

UNEP

AEIN/AEO/GEO processes

Workshop on Environmental
Statistics,
ECOWAS

Abuja, 19-23 May 2008

**To keep under review
the
state of the global
environment....**

*UNGA Resolution 2997 (XXVII) of
1972*

“The environment is the basis for achieving prosperity, stability and equity is sustained”

*The environment arm of the UN....
As part of the UN Reforms....*

□ Climate Change:

- Strengthen vulnerable states resilience to a changing climate
- Facilitate the transition of a low greenhouse gas emission global economy

□ Ecosystem management:

- Manage ecosystems to enhance human well-being

□ Environmental Governance:

- Structures and means of environmental governance are strengthened for effective decision-making and action

□ Hazardous Substances:

- Minimize the environmental and human impact of harmful substances

□ Natural disasters and post conflict response:

- Minimize environmental threats to human well-being from conflicts, disasters and industrial accidents

□ Resource efficiency:

- Natural resources are used and consumed in an environmentally sustainable way

DEWA Mission

- ❑ adding essential value to environmental data and information as input to and follow-up from intergovernmental decision-making processes;
- ❑ the authoritative resource within the UN system for scientifically credible, environmental assessment tools and methodologies to support national sustainable development planning and implementation;

UNEP Programme Areas

UNEP assessments concerned with sustainable development, taking into account its three pillars, *Social, economic and environment*

- The flagship vehicle of the UNEP integrated environmental assessment and reporting work is the **Global Environment Outlook (GEO) process - integrated environmental assessment and reporting (IEA)**.
- The **GEO process**: a consultative, participatory, capacity building process initiated by UNEP for global environmental assessment and reporting

GEO env assessment Products

- ❑ Analyze environmental change, causes and impacts, and policy responses over time
- ❑ Such responses include MEAs and their impacts on addressing challenges
- ❑ Communicates, raises awareness, provides policy options

AEO-2 Report and process

- ❑ Provides an integrated analysis of emerging issues under the NEPAD Environment Action Plan thematic areas, focusing on the driving forces, the impacts on human vulnerability. Also highlights opportunities
- ❑ Helps track regional level progress in terms of meeting the environmental targets set under the Millennium Development Goals (MDG).

NOTE: All the 8 goals are critical to SD in Africa

AFRICA ENVIRONMENT OUTLOOK 2

.....
Our Environment, Our Wealth

THE AEO/GEO Pyramid

nested products
global/regional/national.../thematic

IEA

harmonized processes

Underpinned by sound data and science

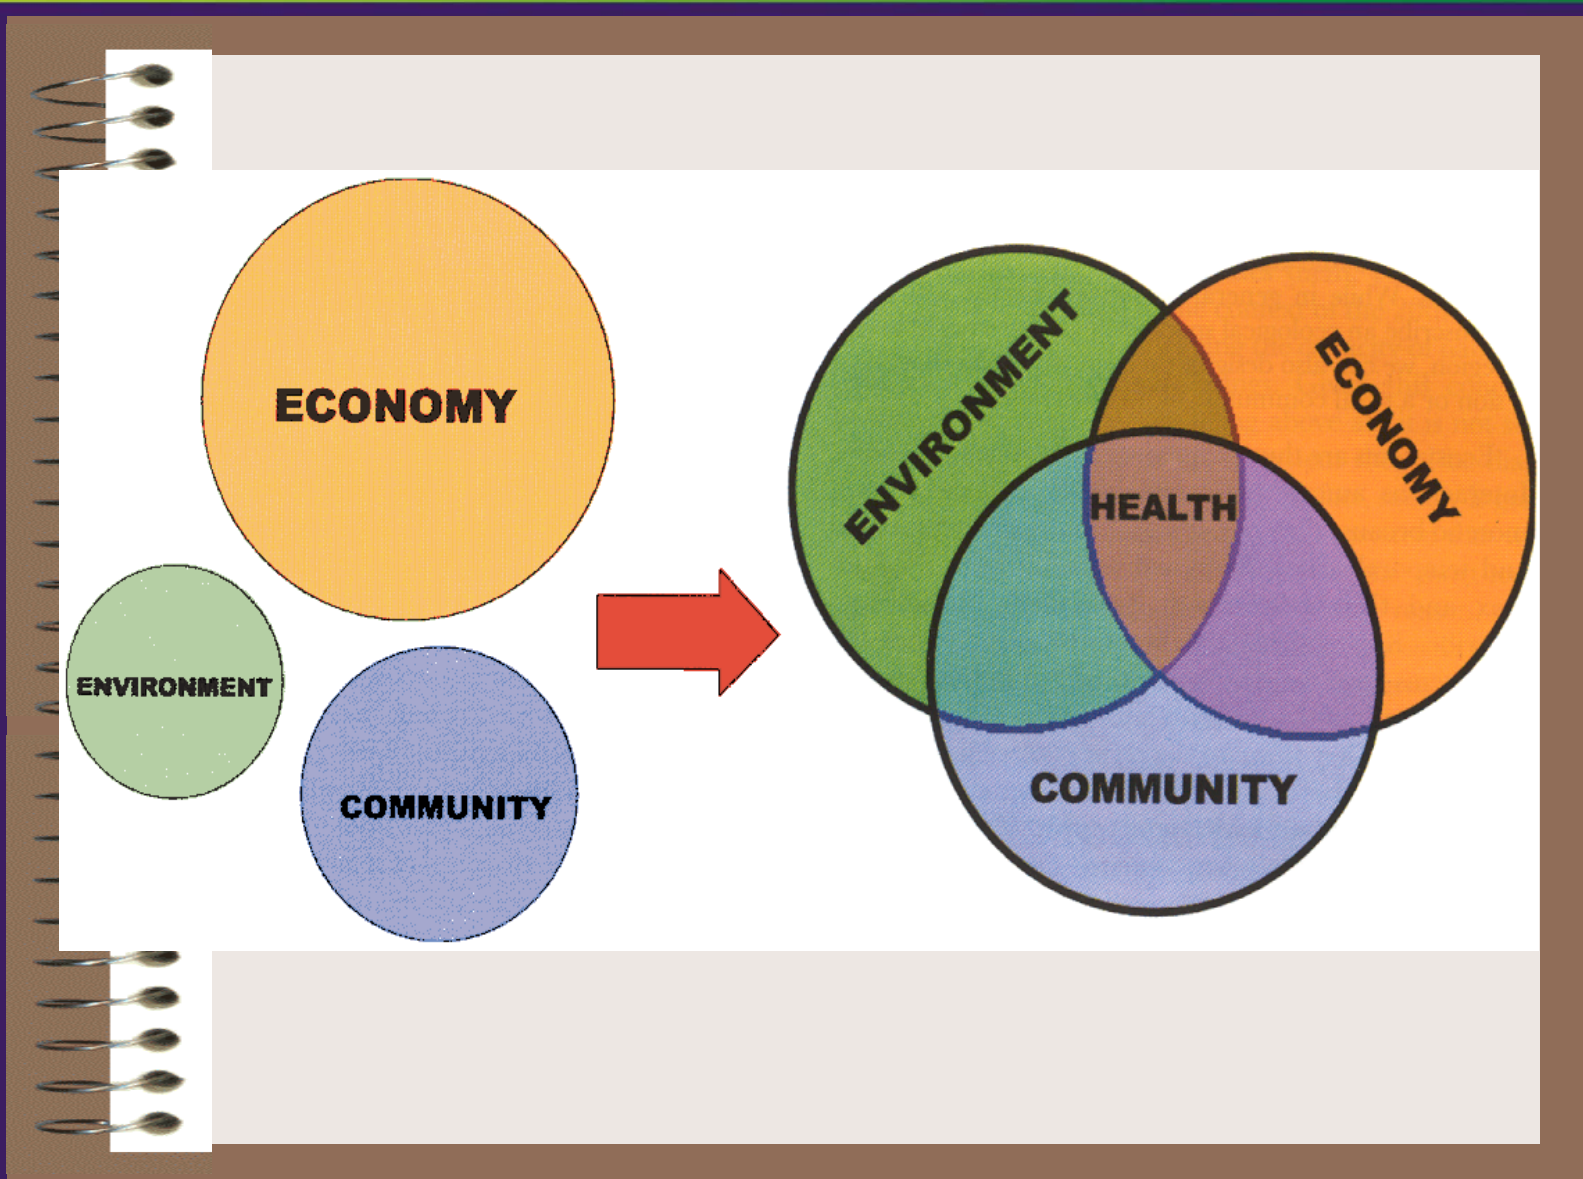

Africa Environment Information Network (AEIN)

- ❑ an AMCEN initiative is to support the national, sub-regional and the Africa Environment Outlook (AEO) reporting process
- ❑ Goal - to enhance accessibility to more reliable environmental data and information at national level for the environmental assessment and reporting in the region (countries, sub-regions and Africa)

Integration - IEA

What is AEIN?

- ❑ **Network promoting access to harmonised data**
 - ❑ Basis for tracking environmental changes in the countries, sub-regions and in Africa
- ❑ **Policy-level demand-driven**
 - ❑ AMCEN initiative to support Africa Environment Outlook process (state, trends, outlook, policy options)
 - ❑ Support to regional SD initiatives (NEPAD)
- ❑ **Country-level focus and implementation**
 - ❑ Focus on priority national needs and ownership
 - ❑ Capacity building for data & Info mgt and integrated assessments and reporting
 - ❑ Environment information input into SD processes

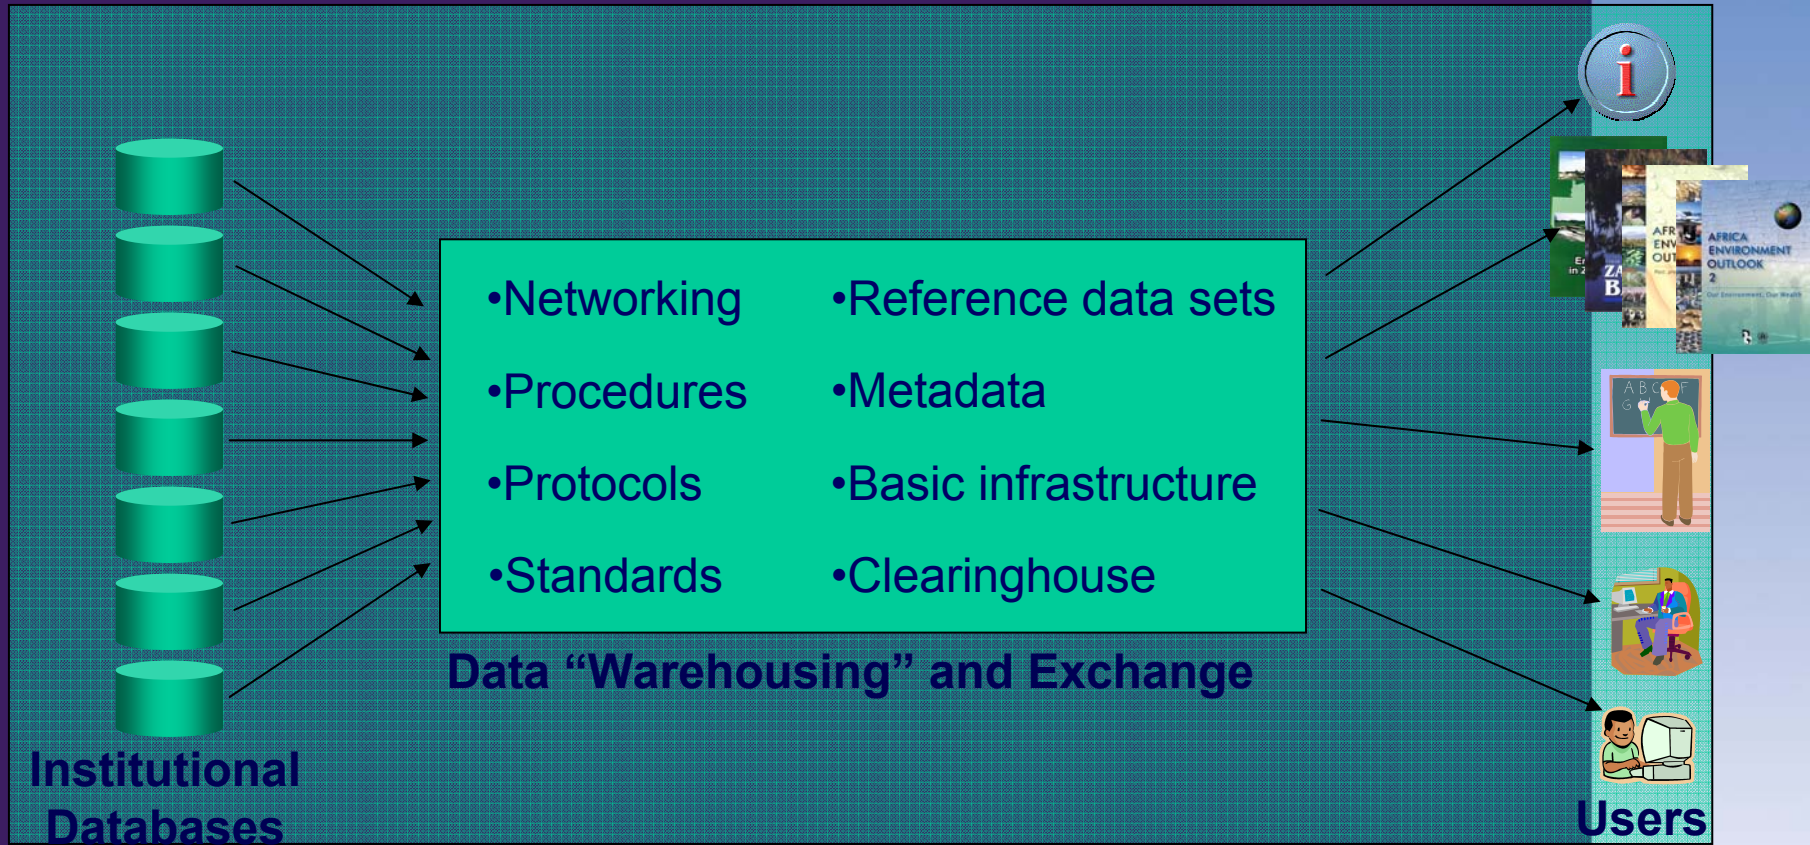

What is AEIN?

- ❑ **Platform for collaboration and partnership with on-going initiatives**
 - ❑ **Common framework for coordination and harmonisation of reporting (MEAs)**
 - ❑ **Shared data resources**
 - ❑ **Institutional networking**
 - ❑ **Participatory and collaborative partnership**

- ❑ **International support and partnerships**
 - ❑ **UNEP – currently taking the lead**
 - ❑ **Looking at involving other UN agencies (UNDP, UNSD, FAO, UN-HABITAT, UNECA, etc) to support CCA/UNDAF process**
 - ❑ **Donors**

Data Exchange Platform - Vision

Data should be collected, harmonized and quality-assured once, and then made available for use by many users, and in multiple information products.

AEIN Overall Objectives

- To build **capacity** for the development and management of **core datasets** and Facilitate access to environmental data and information to improve good governance and public participation in decision-making;
- To support and catalyze **institutional networking and capacities** related to the collection, collating and management of statistics, data and information at the sub-national, national, sub-regional, and regional levels

AEIN Specific objectives

- ❑ To assess the **status of information networking activities, data availability/gaps** in respective African countries;
- ❑ To strengthen networking (**data/information exchanges, knowledge/expertise sharing, etc.**) at the national and sub-regional levels;
- ❑ To **develop and test information management tools, collect, collate data, and develop compendia** and other data products from existing data sources;

AEIN Specific objectives - cont

- ❑ To develop **quantitative indicators** of environmental change for use in characterizing emerging issues, and for assessing impacts of such changes on human vulnerability at national, sub-regional and regional levels;
- ❑ To build **capacity for using information management tools and methodologies** for producing or (re-)packaging information for various target groups;
- ❑ Support AEIN countries prepare **national environment Outlook reports** (state, trends, outlook, policy options for actions).

Collaboration and Partnerships

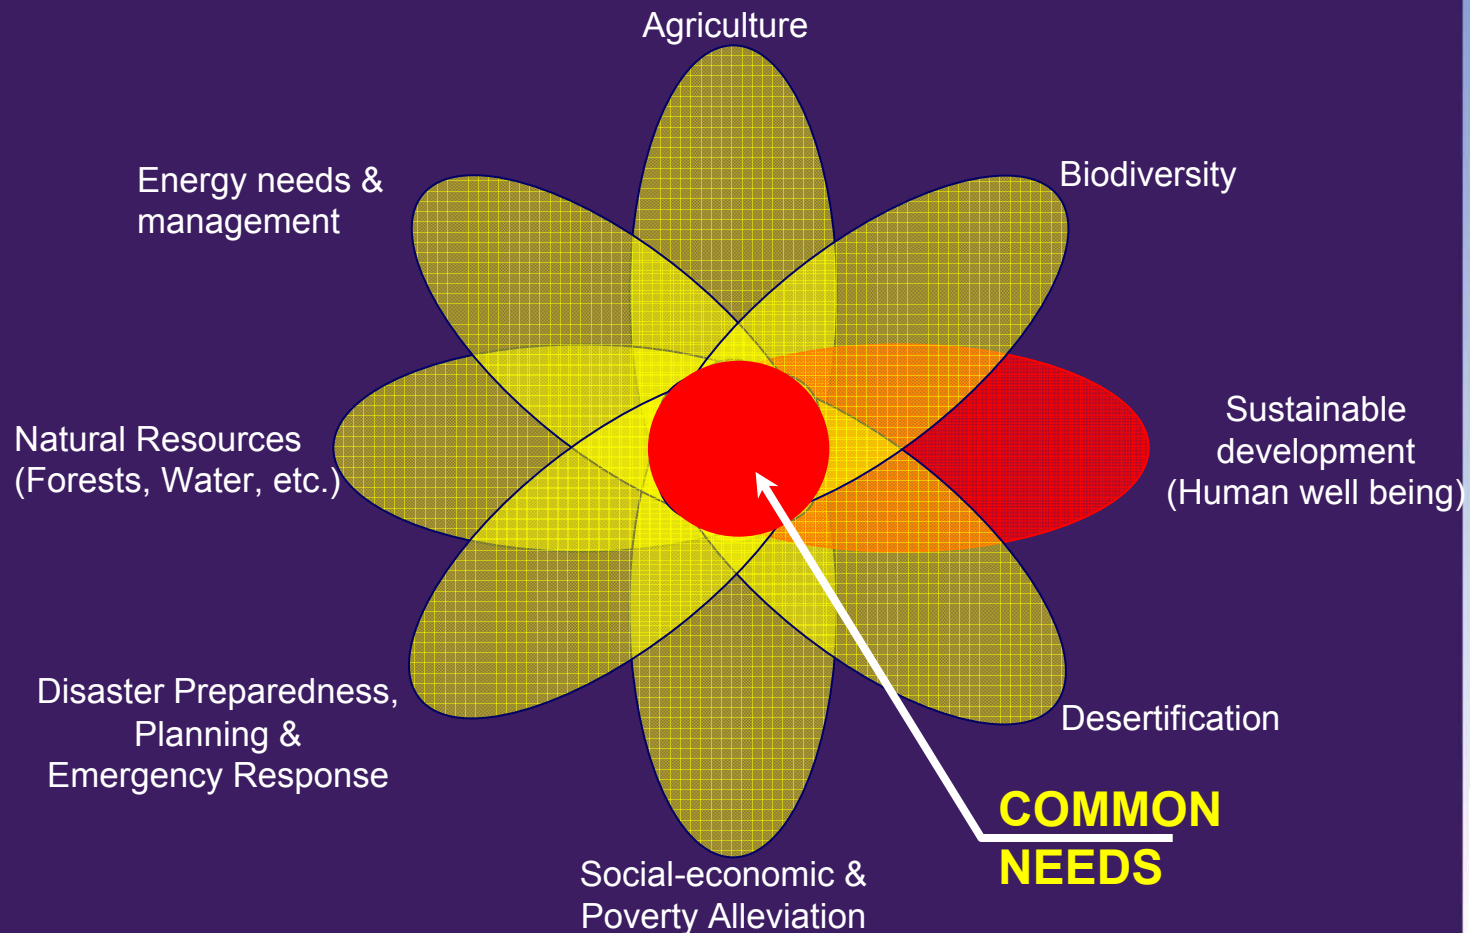

Domains of overlapping needs

Coincidence of opportunities

Synergy, lower “project” costs

Opportunities for cost-sharing

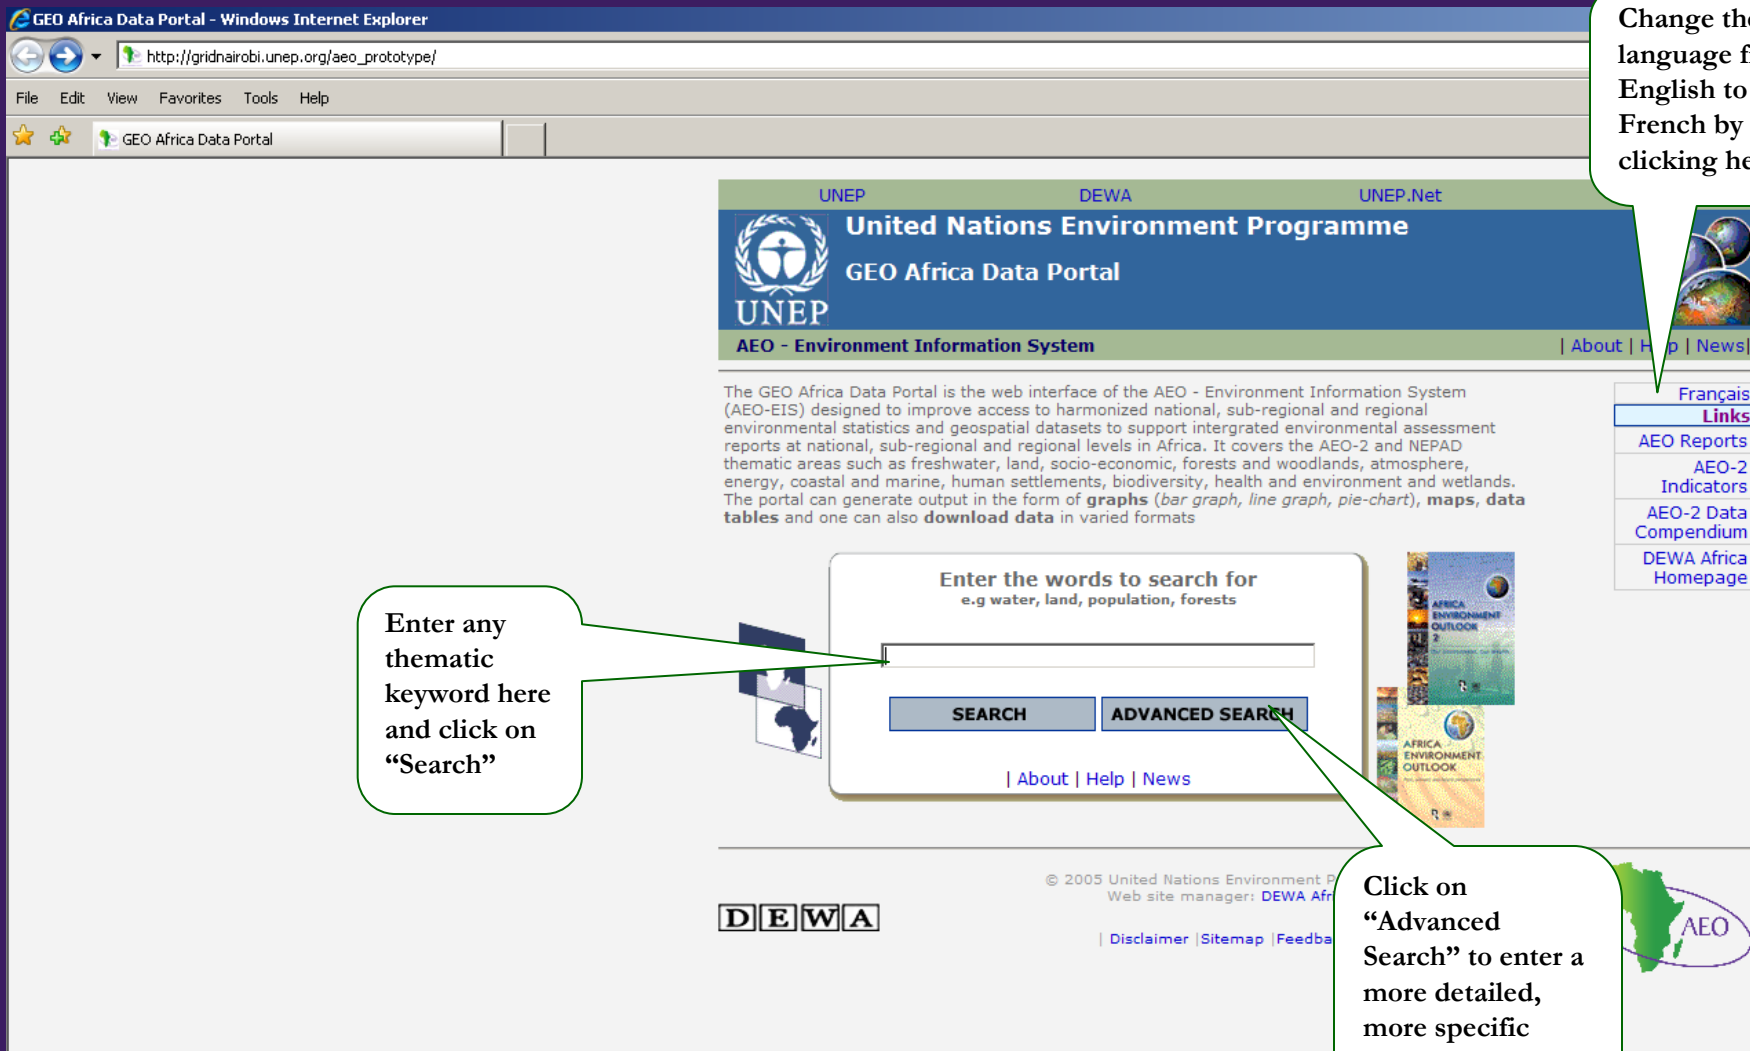

Bali Strategic Plan (BSP)

- ❑ This workshop and its outcomes is part of the implementation of the Bali Strategic Plan for Technology Support and Capacity Building, para 3 (a), para 5, 10, 11, 22 and 23 which emphasizes:
 - ❑ need for country ownership,
 - ❑ country specific capacity building needs,
 - ❑ data collection, research and analysis to support decision-making in governments.

GEO Africa Data Portal

Systeme d'information environnemental De l'AEO
[A propos](#) | [Aide](#) | [Nouvelles](#)

Le portail de données de GEO Afrique est l'interface d'enchaînement du système d'information d'environnement d'AEO conçu pour améliorer l'accès au national, statistiques régionales régionales et secondaires et ensembles de données géospatial pour l'évaluation environnementale intégrée et reportage en Afrique. Il couvre l'AEO et les domaines thématiques de NEPAD tels que l'eau douce, terre, socio-économique, forêts et régions boisées, l'atmosphère, énergie, côtier et marin, règlements humains, biodiversité, marécages de santé et d'environnement et désastre normal. Le portail peut produire du rendement tel que des **graphiques** (barre analogique, graphe linéaire, graphique circulaire), **cartes**, les **tables et une de données** peuvent également **télécharger des données** dans des formats divers

GEO Africa Data Portal

AEO - Environment Information System | [About](#) | [Help](#) | [News](#)

The GEO Africa Data Portal is the web interface of the AEO - Environment Information System (AEO-EIS) designed to improve access to harmonized national, sub-regional and regional environmental statistics and geospatial datasets to support intergrated environmental assessment reports at national, sub-regional and regional levels in Africa. It covers the AEO-2 and NEPAD thematic areas such as freshwater, land, socio-economic, forests and woodlands, atmosphere, energy, coastal and marine, human settlements, biodiversity, health and environment and wetlands. The portal can generate output in the form of **graphs** (*bar graph, line graph, pie-chart*), **maps, data tables** and one can also **download data** in varied formats

Select the region based on the region data you want to conduct your search on. To select multiple sub regions/countries /cities, hold down the Ctrl-button of the keyboard.

Select the theme and environmental issue.

Select the indicator type and indicator.

Select the source and the year range for your query.

Option for viewing results

The screenshot shows a web browser window displaying the GEO Africa Data Portal. The browser's address bar shows the URL: http://gridnairobi.unep.org/aeo_prototype/AdvancedSearch/option.asp. The website header includes the UNEP logo and the text "United Nations Environment Programme GEO Africa Data Portal AEO Environment Information System". Navigation tabs for "Home", "Advanced Search", and "Option" are visible, with "Option" being the active tab. Below the tabs, a section titled "Select an option" presents five choices: "Show Values", "Show Metadata", "Draw Graph", "Draw Map", and "Download Data". Each option is accompanied by a small representative image: a table for "Show Values", a metadata list for "Show Metadata", a bar chart for "Draw Graph", a map of Africa for "Draw Map", and a download dialog box for "Download Data". A green box at the bottom of the page contains the text "Select any of these five modules to view or download the results", with five green arrows pointing from this box to each of the five option modules. The footer of the page includes the DEWA logo, copyright information for 2005, and a logo for AEO (Africa Environment Outlook).
