Agenda item 13

**REPORT OF THE WORKING GROUP ON TERMINOLOGY**

**Report of the Working Group on Terminology**  
**(Central, East and Southeast European Division)**

Two members of the UN Regional Group X states, i.e. Mr. Dušan Fičor and Mr. Imrich Horňanský, both from the CSFR, are active members of the Working Group on Terminology. The Glossary of Technical Terminology Used for Standardization of Geographical Names /Glossary 330 N.330/REV.2/ was published in a reduced form /terms in Hungarian and English, term commentaries in Hungarian/ in Hungary, 1989. Prospectively, the CSFR contemplates to prepare the Glossary of Technical Terms Used for Standardization of Geographical Nomenclature on a base of the Glossary 330. In anticipation, the CSFR does not contemplate to include either Chinese or Arabic versions into the mentioned glossary. Decision on such a glossary preparation way will depend on pace of works and on results achieved by the UNGEGN Working Group on Terminology under the chairmanship of Prof. Kadmon. On base of the Glossary /ST/Cs/SER.F/330; 1984/ Poland published the glossary of terms rendered in Polish, English, French, Russian and German containing the Polish commentaries of terms in 1989.
