

# gender statistics

Il Global Forum è un'occasione per rilanciare a livello internazionale, dopo la Quarta Conferenza mondiale delle donne di Pechino del 1995, le statistiche di genere, prezioso strumento per la progettazione di politiche mirate. L'obiettivo è quello di sviluppare l'azione sia degli organismi internazionali sia degli istituti nazionali di statistica, valorizzando le migliori esperienze e promuovendo un confronto tra utenti e produttori di statistiche.

After the IV World Conference on Women, held in Beijing in 1995, this World Forum represents the opportunity for relaunching at an international level gender statistics, an important tool for developing specific policies. The main aim is to foster the action of international organizations and national institutes for statistics, emphasizing their best experiences and promoting the debate between users and producers.
