Digital Gazetteer of the United States of America

Prepared by Roger L. Payne, United States of America

Digital Gazetteer of the United States of America

Roger L. Payne (USA)

The Digital Gazetteer of the United States of America is on Compact Disc, and has been available since September 1993. The second version was issued in February 1995 and the third version in July 1996. Version Four was released in April of 1998, and for the first time contained the United States database of geographical names in Antarctica. Each successive version included more than 200,000 additional entries resulting from the activities of the National Geographic Names Data Compilation Program. Version Five was released in October 1999, and as with previous editions contains more than 200,000 additional entries.
