

Climate Change data at the OECD: IPAC and IFCMA

IPAC – foundational data (2024)

- Foundational data with key indicators based on the Pressure-state-response framework.
- 1. **Pressures:** GHG emissions and targets
 - Complete, declassified GHG emissions data for all countries.
 - NDC and net-zero targets
- 2. **State:** Climate-related hazards
 - 7 climate-related exposure indicators all countries
- 3. **Response:** Climate Actions and Policies Measurement Framework (CAPMF) - 50 countries.
 - 56 policies and 130 variables

IFCMA – analytical (2025-26)

- A detailed policy database 70 countries
- Comparable metrics for assessing policy effectiveness.
 - Common typology
 - Detailed granular policy database with over 30 policy attributes
 - Including data for GHG emissions mapping, modelling, policy analysis, and asset level GHG emissions.
