- INFORMATION VARIFICATION

- Forest management, forest protection issues, use of forests and products

- CAPACITY
- REGULATION & ENFORCEMENT
- PLANTING & EXTRACTION
- COLLABORATION & CO-MANAGEMENT
- INFORMATION SHARING
- OBLIGATIONS (MEA's etc)

- Reporting to FAO's Forest Resources Assessments (http://www.fao.org/forest-resources-assessment/en/)?

Grenada FRA 2020 reporting tables Report preparation and contact persons The present report was prepared by the following person(s)

Dear Mr Anthony Jeremiah, I have the pleasure to inform you that the data collection process for the Global Forest Resources Assessment 2020 (FRA 2020) of the Food and Agriculture Organization of the United Nations (FAO) has now been completed. Around 180 officially nominated National Correspondents (NCs) have successfully finalized and submitted their FRA 2020 Reports which have been reviewed by the FRA Secretariat. The reported data will soon be analysed and the reports will be published in mid-2020. I would like to express my sincere gratitude to you and your staff for the excellent contribution to the FRA 2020 data collection process. By means of this letter, I would like to invite you to review and validate the attached FRA 2020 reporting tables before we proceed with their final analysis to derive regional and global statistics. In case you wish to review the full report, please contact your NC. Should no comments be received by 23 October 2019, it will be assumed that there are no objections to its publication. Y

- Extent of forest and other wooded land
- Forest Characteristics
- Specific Forest categories
- Growing Stock
- Biomass Stock
- Carbon Stock
- Designated management Objectives
- Forests areas within protected areas with long term management plans
- Areas affected by Fire
- Sustainable Development Goals

- Is the attached data compiled from international sources (please see sheet 6) coherent with national data?

- Not yet seen??

Q&A

THANK YOU
