**LEADERSHIP DETAILS**
• Chairperson and Deputy Chairperson

**TERM OF OFFICE**
• Term of office: from: **2014/11/01 to 2017/11/30**
• The South African Geographical Names Council is in the process of being constituted.
2. Naming Authority in South Africa (Pre 1994)

1.1 In accordance with the United Nations Resolution 4 of the First United Nations Conference on Standardisation of Geographical Names, each country has the sovereign prerogative to standardize its geographical names.

1.2 South Africa had established a geographical names authority called the National Place Names Committee.

1.3 After 1994, a Working Forum on Geographical Names was established in order to reconstitute the National Place Names Committee as per recommendations of the White Paper on Arts, Culture and Heritage, international standards and cultural concerns.

3. Composition of the South African Geographical Names Council (SAGNC)

2.1 The South African Geographical Names Council (SAGNC) was established through the South African Geographical Names Council Act No. 118 of 1998. The SAGNC is an advisory body that advises the Minister of Arts and Culture on the transformation and standardisation of the geographical names in South Africa.

2.2 The naming of geographical features in South Africa is part of the process of transformation of South African Heritage Landscape in order to forge a common national identity and nationhood.

2.3 The ushering in of a new society through naming has always received attention at the highest level of governance since the advent of democracy in 1994 and it is also part of symbolic reparation as recommended by Truth and Reconciliation Commission.

2.4 The SAGNC is composed of one representative from each province; people appointed by the Minister, taking into account their special expertise and the population of the country; representatives of the Post Office, Surveys and Mapping, the Pan South African Language Board and other relevant organizations or government departments as determined by the Minister.
4. Mandate of the SAGNC

Amongst the aims and objectives of the SAGNC are the following:

3.1 To facilitate and set guidelines to establish a Provincial Geographical Names Committee (PGNC) in each province.

3.2 To receive, investigate and recommend proposed new geographical names and changes to existing names submitted by the PGNCs and other parties for approval by the Minister.

3.3 To ensure the standardisation of geographical names.

3.4 To ensure the implementation of geographical names in South Africa.

3.5 To promote the use of standardised South African geographical names at international level.

3.5 To promote awareness of the economic and social benefits of the standardisation of geographical names.
5. How Standardisation is done?

4.1 The process of standardisation of geographical name or name change is initiated at local level where the relevant municipality conduct public participation or consultation.

4.2 The application is then forwarded to Provincial Geographical Name Committee for processing.

4.3 It is then forwarded to the South African Geographical Names Council which will then check for compliance in terms of standardisation guidelines and then forward the application for the Minister’s approval.

4.4 The Minister can approve or reject the application based on the information submitted for approval or rejection of the name.

4.5 All names approved by the Minister are then published in the Government Gazette for official used by the public, researchers, government, atlas publishers, international organizations and other stakeholders.
6. Names within and outside the jurisdiction of the SAGNC

5.1 Naming of all geographical features fall within the mandate of the SAGNC, this include but not limited to all human settlements, mountains, rivers, dams etc.

5.2 Naming of all juristic names e.g. name of a country, names of provinces and names of the local authorities falls outside the jurisdiction of the South African Geographical Names Council.

5.3 This also includes all names of features under the control of local authorities e.g. streets, municipal buildings, squares, parks and cemeteries or any other features within the jurisdiction of the municipality.

5.4 The privately owned buildings and farms also fall outside the mandate of the South African Geographical Names Council.

5.5 Policies and guidelines on standardisation of geographical names also apply to features outside its jurisdiction.
7. Analyses of approved names as per province

![Bar chart showing the total number of approved names per province.](chart.jpg)
8. Analyses of approved names as per language

![Bar chart showing the total number of approved names per language. The languages are represented as follows:
- Afrikaans
- English
- Isizulu
- Isixhosa
- Isindebele
- Sesotho
- Setswana
- IsiXhosa
- Leboa
- Sesotho
- Tshivenda
- Xitsonga
- Others or Unknown

The chart shows the following counts:
- Afrikaans: 36
- English: 95
- Isizulu: 225
- Isixhosa: 143
- Isindebele: 13
- Sesotho: 89
- Setswana: 140
- IsiXhosa: 206
- Leboa: 14
- Tshivenda: 93
- Xitsonga: 43
- Others or Unknown: 62]
9. Capacity Building and advocacy

10.1 The SAGNC has facilitated the establishment of nine provincial committees in all nine provinces.

10.2 There were then capacity challenges which resulted in slow pace in standardization of geographical names.

10.3 The Department and the SAGNC took it upon itself to drive capacity building and an awareness campaign in all nine provinces in order to build capacity for provinces to be able to enforce policies of the SAGNC at provincial level and local level.

10.4 Capacity building focused on public participation which revolves around Promotion of Administrative Justice Act (PAJA) and the process to be followed when applying for standardization of geographical names which is regulated through the Handbook on geographical names.
10. CHALLENGES

11.1 Amongst the risks and threats the Department and the SAGNC are facing in this process is resistance to change which culminate to court cases challenging Minister’s decision.

11.2 On 8 May 2014 the Pretoria High Court rule in favor of the Minister on Nelspruit to Mbombela name change and there is another court case outstanding on Louis Trichardt to Makhado name change.

11.3 Pretoria name change has been in the main stream in the media for the past ten years and was referred back to City of Tshwane Metro for public participation.

11.4 Definition or clarity on public participation and consultation in relation to standardisation of geographical names.

11.5 Legislative shortcomings which render some provinces and municipalities in effective.
THANK YOU
