

Other vegetables. This category includes any vegetable not listed on the report form.

Peak inventory. This is the largest number of individual specie of livestock and poultry on the operation during 2014.

Price premium received for products from transitioning land. This is the number of farms that received a price premium, over conventional price of the product, measured in percent, for products that were produced on transitional land.

Primary production challenge. This represents the primary challenge as an organic farmer selected by the respondent. The choices were regulatory problems, price issues, production problems, market access, management issues, or other challenges.

Processed products. This includes products that were altered by heat, pressure, and/or freezing temperatures.

Production contract. A verbal or written agreement between the producer or grower and a contractor (integrator) setting terms, conditions, and fees to be paid by the contractor to the operation for the production of crops, livestock, or poultry.

Production expenses. Includes expenses incurred by the farm operation for the production of organic commodities. This includes the production expenses provided by the operators, partners, landlords (excluding property taxes), and production contractors.

Livestock purchased or leased. These expenses include all breeding livestock and poultry purchased.

Utilities. These are expenses for the organic portion of the farm share cost of electricity, telephone charges, internet fees, and water purchased in 2014.

All other production expenses. This category includes all expenses not listed on the report form. Examples include animal health costs, storage and warehousing, marketing and ginning expenses, insurance, etc. Health expenses and payroll taxes were excluded.

Propagative materials sold. This category includes dry bulbs, corms, rhizomes, and tubers; cuttings, seedlings, liners, and plugs; flower and vegetable seeds; tobacco plants sold for transplant to farm fields (exclude transplants to be planted on the same operation); vegetable transplants sold for transplant to farm fields; and sod harvested (acres in the open only).

Transitioning land. This is land in the process of becoming organic land that has not yet met the time requirement, which is usually 3 years.

Value-added. Any activity or service occurring after agricultural production that adds value. Some examples of adding value to commodities produced on the farm are: bottling milk; making cheese; processing or curing meat; producing wine, cider, juice, or jam; butchering livestock; and handcrafting milled or ground grains.

Value of sales. This is the gross value of sales before taxes and production expenses of all organic agricultural products sold or removed from the place in 2014 regardless of who received the payment. The gross value of sales is at the commodity level and does not include value-added organic products.

SECTION 1 OPERATION INFORMATION

1. Did this operation have any **Certified Organic** production as determined by the **USDA's National Organic Program (NOP)** standards in **2014**?

111 **Yes** - What is the name of the certifying agency or organization?

119

→ Go to Item 2

No - Did this operation have any **USDA NOP** organic production in 2014 that was **exempt** from certification (under \$5,000 in annual organic sales)? (**Exclude** transitional acres.)

113

Yes - Go to Item 2 **No** - Go to Section 16, Transitional Acreage on Page 15

2. In 2014, how many:

- a. **Organic** acres did this operator **own**? 150
- b. **Organic** acres did this operator **rent or lease from** others? 152 **+**
- c. **Organic** acres did this operator **rent or lease to** others? 115 **-**

3. [Calculate Items 2a + 2b - 2c] Then the **total organic acres operated** in **2014** were: 154 **=**

4. Of the total (Item 3) organic acres operated in 2014, how many acres were **organic pastureland or rangeland**? 122

[If Item 1a is 100%, go to Section 10; otherwise, continue]

2. Which of the following best describes the reason why crop insurance was not purchased for the uninsured organic acres in 2014? (Check one)

- 512
- 1 Too expensive
 - 2 Unfamiliar with crop insurance
 - 3 Other (specify): ⁵¹³

SECTION 10 GMO PRESENCE IN ORGANIC CROPS

1. Have you experienced economic losses that you can document due to unintended presence of GMO material in an organic crop you have produced for sale? (**Exclude** expenses for preventative measures and testing of your crop.)

7000 **Yes** - Continue **No** - Go to Section 11

a. Please list the three most recent occurrences of a loss including: the year, organic crop, quantity affected by GMO material, unit of measure, and the economic loss (\$/unit).

Instruction Sheet

2014 Organic Survey

COMPLETING THE 2014 REPORT FORM

Make all entries clear and easy to read. Use a **blue** or **black** ball point pen. Enter your answers in the proper spaces and in the units requested, i.e., number of acres, dollars, percent, etc. Mark all applicable Yes/No boxes with an "X."

Refer to the instructions below for completing your report form. The report form was mailed to agricultural producers and growers throughout the United States. Because it is meant for use in all parts of the country, it may contain items and inquiries which do not apply to your operation. In this case, mark the "No" or "None" box and go on to the next item or section.

If You Did Not Have Any Certified Organic Production as Determined by the USDA's National Organic Program (NOP) standards in 2014 OR Did Not Have USDA NOP Organic Production exempt from Certification (Under \$5,000 in Annual Organic Sales) in 2014

In Section 1, item 1, select both "No's," then go to Section 16 and Section 17.

If You Did Not Operate Any Agricultural Land in 2014

Write "Did not operate agricultural land in 2014" below the address label on the report form then go to Section 17 and complete the remainder of the report form. Mail the completed report form in the return envelope.

Partial Year Operation

If you stopped farming at any time during 2014, complete the report form for the portion of 2014 that you did farm. Write "Stopped farming in 2014" and the date you stopped farming below the address label on the report form and mail the completed report form in the return envelope.

If You Receive More Than One Report Form for the Same Operation

Return any duplicate report forms in the same envelope with the completed report form(s). In the address area of the report form(s) you complete, write the 11-digit ID number from the address label of the extra report form(s).

Partnership Operations

Complete only ONE report form for a partnership operation and include all partners' shares on the same report form. If two or more report forms were received for the partnership, see instruction on "If You Receive More Than One Report Form for the Same Operation" above.

REPORTING VALUE OF SALES

Report the value of all crops and livestock sold from this operation in 2014 in the appropriate commodity section. Report the sales in 2014 regardless of the year crops were harvested or raised. Include the value of your landlord's share of the commodities harvested. Report commodities as sold that you owned and moved to someone else's operation for further feeding, such as cattle. Report the gross value before the deduction of expenses, fees, or income taxes. Include payments received in 2014 from cooperatives or marketing organizations for crops produced on this operation regardless of the year in which the crops were harvested. Also, include as sales your estimate of the value of any crop or livestock removed from

this operation in trade of services, such as baled hay for labor or other services. Report the total value you received for animals and poultry sold from this operation in 2014, without deducting production or marketing expenses (cost of feed, cost of livestock purchased, cost of hauling and selling, etc).

Do NOT include:

- Proceeds from CCC loans or other government payments.
- The value of sales of any cattle, hogs, or poultry owned by you but kept and sold from a location you did not operate.
- The value of commodities grown under a production contract.

INSTRUCTIONS BY SECTION

SECTION 1 ORGANIC PRODUCTION SCREENER/OPERATION INFORMATION

Item 1 – The operation must either have 1) certified organic production as determined by the USDA's National Organic Program (NOP) standards or 2) USDA NOP organic production exempt from certification (under \$5,000 in annual organic sales). Operations that neither certified organic or exempt from organic certification should select both "No's" in item 1 and go to Section 16 and Section 17.

Items 2a – 2c – Report in whole number the numbers the organic acres owned, leased from others, and/or leased to others.

Item 3 – Calculate and report the sum of items 2a – 2c.

Item 4 – Report in whole numbers the number of organic acres reported in item 3 that were pastureland or rangeland.

SECTION 2 ORGANIC FIELD CROPS

Field Crops – If not preprinted, enter the name and code of the crop(s) harvested in 2014 from the Crop Code box on the bottom of the page. If a crop is not listed, select the code that best fits its description (Field Crop not listed, Dry beans not listed or Chickpeas not listed) and write in the name of the crop. If additional space is needed to report a crop and its production, use a separate piece of paper.

Organic Acres Harvested – Enter the acres harvested in 2014. Round fractions to whole acres.

Organic Production – Enter the total amount of production using the appropriate unit.

QUANTITY of Organic Production Sold As Organic/Conventional – Report all organic production that was sold in an organic market and organic production that could not be sold in an organic market (for example: excess production, no organic outlet, etc.).

GROSS VALUE of Organic Production Sold As Organic/Conventional – Enter the gross value of organic production sold as organic and the gross value that was sold as conventional. See 'REPORTING VALUE OF SALES' for further instruction.

SECTION 3 ORGANIC GRAPES

Items 2a & 2b - Acreage and Production – Enter the total number of bearing age organic grape acres harvested in 2014 to the tenth of an acre. Enter the total amount of organic grape production in 2014 to the tenth of a pound.

Item 2c - Quantity and Gross Value Sold – Enter the quantity of production that was sold as organic and the quantity sold as conventional to the tenth of a pound. Enter the gross value of organic production

sold as organic and the gross value that was sold as conventional. See 'REPORTING VALUE OF SALES' for further instruction.

Item 3 - Marketing Contract Arrangement – A verbal or written agreement, reached before harvest of a crop, setting a price or pricing formula and market for the commodity. The operation usually owns the commodity prior to delivery.

SECTION 4 CERTIFIED ORGANIC APPLES

Apple Variety – If not preprinted, enter the name and code of the apple variety(ies) harvested in 2014 from the Apple Variety Code box on the bottom of the page. If an apple variety is not listed, select the code that best fits its description (Varieties not listed, fresh or Varieties not listed, processing) and write in the name of the apple. If additional space is needed to report an apple variety and its production, use a separate piece of paper.

FRESH Utilization: Apples sold as a whole fresh fruit.

PROCESSED Utilization: Apples sold in a processed form such as apple juice, cider, dried, frozen and canned.

Organic Acres Harvested – Enter the organic acres harvested 2014 in whole and tenth acres.

Production/Unit/Pounds per Unit – Report the total amount produced in 2014. Report production using the appropriate unit and also report the lbs per unit. (Example: Gala fresh, 400, bushels, 48 lbs/bushel.) Appropriate units include: lbs, cwt, tons, bushels, boxes/baskets, bins, and other.
