List of publications

The list of publications has been compiled from data extracted from previous sessions of the United Nations Group of Experts on Geographical Names, supplemented by information provided by experts in response to special requests made for the details of recent works relevant to the subject.

Experts are requested to review the list and provide details of publications or conference papers which can be added so that a final list will be available for distribution at the conference in Canada in 1987.

The convenor is grateful to Mr Rayburn of Canada who has undertaken the collation and printing of the list in its present form.
