Eighth United Nations Regional Cartographic Conference for the Americas
New York, 27 June-1 July 2005
Item 6 of the provisional agenda*

Reports on the implementation of resolutions adopted at the Seventh
United Nations Regional Cartographic Conference for the Americas

Land administration and spatial data infrastructure:
Special Forum on the Development of Land Information
Policies in the Americas**

* E/CONF.96/1.
** Prepared by John Parker (Australia) and Stig Enemark (Denmark) (International Federation of Surveyors).
“Land Administration and Spatial Data Infrastructure: the Special Forum on Development of Land Information Policies in the Americas, Aguascalientes, Mexico”

John R Parker, Australia and Stig Enemark, Denmark
International Federation of Surveyors (FIG)

Key words: Land administration, Land policies, Land information.

SUMMARY

As a result of a resolution at the Seventh United Nations Regional Cartographic Conference for the Americas (UNRCCA) held in January 2001 in New York, a Special Forum was hosted by the Government of Mexico through INEGI at their headquarters in Aguascalientes on 26 and 27 October 2004 with a theme of “The Development of Land Information Policies in the Americas”. FIG was tasked with taking the lead role in planning and arranging the Special Forum.

The objective of this inter-regional forum was to establish an awareness of the economic and social value for decision makers, of the importance of developing land policies that effectively and efficiently incorporate appropriate spatial data infrastructures, including an understanding of the value of integrating the land administration/cadastre/land registration function with the topographic mapping function.

This paper presents an overview of the profile and the outcome of the special forum in terms of the “Aguascalientes Statement” which is tabled at the Eighth UNRCC-A, June 2005 in New York.

Papers and presentations can be viewed at http://www.fig.net/pub/mexico/index.htm
