Challenges
Early withdrawal of Omani women from the labour market

Graph showing the percentage of males and females withdrawing from the labour market by age group and year.
Possible Reasons for early withdrawal:

1. Depression stemming from the long period of searching for work.
2. Family responsibilities related to giving birth and maintaining the family.
4. The limitation of employment opportunities for women in regions and governorates other than Muscat.
(2) Increasing number of Omani females searching for jobs:

- 65% of Omani searching for job are in the age group of (20-29) years.

- The percentage of Omani females searching for job was 44% and 38.5% respectively in 2003 and 2010 of the total female Omani labour force, compared to 22% and 19% for their counterpart males.
(i) Educational level

(ii) Previous experience of work

- around 96% of Omani women searching for a job have never worked before, 33% of them are resident of Al Batinah region and 16% reside in Muscat Governorate.
- As with regard to women searching for work who have worked before, (42%) live in Muscat Governorate and 26% in Al Batinah region.
iii) Average length of period for searching for jobs, 2008

iX) Vocational Training, 2008

- 47% of females searching for work (15 years and above) had joined short vocational training courses, compared to 30% males.
- 73% of females and 63% of male who joined these courses said that the training provided them with qualification suitable for the available jobs.
3. Nature of Work

- Omani women searching for work prefer office work (58%) as compared to other jobs, compared to 27.5% males in 2008.
- 26% of females searching for work expressed their unwillingness to work in the private sector as against 10% of males searching for work.

Recomendations

1. Most of these challenges require intensive awareness effort to be directed at women with regard to the importance of work in all fronts.
2. Other efforts should also be directed at the employment procedures pertinent to employment of women in the different jobs available in the private sector.
3. Further information should be collected in future surveys regarding the reasons for early withdrawal from labour market.
Thank You
