INTRODUCTION

The bibliography "Gazetteers and Glossaries of Geographical Names, World, Countries and Territories" comprises the gazetteers after World War II, i.e. since 1945.

The UN Group of Experts on Geographical Names has defined the term "Gazatteer" as follows:

"A list of toponyms which presents relatively brief information regarding the items listed, and which serves as a guide to the source from which it has been compiled."
(E/CONF.61/L.1/Rev.1, 30 May 1972.)

For more complete information the present bibliography goes beyond this definition. It includes not only the gazetteers covered by the above definition, but also some place-name lists containing encyclopedic data and furthermore indexes of atlases and indexes of maps. Census publications have been added in some cases because census bureaus as state agencies are requested to use the official local names. Finally, gazetteers or lists of place-names for special purposes, e.g. in the computer and banking field and for guides to pronunciation, have also been added in some cases.

The bibliography distinguishes between official national gazetteers and publications issued by individuals and/or nonofficial publishers, and furthermore between gazetteers of the national agency of the country and those of governmental agencies of other countries than the one concerned. Except for the classifications given below, the order in which a gazetteer or index appears in the listing does not infer any priority.

For quick reference five sections have been marked by Roman ciphers as follows:

- I Official publications of the country concerned.
- II Publications issued by individuals and/or non-official publishers
- III Publications of international organisations and of governmental agencies of other countries than the one concerned.
- IV Indexes of atlases.
- V Indexes of maps.

/...

An appendix contains a list of glossaries of generic terms given in the listed gazetteers and indexes. Finally, there is an addition of various lists of designations of oceanographic terms and of undersea features which were issued in the course of recent discussions.

The present bibliography was compiled by one man within short time. It might, therefore, not be complete. Any additions or suggestions are welcomed.

The author wishes to thank all the members of the UN Group of Experts on Geographical Names, and Messrs. N.O. Abelson, P.G.M. Geelan, Friedr. Hoffmann, H.A.G. Lewis, OBE, R.R. Randall, W.W. Ristow and Miss Helen Wallis should be mentioned for their special support to the author in his research.
