SIXTH UNITED NATIONS CONFERENCE  
ON THE STANDARDIZATION OF  
GEOGRAPHICAL NAMES  
New York, 25 August-3 September 1992  
Item 5 (e) of the provisional agenda\*

NATIONAL STANDARDIZATION: TOPONYMIC GUIDELINES FOR  
MAP AND OTHER EDITORS

Toponymic guidelines for map and other  
editors: Federal Republic of Germany  
(second edition)

Paper submitted by the Federal Republic of Germany\*\*

---

\* E/CONF.85/1/Rev.1.

\*\* Prepared by Institut für Angewandte Geodäsie, Frankfurt am Main.

### Summary

The first edition of "Toponymic guidelines for cartography: Federal Republic of Germany" was published in 1981 and submitted as Working Paper No. 11 to the United Nations Group of Experts on Geographical Names at its ninth session, in New York, in 1981.

The second edition of "Toponymic guidelines" has been revised in conformity with experience gained, and with the recommendations made by the United Nations Conferences on the Standardization of Geographical Names, as well as with the results presented by the Group of Experts.

Examination and improvement cover all parts of the guidelines. Precision and enlargement have been made as a consequence of the reunification of Germany in October 1990. A supplement to the Gazetteer, Federal Republic of Germany is in preparation, including the geographical names of the Länder Brandenburg, Mecklenburg-Vorpommern, Sachsen, Sachsen-Anhalt, Thüringen, and the eastern part of Berlin. A great number of geographical names are actually changed within these Länder and the administrative organization, in particular those of the Kreise and communes, are actually being redefined.

Therefore, this edition of the "Toponymic guidelines" informs the user on how he may receive more information on changes and added geographical names within Germany.

1 Languages  
1.1 General remarks

The official language in the Federal Republic of Germany is German in its standard form.

Danish and Sorbian have the status of minority languages. Danish exists only at the northern frontier strip of Schleswig-Holstein. Sorbian is spoken by Sorbs living in certain regions of Brandenburg and Saxony along the border with Poland.

Although the Frisian language is a West Germanic language of its own, it has in the practice of land surveying only the character of a dialect to which German as standard language is assigned to.

Dialects are also spoken in nearly every German landscape or region. In the standardisation of geographical names the dialect terms of geographical features have been and are being considered on principle, but the tendency towards standard spellings predominates strongly. The dialect spelling of geographical names has in most cases only regional effects. At present the degree of adaption to the standard language differs considerably in the various landscapes and regions.

## 1.2 The German alphabet

The German alphabet is written in Roman characters and has the following 26 letters:

Letter	Pronunciation	Letter	Pronunciation
a A, ä Ä	a:	n N	en:
b B	be:	o O, ö Ö	o:
c C	tse:	p P	pe:
d D	de:	q Q	ku:
e E	e:	r R	er:
f F	ef:	s S, ß	es:
g G	ge:	t T	te:
h H	ha:	u U, ü Ü	u:
i I	i:	v V	fau:
j J	jot:	w W	ve:
k K	ka:	x X	iks:
l L	el:	y Y	'ypsilon
m M	em:	z Z	tset:

The letters ä Ä, ö Ö and ü Ü are called umlaut letters. In alphabetical lists they are treated like the corresponding simple letters a, o, and u. Occasionally, particularly in older publications, in library catalogues, in registers of the Federal Postal Administration, in directories, and computers outputs, the umlaut letters ä, ö and ü are treated like ae, oe, and ue. The letter combinations ae, oe, and ue are, irrespective of their pronunciation, treated like a + e, o + e and u + e.

The special letter ß ("strong s") exists only in small letters. In capitalized words ß is, as a rule, substituted by SS. In case of possible misunderstandings ß can also be substituted by SZ. In the alphabetical order ß is treated like ss.

The vowel combinations au, eu, äu, ei and ai are diphthongs (compound vowel sounds); they cannot be split.

### 1.3 General rules

The spelling of the geographical names within the Federal Republic of Germany complies in general with the actual German spelling rules as they are given in the standard work DUDEN, Rechtschreibung der deutschen Sprache, Band 1, DUDENVERLAG Mannheim/Leipzig/Wien/Zürich, recent edition (actually the 20th edition, revised and completed, 1991).

But the spelling of the geographical names does not always observe the actual rules of the German orthography. There are cases of old spellings which have been conserved, or regional spellings have been accepted.

Example: Thüringen

Frankenthal  
Coblenz, Koblenz, Koblentz  
Freyburg/Unstrut  
.Gaarz, Garz, Gartz.

The officially standardized spelling of place names differs relatively often from the spelling rules. Irregularities exist above all with the problem to write names in two or more words or in one word and with the use of hyphens.

Examples: Alt Ruppin, Neuruppin, Neu-Isenburg

Groß Ziethen, Großziethen, Groß-Ziethen  
Wendisch Rambow, Wendischbora, Wendisch-Cunnersdorf.

Ancient, regional spellings of geographical dialect names differ also sometimes from the spelling rules.

Examples: Fehn, Fenn, Venn

Haardt, Hart, Hardt  
Struth, Strutt, Strut  
Wiek, Wieck, Wyck.

These (often ancient) spellings of geographical names, in particular the standardized place names, may not be altered.

1.3.1 Spelling letter-for-letter

The letters of the German alphabet shall not be deformed. This applies particularly to the small letter ß which can normally not be substituted by ss.

For the official spelling, the umlaut letters ä, ö and ü shall not be changed into ae, oe, and ue (see 1.2).

When three "S" meet in a name, none shall be dropped. In other geographical names it makes sense to write them with a hyphen.

Examples: GROSSSÖLK  
MESSSTETTEN  
SCHLOSS-STRASSE.

1.3.2 Capitalization

1.3.2.1 Each word as a component of a compound geographical name (adjectives, participles, pronouns) is written with a capital first letter, also after a hyphen or a oblique stroke. This also applies to -isch derivatives.

Examples: Altes Land  
Deutsche Bucht  
Holsteinische Schweiz  
Oder-Havel-Kanal  
Hessisch Lichtenau.

1.3.2.2 The geographical names with -er derivatives are written with a capital first letter.

Examples: Allgäuer Alpen  
Lüneburger Heide  
Magdeburger Börde.

1.3.2.3 Articles and prepositions as official parts of proper names are written with a capital first letter, even when they are not at the beginning of the name.

Examples: Landschaft Der Werder  
Stadion Am Luftschiffhafen.

1.3.3 Use of small initial letters

- 1.3.3.1 Small letters are used for articles, prepositions and conjunctions which are not at the beginning of the name and, without definition, are not an official part of proper names.

Examples: Altbernsdorf auf dem Eigen  
Holzhausen an der Haide  
Frankfurt am Main  
Unter den Linden.

- 1.3.3.2 When geographical names are derived from noble titles the preposition "von" is written in small letters in case the christian name(s) of the personality concerned are part of the name; in all the other cases it is written with a capital first letter.

Examples: Heinrich-von-Kleist-Straße  
but: Von-Kleist-Straße.

1.3.4 Spelling in one word

- 1.3.4.1 Geographical names of several components are written in one word if they are real compounds and the composition is clear.

Examples: Elbsandsteingebirge  
Alpenvorland  
Chiemsee  
Wilhelmshaven.

- 1.3.4.2 Geographical names with combined with Alt-, Neu-, Groß-, Klein-, Ober-, Unter-, Nieder-, Mittel-, Zentra-, Haupt-, Neben-, and others are written in one word (except for officially prescribed spellings of place names).

Examples: Oberpfalz  
Niederlausitz  
Neustadt.

1.3.4.3 Compound geographical names with preceding denominations for directions, simple names of persons, and numerals are written in one word.

Examples: Ostfriesland  
Napoleonstein  
Wallensteingraben  
Dreilinden

1.3.4.4 One word is used for compound geographical names having an s or the combination -es between the primary word and the determinative element.

Examples: Landeskrone  
Inselsberg  
Teufelsmauer

1.3.4.5 Compound geographical names with a determinative element ending with -er are written in one word (cf. 1.3.2.2 and 1.3.5.1).

Examples: Siegerland  
Steigerwald  
Oderbruch.

1.3.5 Spelling in separate words

1.3.5.1 Separate words are used if geographical names of several parts represent real groups of words and the first part - is an uninflectible derivative of a geographical name ending with -er,

Examples: Oberpfälzer Wald  
Dammer Berge  
Darßer Ort  
Kummerower See;

(but geographical names ending with -er are written in one word, cf. 1.3.4.5). In the German-speaking Switzerland and in Austria this derivative is in some cases written in one word

together with the basic component, examples: Wienerwald,  
Wörthersee, Thunersee;

- is an inflectible derivative of a geographical name ending  
with -isch or -sch,

Examples: Hessisch Lichtenau  
Sächsisches Hügelland  
Bergisches Land;

- is an inflectible adjective (which is always written with a  
capital first letter),

Examples: Großer Arber  
Kleiner Brocken  
Hoher Fläming.

### 1.3.6 Use of hyphens/punctuation marks

1.3.6.1 A hyphen is used for coupling, completing, explaining and  
joining purposes; special attention is paid to the spaced  
hyphen.

1.3.6.2 A hyphen is used when geographical names are composed by parts  
of objects belonging together (names of amalgamated populated  
places, of landscapes, canals etc).

Examples: München-Schwabing  
Schleswig-Holstein  
Elbe-Seitenkanal  
Colbitz-Letzlinger Heide.

1.3.6.3 The hyphen is used to couple several names or parts of names to  
a qualifying element or when the names are complicated  
compounds.

Examples: Dortmund-Ems-Kanal  
Friedrich-Wilhelm-Lübke-Koog  
Neunzehn-Kirchen-Berg.

- 1.3.6.4 If the first part of a compound name is abbreviated, these parts are coupled by a hyphen and the second part is written with a capital first letter.

Examples: N.-Friesland for Nordfriesland  
Ndr.-Lausitz for Niederlausitz  
Gr.-Heide for Großheide.

- 1.3.6.5 The hyphen is used to indicate distances. Special attention should be paid when a hyphen indicating distances and a hyphen for coupling purposes meet in a geographical name.

Examples: Autobahn Hamburg-Hannover-Braunschweig  
Gustav-Freitag-Straße - Heinrich-Mann-Allee.

- 1.3.6.6 A comma is used when the name of an object shall be separated (applied in particular for registers with cross-references) or when the name is followed by an apposition.

Examples: Graal-Müritz, Ostseebad  
Rakow, Kreis Grimmen  
Marienfelde, Post Röbel.

- 1.3.6.7 The oblique stroke separates name forms of equal value but of different languages. It is also used to indicate street corners. The oblique stroke is written like the hyphen without blanks.

Examples: Bautzen/Budyšin  
(Ecke) Leipziger Straße/Wilhelmstraße.

- 1.3.6.8 Round brackets are used for subordinate names. Additional information in brackets may be dropped in cartographic products when no space is left. There are no blanks between the brackets and the name.

Examples: Müncheberger Stadtforst (Müncheberger Heide)  
Potsdam (Teltower Vorstadt)  
Elbe (Oberlauf).

- 1.3.6.9 Square brackets are used in general for ancient (obsolete) names which can additionally be used (in square brackets) as long as the new geographical name is not established (e.g. in cartographic products).

Example: Landsberger Allee [Leninallee].

- 1.3.6.10 Quotation marks are used when a geographical name shall be emphasized.

They are not necessary if the word group concerned contains adjectives with a capital first letter or if it begins with an article or a preposition with a capital first letter.

Examples: Braunkohlenwerk "Elbe" (Vockerode)

Hotel "Stadt Berlin"

but:

Hotel Zum Schwarzen Adler

Gasthaus An der Silbergrube.

- 1.3.7 Division of syllables

- 1.3.7.1 Division of syllables is used if needed (for reasons of space, but also to show the extent of a geographical object or the lettering on a map). It is made according to the rules of German orthography.

Examples: Hasen-winkel

Kaiser-stuhl.

- 1.3.7.2 Divided syllables are written with small letters after the hyphen.

Letter or morpheme compounds which could be misinterpreted should be avoided.

Examples: Peene-kanal not Pee-nekanal

Heroldis-hausen not Herol-dishausen.

1.3.8 Derivatives of geographical names

1.3.8.1 The geographical names are normally derived by -er or -isch (see 1.3.5.1).

These derivatives are always capitalized.

They are not declinable.

Examples: Mecklenburg - Mecklenburger Bucht  
München - Münchener Ebene  
Niederrhein - Niederrheinisches Tiefland.

1.3.8.2 When geographical names are derived from names of populated places or persons, it must be made sure that the officially prescribed names of populated places or persons are correctly spelled.

Examples: Cunnersdorf - Cunnersdorfer Bach  
Thyrow - Thyrower Berg.

1.3.8.3 When physical geographical names are derived from names of populated places with a preceding adjective like Groß-, Klein-, Alt-, Neu-, it must in every case be written in one word -independent from the original form- and the adjective shall not be changed.

Examples: Alt Schwerin - Altschweriner See  
(not Alt-Schweriner See or  
Alter Schweriner See)  
Groß Dölln - Großdöllner See  
(not Groß-Döllner See or  
Großer Döllner See).

1.3.9 Abbreviations of names

1.3.9.1 Abbreviations and short forms of names are unavoidable for cartographic products especially for reasons of space. Therefore negligible appendices of names and information not necessary to differentiate objects having the same name can be dropped.

Examples: Langenkirchen auf Fehmarn - Langenkirchen a. Fehm.  
or simply: Langenkirchen  
Bad Homburg vor der Höhe - Bad Homburg v.d.H.  
Bergen (Rügen) - Bergen.

- 1.3.9.2 In cartographic products, registers and similar lists the article is dropped in order to get short names. When the article is dropped the adjective is declined correspondingly.

Examples: Harz - not Der Harz  
Elbe - not Die Elbe  
Höher Fläming - not Der Hohe Fläming.

- 1.3.9.3 But the article is not dropped if it is, as a proper name, an integral part of the appellative or is connected with a preposition.

Examples: Der Strom  
Die Au  
In der Aue  
In der Silbergrube.

- 1.3.9.4 Abbreviations shall only be used if they are unequivocal and the legibility of the geographical names is guaranteed. Therefore in particular appellatives, adjectives, articles, and prepositions of geographical names are abbreviated. Real abbreviations are marked with a full stop.

Examples: Ob.-Spreewald for Oberspreewald  
Erzgeb. for Erzgebirge.

- 1.3.9.5 For certain map types, e.g. topographic maps or special thematic maps, abbreviated forms are used which do not correspond to the general orthographic rules but describe unequivocally the object concerned in connection with the cartographic representation. In these cases the full stop is dropped.

Examples: AD - Autobahndreieck  
 AT - Aussichtsturm  
 E - Europastraße  
 NSG - Naturschutzgebiet

1.3.9.6 The U mark "u" is limited for cartographic purposes, e.g. in the abbreviation -burg for -burg. When using the Latin alphabet this mark does not correspond to the German orthography but is regarded sometimes as a necessary cartographic form for differentiation.

### 1.3.10 Pronunciation

1.3.10.1 The German geographical names are stressed in general according to the pronunciation rules for the other German words. General rules cannot be derived (cf. Königsdorf, but Königsbrunn). Without stress are among others the endings -a, -e, -el, -eln, -em, -en, -er, -ern, -ing, -ingen, -ow, -um. The ending -in in German geographical names is in most cases stressed with a long i.

1.3.10.2 V is normally spoken like f; but cf. 1.3.10.5.

Y is spoken in certain names like i, in others like ü.

1.3.10.3 Some German geographical names have spellings which do not exist (any longer) in German words except for proper names and foreign words and which have to be considered for pronunciation.

Examples: ae, oe, ue - pronounced like ä, ö, ü,  
 Aegidienburg, Oestrich, Uelzen  
 -ay, -ey - pronounced like ei,  
 Bayreuth, Norderney  
 c - pronounced like k or z,  
 Coburg, Celle  
 rh - pronounced like r,  
 Rhein, Rheydt  
 th - pronounced like t,  
 Thüringen, Thurnau.

1.3.10.4 If a German name contains a foreign personal name the foreign pronunciation rules can prevail.

Examples: ch - pronounced like sch,  
Charlottenburg  
-ouis - pronounced like ui,  
Saarlouis.

1.3.10.5 Furthermore some German geographical names follow other pronunciation rules in spite of their domestic origin:

Spell.	Pronunc.	Notes	Examples
ae	long a	(in NW Germany)	Kevelaer, Baesweiler, Raesfeld
ch	k	(in S Germany)	Cham, Chiemsee
oe	long o	(in N Germany)	Itzehoe, Soest, Coesfeld
oey	long ö		Bad Oeynhausen
oi	long o		Troisdorf, Grevenbroich
ow	long o	(in NE Germany)	Lüchow
ue	long u		Bernkastel-Kues
üe	ü		Lüerdissen
ui	long ü	(in NW Germany)	Duisburg, Gruiten
v	w	(between vowels; in N Germany)	Leverkusen, Overath (also in: Eltville)

(More information can be found in: DUDEN, Das Aussprache-wörterbuch, 2. Auflage, Band 6, Bibliographisches Institut, Mannheim.)

#### 1.4 Languages of minorities

##### 1.4.1 Danish

In the bilingual region at the northern frontier strip of Schleswig-Holstein where Danish has the status of a minority language geographical names may have a Danish written name in addition to the German name. In these cases the spelling of the Danish names follows the "Toponymic Guidelines - Kingdom of Denmark". It has to be taken into consideration that the Danish alphabet has the special letters Æ æ , Ø ø , and Å å. But in

the official cartographic products the geographical names in these regions are shown only in German language.

#### 1.4.2 Sorbian

Within the bilingual regions of the Länder Brandenburg and Sachsen (the landscape Lausitz) where Sorbian has the status of a minority language, the Sorbian geographical names are given in addition to the German names, in particular in large-scale maps and plans and in other administrative and special maps, as far as there is space left.

The German and Sorbian names are normally separated by an oblique stroke side by side or one beneath the other. In special cases the Sorbian name can also be added to the German name by smaller letters and in round brackets).

Examples: Weißwasser/Beža Woda  
Oberlausitz (Hornja Łužica).

The Sorbian names are reproduced with all special letters and diacritical marks of the Sorbian alphabet.

The Sorbian alphabet (Upper Sorbian) has the following letters: a, b, c, č, d, dž, e, ě, f, g, h, ch, i, j, k, l, ŕ, m, n, ň, o, ô, p, r, ř, s, š, t, ć, u, w, y, z, ž.

Furthermore, the Lower Sorbian knows the letters ř, ś, and ź, but it has no dž, ô, and ř.

- 2 Institutions prescribing geographical names  
2.1 Ständiger Ausschuß für geographische Namen (StAGN - Permanent Committee for Geographical Names) and the Institut für Angewandte Geodäsie (IfAG - Institute for Applied Geodesy)

StAGN has taken over the coordination of all fundamental activities for a standardization of geographical names within the Federal Republic of Germany and contributes to the realization of the resolutions of the United Nations Conferences on the Standardization of Geographical Names within the individual state. Its office is at the Institut für Angewandte Geodäsie (IfAG) in Frankfurt am Main. IfAG is a federal authority within the area of responsibility of the Federal Minister of the Interior. StAGN publishes guidelines and concepts for the spelling of geographical names concerning in particular general questions as to the spelling of geographical names, and discusses and harmonizes them within the German linguistic area with Austria and Switzerland. Austrian and Swiss representatives are members of StAGN. IfAG supports the standardization of geographical names by the edition and publication of gazetteers and data bases for national and international purposes. Furthermore IfAG is concerned with the official map series at 1 : 200 000 scale and smaller in accordance with the Länder of the Federal Republic of Germany. (See also 2.3, 2nd paragraph.)

Address: Institut für Angewandte Geodäsie  
Richard-Strauss-Allee 11  
D-W-6000 Frankfurt am Main 70  
Telephone (069) 6333-1, Telefax (069) 6333425.

- 2.2 Statistical offices  
The Statistisches Bundesamt (Federal Statistical Office) as well as the statistical offices of the Länder publish in mostly regular intervals "Amtliche Gemeindeverzeichnisse" (Official Communal Gazetteers) showing the spelling of the names of the cities and communes, the number of inhabitants and other information as well as the denominations of the administrative organization of the Länder into

Regierungsbezirke, Kreise, and communes.  
In the following are given the addresses of the offices  
publishing the official communal gazetteers:

2.3 Survey administrations

Those geographical names not indicated in the lists mentioned under 2.2, such as parts of communes, populated places, landscapes, mountains, mounts, valleys, rivers, lakes, forests etc. are collected by the survey office competent for the Land. These services publish the official topographic map series in the scales 1 : 10 000 - 1 : 100 000. The spelling of the geographical names shown there can be regarded as the official one as the names are an integral part of official map series. The addresses of the land survey offices as well as of the survey authorities of Berlin, Bremen and Hamburg are given as follows:

<b>Baden-Württemberg</b>	Landesvermessungsamt Baden-Württemberg Postfach 10 29 62 Büchsenstraße 54 D-W-7000 Stuttgart 1

2.4 Other services

Other institutions prescribing geographical names for special purposes and publishing them in cartographic products or lists:

- Federal Minister of Transport  
(maps of the networks of federal autobahns and federal waterways)
- Federal Minister of the Interior  
(list of spas)
- German Hydrographic Institute, Hamburg  
(charts at the North and Baltic Seas)
- Federal Administration of Air Navigation Services and Air Navigation Services of the Federal Army, Frankfurt am Main  
(air navigation charts).

3 Sources for the spelling of geographical names

3.1 Topographic maps

The territory of the Federal Republic of Germany is covered by the following official topographic map series:

- Topographic map/topographic city map of the scale 1 : 10 000  
(for the new Länder only)
- Topographic map 1 : 25 000 TK 25
- Topographic map 1 : 50 000 TK 50
- Topographic map 1 : 100 000 TK 100

Watt	low bench which is under water at high tide
Weg	way, path, road
Weiher	(fish)pond
Weil(er)	hamlet
Wein	wine
weiß	white
Wiese	meadow
Wohnplatz	populated place

## 6 Administrative structure

## 6.1 Administration (as of March 1992)

The Federal Republic of Germany is divided into 16 Länder (federal states) (see annex 1). The Länder Baden-Württemberg, Bayern, Hessen, Niedersachsen, Nordrhein-Westfalen, and Sachsen are subdivided into Regierungsbezirke (District of Regional Commissioner). The Länder Berlin, Bremen, Hamburg, Saarland, and Schleswig-Holstein do not have Regierungsbezirke. The Länder Brandenburg, Mecklenburg-Vorpommern, Sachsen-Anhalt and Thüringen have not yet made any decision whether or not forming Regierungsbezirke. The Länder and the Regierungsbezirke are subdivided into Kreise (counties) (Landkreise and Stadtkreise). Attributed to the Kreise are the communes.

## 6.2 The Länder of the Federal Republic of Germany and their capitals

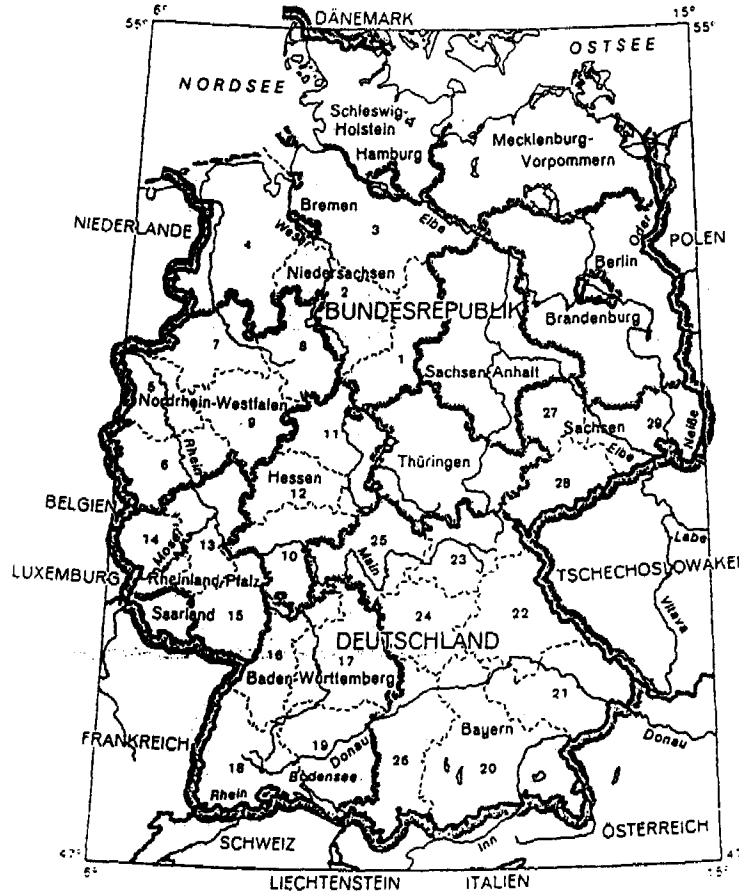

Land	Capital
Baden-Württemberg	Stuttgart
Bayern	München
Berlin	Berlin, also capital of Germany
Brandenburg	Potsdam
Bremen	Bremen
Hamburg	Hamburg
Hessen	Wiesbaden
Mecklenburg-Vorpommern	Schwerin
Niedersachsen	Hannover
Nordrhein-Westfalen	Düsseldorf
Rheinland-Pfalz	Mainz
Saarland	Saarbrücken
Sachsen	Dresden
Sachsen-Anhalt	Magdeburg
Schleswig-Holstein	Kiel
Thüringen	Erfurt

Additional information

- The administrative structure (names of the administrative units, capitals, locations of administrations, borders) including the Kreise can be found on the map Federal Republic of Germany 1 : 1 000 000 - edition with administrative limits - mentioned in 3.2.
- Detailed maps of the administrative structure of the Länder including the communes are available with the survey administrations cited under 2.3.
- Information on actual changes as to the administrative structure of the Länder are also available at the statistical offices given under 2.2.
- The administrative structure of Berlin, capital of the Federal Republic of Germany, (23 Stadtbezirke) (districts) as of 1991 can be found in annex 2.

Map showing the administrative structure of the Federal Republic of Germany

REGIERUNGSBEZIRK	LAND		
1 Braunschweig	Niedersachsen	16 Karlsruhe	Baden-Württemberg
2 Hannover		17 Stuttgart	
3 Lüneburg		18 Freiburg	
4 Weser-Ems		19 Tübingen	
5 Düsseldorf	Nordrhein-Westfalen	20 Oberbayern	Bayern
