Global Review of Gender Statistics
Preliminary results for Africa Region
- A few highlights

Global Forum on Gender Statistics
27-29 March 2012
Dead Sea, Jordan
Response

- 20 countries in the region responded
- Angola, Burkina Faso, Cameroon, Djibouti, Egypt, Ethiopia, Ghana, Ivory Coast, Kenya, Madagascar, Malawi, Mozambique, Nigeria, Senegal, Tanzania, Tunisia Uganda, Zambia and Zimbabwe – (10 Anglophone and 10 Francophone)
- Countries being followed up
- Gaps and inconsistencies exists – need to engage with the countries to improve
Institutional arrangement

Gender Statistics Entities within the NSOs or other office in NSS

- GS Focal Points in NSO: 11
- GS Focal Points in different offices within the NSOs: 7
- GS dedicated office within the NSO: 7
- GS Focal points in different government departments/ministries: 18
- GS working group, advisory groups etc.: 8

In 13 countries out of 20 GS entities within NSO report directly to the Chief Statistician.

Others report to heads of sections, departments – mainly demography, social statistics.
Main tasks of the GS entities within the NSOs (20 responses)

Top three tasks

- Answering requests for gender statistics (17)
- Compiling GS data (14)
- Disseminating gender statistics (14)

Bottom three tasks

- Introducing statistics in gender training and sensitization workshops (7)
- Organization of gender statistics related national training (5)
- Integrating gender perspective in statistics training (3)
Ministries generating gender statistics (19 responses)

- Ministry of education: 17
- Ministry of health: 17
- Ministry of labour (or employment): 16
- Ministry of commerce (or trade): 5
- Ministry of social inclusion (or social development): 4
- Ministry of equal opportunity: 2
Coordination mechanisms

• Only 8 out of 19 countries have inter-ministerial mechanism for coordinating gender statistics at the national level. 2 countries have informal mechanisms (eg. team of focal points, User-producer workshops)

• NSO is the main office which coordinates gender statistics in most of the countries (15), their main role being a) compilation of data received and b) producing main statistical outputs

• NSO works jointly mainly with Ministries of health, education and labour mainly in the area of data compilation and dissemination
Institutional arrangement (contd)

Only 5 out of 20 countries reported to have dedicated budget and 8 receive funds as and when required
Production of Gender Statistics

The main areas of for which gender statistics is produced regularly (19 responses)

- Poverty (15), Unemployment (14), Education and Training (14), Mortality (14) and Sexual and reproductive health (14)

Areas for which gender statistics not produced regularly

- Media (5), ICT (5), Entrepreneurship (4) and Satellite Account (3)
Production of Gender Statistics (contd.)

The primary data sources for gender statistics (20 responses)

**Most**
- Population Census: 19
- DHS, MICS etc.: 19
- Living Standard Survey: 19
- Labour Force Survey: 19
- Education administrative records: 18

**Least**
- Time use surveys: 10
- Population registers: 5
- Media records: 3
- Shelter records: 2
Addressing users’ need

10 out of 20 countries have a mechanism for collaboration and dialogue between users and producers

Others have ad hoc arrangements such as workshops, round tables, infrequent meetings

The areas of gender statistics that is reported to be most influenced by such dialogues are Concepts/definitions/measurements and Data collection programmes
Gender mainstreaming in national statistical system

National programme documents that contain requirements for the compilation and production of gender statistics (18 responses)

NSDS (12), Strategy on mainstreaming of GS (2), Activity plan (5)

Others include (some examples)

- Strategy Paper for Growth and Employment (Cameroon)
- National Strategy for Integrating Women and Development (Djibouti)
- Ghana Shared Growth and Development (Ghana)
- National Gender Policy (Nigeria)
Overall objectives of the NSS in GS (some examples)

• Better knowledge of gender issues for better integration of women (Cote d’Ivoire)
• Mainstreaming gender in socio-economic and demographic surveys: Collect and Compile (Ethiopia)
• To collect, compile and disseminate data on gender statistics in order to formulate better policies and monitor their progress (Ghana)
• Integrate gender in order to adequately meet the need of users (Senegal)
• To be able to generate gender disaggregated statistics with a view to facilitate the formulation of gender sensitive policies (Zambia)
Gender mainstreaming in national statistical system (contd.)

Only 2 out of the 16 countries have stated to have fully achieved the stated objectives and 10 partially achieved.

Varied reasons for meeting the objectives – organizing workshops and training programmes was reported by 6 countries.

Most common reason stated for not meeting the objective – Lack of financial and human resources and Lack of political will.
Gender mainstreaming in national statistical system (contd.)

Areas where full success has been achieved in developing of GS (18 responses)

- Improving concepts and definitions: 8
- Improving data dissemination: 7
- Increasing capacity to present and analyze: 6
- New data collection to fill in data gap: 4
- Use in policy making: 4
- Training in GS: 4
Laws and regulations governing the production and dissemination of GS (20 responses)

Statistics Law (14)
Statistics regulation (4)
National statistics action plan (4)
Gender related law (2)
Gender related regulation (2)
Gender related national action plan (7)
None (4)
Only 2 out of the 16 countries have stated to have fully achieved the stated objectives and 10 partially achieved.

Varied reasons for meeting the objectives – organizing workshops and training programmes was reported by 6 countries.

Most common reason stated for not meeting the objective – lack of financial and human resources and lack of political will.
Comments and suggestions for international work on GS

Most suggestions relate to

• Development of manuals and guidelines

• Training and sharing of best practices

• Harmonizing of concepts and definitions
Summary

Too early to draw specific conclusions

Wide variations among countries – at different levels of progress

In many countries ad hoc approach to the development and mainstreaming of GS – challenges in institutional, coordination and technical areas

Training seems to be the most neglected area and most sought after support
Thanks
